

Dyllan Ostenson

Senior Software Engineer — AI/ML & Full Stack

+1 646 543 0546 · dyllanostensondev@gmail.com · <https://github.com/radoicic> · Beloit, Wisconsin, United States

PROFESSIONAL SUMMARY

Senior software engineer with a decade of full stack delivery across SaaS, media, and regulated healthcare systems. Hands-on owner of production AI features including LLM orchestration, RAG pipelines, and vector search integrations on AWS and Azure. Strong in Python services, automated testing, incident triage, and cross-team execution with offshore partners. Trusted to translate business requirements into reliable, secure releases with measurable quality and performance outcomes.

WORK EXPERIENCE

Senior Software Engineer TechCrunch

Aug/2022 - Mar/2026

Remote | San Francisco, CA

- Owned **end-to-end delivery** of AI-assisted editorial tooling, integrating **LLM orchestration** and prompt workflows across **12+ product surfaces** used by newsroom and subscription teams.
- Built and maintained **RAG pipelines** with **vector search** over article archives, improving research retrieval relevance and reducing manual lookup time for writers and analysts.
- Developed **Python and Node.js microservices** exposing inference APIs with **automated regression suites** and quality gates that blocked risky releases before production deploy.
- Led **production incident response** during US business hours for publishing and subscription systems, performing **root-cause analysis** and durable fixes that reduced repeat outages by **40%**.
- Coordinated **offshore engineering partners** on sprint execution, code reviews, and release readiness across **3 distributed teams** and internal AI platform groups.
- Implemented **AWS-based CI/CD pipelines** with containerized deployments, enabling twice-weekly releases with rollback automation and environment parity checks.
- Integrated **generative AI features** into React dashboards with evaluation hooks for model output quality, sustaining **P95 latency under 800ms** for inference-backed UI flows.
- Authored **technical documentation** and internal build tools standardizing API contracts, test data seeding, and on-call runbooks for AI-enabled services.

Senior Fullstack Engineer Golden Technology

Oct/2020 - Jul/2022

Remote | Glendale, OH

- Served as **technical lead** for a HIPAA-aware patient portal, owning **full stack architecture** from React front ends through **Python API layers** serving **50K+ monthly** active users.
- Designed **retrieval workflows** connecting clinical knowledge bases to guided patient responses, applying **embedding search** and content safety checks before production rollout.
- Established **automated testing strategy** spanning unit, integration, and contract tests, raising deployment confidence and reducing post-release defects by **35%**.
- Operated **Azure-hosted services** with infrastructure-as-code practices, monitoring cost trends and rightsizing workloads during peak enrollment periods.
- Partnered with compliance stakeholders to embed **audit logging**, role-based access, and data retention controls aligned with **healthcare regulatory** expectations.
- Mentored **4 engineers** on API design, debugging techniques, and performance profiling, improving team throughput on critical milestone deliverables.
- Triageed **production support queues** during business hours, resolving authentication and data sync issues with documented playbooks and corrective actions.
- Delivered **real-time notification** and scheduling modules using event-driven patterns, sustaining **99.9% uptime** across core appointment workflows.

Fullstack Developer

Jun/2018 - Sep/2020

IgniteTech

Remote | Austin, TX

- Built **full stack features** in React and **Python/Django** for enterprise SaaS dashboards used by **200+ customer accounts**.
- Implemented **REST APIs** and background jobs processing billing events with idempotent handlers and structured error telemetry.
- Added **integration test coverage** for payment and subscription flows, catching regressions before quarterly release trains.
- Collaborated with **distributed QA contractors** to reproduce defects, document steps, and verify fixes across staging and production.
- Improved query performance on reporting endpoints through **index tuning** and caching, cutting average response times by **30%**.
- Contributed **technical writing** for API onboarding guides consumed by customer integration teams.

Frontend Developer

Feb/2014 - May/2018

Duda

Onsite | Louisville, CO

- Developed **responsive UI components** in JavaScript for a website builder platform supporting **thousands of merchant sites**.
- Translated **functional requirements** from product designers into reusable widget libraries with cross-browser compatibility testing.
- Participated in **regression testing cycles** before major releases, logging defects and verifying fixes across staging environments.
- Optimized front-end bundles through lazy loading and asset compression, improving **Lighthouse performance scores** for template pages.
- Supported **production issues** reported by enterprise clients, debugging rendering inconsistencies and shipping hotfixes within SLA windows.
- Collaborated with backend engineers to integrate **CMS APIs**, ensuring consistent data contracts and error handling in editor workflows.

EDUCATION

Georgia Institute of Technology

Bachelor's degree in Information Technology

2018-2013

SKILLS

Frontend: React, TypeScript, JavaScript, HTML/CSS, Redux, Next.js, Accessibility (WCAG)

Backend: Python, Node.js, Django, FastAPI, REST APIs, GraphQL, Microservices

Databases: PostgreSQL, MySQL, Redis, Vector Databases (Pinecone, pgvector), MongoDB

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD, Terraform, GitHub Actions

Monitoring & Tools: Datadog, Sentry, Prometheus, Grafana, ELK Stack, Postman

Workflow & PM: Agile/Scrum, Jira, Confluence, Offshore Coordination, Incident Management

CERTIFICATIONS

- Google Analytics Individual Qualification

PROJECTS

Healthcare Platform (AI-Driven, HIPAA-Compliant System)

- Led development of **AI-assisted triage experiences** with HIPAA controls, embedding search over clinical FAQs, and human-in-the-loop escalation paths.
- Built **Python services** and React interfaces with comprehensive audit trails, encryption at rest, and role-scoped data access for multi-clinic rollouts.

Shipment & Logistics Platform (Real-Time Tracking System)

- Engineered **real-time tracking dashboards** integrating GPS telemetry streams and alerting rules for **500+ daily shipments**.
- Implemented **automated test pipelines** and performance tuning on high-volume event ingestion, sustaining sub-second map refresh under peak load.
