PROFESSIONAL SUMMARY

Software engineer with 8+ years delivering production full stack systems across finance and SaaS. Owns work end-to-end—from unclear problem statements through design, build, ship, monitor, and iterate. Strong in TypeScript, React, .NET, SQL, and AWS/Azure. Uses AI-assisted development daily to increase velocity while maintaining code quality. Experienced in regulated environments, incident response, and mentoring engineers toward independent ownership.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led end-to-end delivery of a **client-facing investment portal** serving 12K+ users, owning architecture, implementation, release cadence, and on-call rotation for the platform domain
- Drove an **incremental rollout strategy** for payment and account workflows, shipping biweekly releases that unlocked revenue features without blocking downstream teams
- Built **TypeScript/React** frontends and **.NET Core APIs** backed by SQL services, establishing reusable patterns adopted across three product squads
- Introduced **AI-assisted development workflows** using Claude and Copilot, accelerating boilerplate and test scaffolding while publishing team guardrails for safe, consistent adoption
- Owned **observability and incident response** for production APIs, reducing mean time to recovery through distributed tracing, alert tuning, and structured runbooks
- Made **speed-vs-durability tradeoffs** on contested schema migrations, driving decisions with product and platform leads instead of deferring under ambiguity
- Mentored **two engineers** through pairing and review until they independently owned feature delivery across design, implementation, and production support
- Partnered with product and design to convert ambiguous **product briefs into scoped milestones**, pushing back when initiatives lacked measurable success criteria
- Hardened **authentication and audit logging** for regulated financial workflows, aligning engineering practices with compliance and security review requirements

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Served as **primary technical owner** for trade reporting pipeline enhancements processing 2M+ daily events across distributed .NET services
- Developed **TypeScript/React dashboards** surfacing operational metrics for desk analysts, replacing manual spreadsheet reconciliation cycles
- Designed **SQL schema changes** and migration plans for legacy banking systems under zero-downtime deployment constraints
- Operated **production services on Azure**, participating in incident bridges, root-cause analysis, and postmortem action tracking
- Automated **regulatory reporting workflows** that previously required manual intervention, improving data accuracy and audit readiness
- Collaborated with cross-functional stakeholders in **ambiguous, low-context settings**, defining acceptance criteria before engineering kickoff
- Contributed to **API integration layers** connecting internal platforms with third-party market data providers under strict SLA requirements

- Supported onboarding and **code review standards** for analyst cohorts, raising expectations for testing, documentation, and production readiness

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for inventory management UI deployed across multiple client warehouse environments
- Implemented **REST API consumers** in TypeScript with robust error handling and loading states aligned to design system specifications
- Wrote **unit and integration tests** covering critical checkout flows, increasing release confidence for weekly production deployments
- Participated in agile ceremonies and **paired with senior engineers** to ship features from ticket assignment through deployment
- Refactored legacy **JavaScript modules to TypeScript**, improving type safety and reducing recurring production defects

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for nonprofit fundraising campaigns using HTML, CSS, and JavaScript
- Integrated **third-party donation APIs** enabling secure payment capture for foundation fundraising events
- Optimized **page load performance** through asset minification and lazy loading, improving mobile engagement across campaign traffic
- Coordinated with stakeholders to **translate content requirements** into deployable site updates on tight event deadlines

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, React, JavaScript, HTML/CSS, Component Architecture, Responsive UI

Backend: C#, .NET Core, ASP.NET, REST APIs, Distributed Systems, Microservices

Databases: SQL Server, PostgreSQL, T-SQL, Schema Design, Query Optimization

Cloud & DevOps: AWS, Azure, CI/CD, Docker, GitHub Actions, Infrastructure as Code

Monitoring & Tools: Datadog, Application Insights, Distributed Tracing, Structured Logging, On-Call & Incident Response

Workflow & PM: Agile/Scrum, Jira, AI-Assisted Development, Code Review, Technical Mentorship, Cross-Functional Collaboration
