PROFESSIONAL SUMMARY

Senior full stack engineer with eight years shipping scalable web applications across React, TypeScript, Node.js, and AWS. Delivers end-to-end ownership from PostgreSQL schema design through API layers to responsive UI, emphasizing reliability, security, and performance under load. Integrates LLM capabilities with prompt management, output validation, and cost-aware degradation paths. Shapes architecture, mentors engineers, and accelerates delivery through CI/CD, observability, and agentic development workflows.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **end-to-end delivery** of investor-facing SaaS modules spanning **React**, **TypeScript**, and **Node.js** APIs, reducing release cycles by **40%** through tighter product-engineering collaboration.
- Designed **PostgreSQL** schemas and tuned **query performance** for portfolio analytics workloads serving **50K+ monthly active sessions** with sub-200ms p95 API latency.
- Deployed **AWS-native services** (ECS, RDS, S3, CloudFront) with infrastructure-as-code, achieving **99.9% uptime** across production environments.
- Built **LLM-assisted** document summarization and classification features with **prompt versioning**, output validation, and **graceful fallback** when model confidence thresholds were not met.
- Established **OWASP-aligned secure coding** standards including encrypted data at rest, **RBAC access control**, and audit logging aligned with **GDPR** and **CCPA** requirements.
- Influenced **platform architecture** for event-driven microservices, introducing idempotent job processors that improved data pipeline reliability across ingestion and reporting domains.
- Mentored **three engineers** through pairing, architectural walkthroughs, and code reviews that raised team test coverage to **85%** and standardized PR quality gates.
- Drove **CI/CD modernization** with automated integration tests and staged rollouts, cutting production incident frequency by **35%** year over year.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **full stack trading operations dashboards** in **React** and **Node.js** services used by **200+ internal analysts** across global markets divisions.
- Implemented **REST and GraphQL APIs** connecting legacy mainframe data feeds to modern web clients while preserving **transaction integrity** and audit trails.
- Optimized **PostgreSQL** and Oracle-backed persistence layers, reducing batch reconciliation runtime by **30%** for daily risk reporting pipelines.
- Contributed to **cloud migration initiatives** on **AWS**, containerizing stateless services and hardening network segmentation for regulated financial workloads.
- Partnered with product and compliance stakeholders to ship features under **SOX** and **data residency constraints** without delaying quarterly release commitments.
- Introduced **automated testing** and pipeline gates in Jenkins-based **CI/CD**, catching regressions earlier and shrinking release verification time by **25%**.
- Participated in **architecture reviews** for service decomposition efforts, documenting API contracts and dependency maps that guided multi-year modernization roadmaps.
- Supported **on-call rotation** for production services, diagnosing latency spikes and implementing caching and connection-pooling fixes that restored SLA targets within hours.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React checkout and admin interfaces** integrated with **Node.js REST endpoints** for a restaurant technology platform used by **15+ pilot locations**.
- Wrote **unit and integration tests** with Jest and Cypress, increasing coverage for payment flows and reducing manual QA cycles before each sprint demo.
- Improved **PostgreSQL query patterns** for order history views, cutting page load times by **45%** on high-volume service periods.
- Collaborated with designers in **Figma handoffs** to implement responsive layouts and accessible form patterns consistent with brand guidelines.
- Participated in **code reviews** and documented API changes, helping onboard subsequent interns and maintain stable integration contracts.
- Deployed features to **AWS staging** via scripted releases, gaining hands-on experience with environment configuration and rollback procedures.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** with HTML, CSS, and JavaScript for nonprofit fundraising campaigns reaching **2,000+ donors** during launch windows.
- Integrated **third-party donation APIs** with client-side validation and server callbacks, ensuring reliable contribution tracking across payment providers.
- Configured **CMS templates** and asset pipelines so marketing stakeholders could publish updates without engineering involvement.
- Applied **accessibility and cross-browser testing** practices, resolving layout issues across mobile and desktop breakpoints before go-live.
- Coordinated with remote stakeholders through iterative demos, incorporating feedback within **two-day turnaround cycles** throughout the engagement.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Vue.js, TypeScript, JavaScript, HTML5, CSS3, responsive design, accessibility

Backend: Node.js, Golang, Express, REST APIs, GraphQL, microservices

Databases: PostgreSQL, ClickHouse, Redis, query optimization, schema design

Cloud & DevOps: AWS (ECS, RDS, S3, Lambda, CloudFront), Docker, Kubernetes, Terraform, CI/CD

Monitoring & Tools: Datadog, CloudWatch, Grafana, Jest, Cypress, Cursor, Claude Code

Workflow & PM: Agile, code reviews, mentorship, Jira, stakeholder collaboration, technical documentation
