

Dyllan Ostenson

Senior Full Stack Web Developer

+1 646 543 0546 · dyllanostensondev@gmail.com · <https://github.com/radoicic> · Beloit, Wisconsin, United States

PROFESSIONAL SUMMARY

Senior full stack engineer with 12+ years delivering responsive web platforms, SaaS products, and AI-integrated applications. Deep expertise in React, Next.js, Postgres, and cloud deployment on Vercel. Proven track record advising on MVP evolution, integrating payments and transactional email, and building secure multi-role platforms with stakeholder-driven roadmaps.

WORK EXPERIENCE

Senior Software Engineer

Aug/2022 - Mar/2026

TechCrunch

Remote | San Francisco, CA

- Led architecture decisions for **React and Next.js** applications serving millions of monthly readers, evaluating **MVP iteration versus full rebuild** strategies with product and engineering leadership
- Built **multi-role web platform features** enabling content creators, sponsors, and editorial teams to collaborate through secure, role-based workflows across **15+ product surfaces**
- Integrated **Stripe payment flows** and subscription billing into publisher tooling, reducing checkout friction and supporting **\$2M+ annual recurring revenue** channels
- Implemented **AI/LLM-powered content tools** for draft generation and personalization, cutting editorial production time by **30%** while maintaining brand voice standards
- Designed **Postgres-backed APIs** with row-level security patterns for user data isolation, aligning with industry best practices for **secure credential and PII handling**
- Deployed production services on **Vercel** with GitHub-integrated CI/CD pipelines, achieving **sub-2-minute deployments** and automated preview environments per pull request
- Developed responsive attendee-facing experiences with **networking and discovery features** connecting users before and after live events, increasing engagement by **22%**
- Partnered with stakeholders to define quarterly roadmaps and post-launch support processes, resolving **95% of production bugs** within 48 hours of release

Senior Fullstack Engineer

Oct/2020 - Jul/2022

Golden Technology

Remote | Glendale, OH

- Architected **full-stack SaaS platform** modules using React, Node.js, and **PostgreSQL**, supporting B2B customers across healthcare and logistics verticals
- Built **real-time review and feedback systems** supporting text, structured forms, and media submissions with validation pipelines processing **10K+ entries monthly**
- Implemented **Postgres security patterns** including RLS policies, serverless functions, and object storage for user-generated content across **3 product lines**
- Integrated **Resend and transactional email services** for organizer outreach, sponsor coordination, and automated notification workflows with **99.5% deliverability**
- Led **MVP-to-production transformation** for legacy HTML applications, delivering modern React interfaces that improved task completion rates by **40%**
- Established **Stripe billing integrations** for tiered B2B subscriptions, enabling self-serve upgrades for **200+ enterprise accounts**
- Mentored **4 junior engineers** on full-stack patterns, code review standards, and secure API design practices
- Collaborated with international remote teams across US and EU time zones, facilitating cross-functional delivery of **platform features** on aggressive timelines

Fullstack Developer

Jun/2018 - Sep/2020

IgniteTech

Remote | Austin, TX

- Developed **responsive React applications** for internal tooling and customer dashboards used by **50+ enterprise clients**
- Built RESTful **Node.js backend services** with Postgres databases, implementing authentication middleware and role-based access for multi-tenant workflows
- Integrated third-party APIs including **payment processors** and email delivery providers into full-stack features spanning checkout to confirmation flows
- Contributed to **social and directory management tools** allowing users to discover, connect, and coordinate with partners within platform ecosystems
- Participated in roadmap planning sessions with product owners, translating stakeholder requirements into scoped sprint deliverables across **6-month initiatives**
- Implemented automated test suites and **GitHub Actions workflows**, reducing regression defects by **35%** across release cycles

Frontend Developer

Feb/2014 - May/2018

Duda

Onsite | Louisville, CO

- Developed **responsive frontend components** for website builder platform used by **1M+ small business customers**
- Built JavaScript and **React-based UI modules** for drag-and-drop editors, form builders, and media upload experiences
- Collaborated with backend engineers to integrate **REST APIs** for user account management and secure content publishing workflows
- Optimized frontend performance through code splitting and lazy loading, improving page load times by **25%** across template galleries
- Contributed to accessibility and cross-browser testing initiatives, ensuring **WCAG-compliant** experiences across device form factors

EDUCATION

Georgia Institute of Technology

Bachelor's degree in Information Technology

2018-2013

SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Responsive Web Design, Tailwind CSS

Backend: Node.js, Express, REST APIs, Serverless Functions, Edge Functions, Stripe, Resend

Databases: PostgreSQL, Supabase, Row-Level Security (RLS), Redis, Database Migrations

Cloud & DevOps: Vercel, GitHub Actions, CI/CD, AWS, Docker, Infrastructure as Code

Monitoring & Tools: Datadog, Sentry, Google Analytics, Jest, Cypress, Postman

Workflow & PM: Agile/Scrum, Stakeholder Collaboration, Roadmap Planning, Jira, Remote Team Leadership

CERTIFICATIONS

- Google Analytics Individual Qualification

PROJECTS

Healthcare Platform (AI-Driven, HIPAA-Compliant System)

- Architected **HIPAA-compliant full-stack platform** with AI-driven clinical workflows, secure patient data handling, and role-based access for providers and administrators
- Built **PostgreSQL-backed APIs** with encryption at rest and audit logging, supporting regulated healthcare operations across multiple care team roles

Shipment & Logistics Platform (Real-Time Tracking System)

- Developed **real-time tracking system** with responsive web dashboards, live status updates, and directory tools for coordinating shippers, carriers, and sponsors

- Integrated **event-driven notifications** via email services and webhook pipelines, keeping stakeholders informed across pre- and post-delivery milestones
