

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full-stack software engineer with 8+ years building production web applications, APIs, and data-intensive platforms in finance and enterprise environments. Combines React and Python backend expertise with integration of ML services, ETL workflows, and AI-assisted development tools. Proven end-to-end owner on cross-functional pods with product, data, and business stakeholders. Delivers scalable, observable systems through disciplined CI/CD, testing, and cloud-native deployment practices.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected **end-to-end web applications** connecting React dashboards to Python microservices, enabling portfolio teams to act on **analytics and model outputs** across core investment workflows.
- Built **RESTful APIs and FastAPI services** integrating feature stores and third-party ML endpoints, standardizing how downstream teams consume **predictive signals** in production.
- Designed **data ingestion and ETL pipelines** syncing warehouse tables to application caches, improving report freshness for **high-volume trading datasets** while preserving auditable lineage.
- Integrated **LLM-powered capabilities** including semantic document search and conversational assistants into internal tools, pairing retrieval workflows with **enterprise security guardrails**.
- Led **CI/CD and automated testing** across frontend and backend repositories on AWS, increasing deployment confidence for **mission-critical financial applications**.
- Partnered with product owners, data scientists, and business stakeholders to translate evolving requirements into **self-serve analytics experiences** validated through iterative usability reviews.
- Established **observability standards** with structured logging, metrics, and alerting for API latency and pipeline failures across **distributed production services**.
- Mentored engineers on **full-stack delivery practices**, code review discipline, and responsible use of **AI coding assistants** to accelerate implementation without eroding quality.
- Drove **technical design reviews** for scalable application patterns adopted across product squads, influencing shared **authentication, API versioning, and data access** conventions.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **production-grade internal platforms** on agile scrum teams supporting trade operations, regulatory reporting, and **client-facing analytics** across global banking divisions.
- Built **React and Angular interfaces** backed by Java and Python services, presenting complex risk and position data through dashboards for **executive and operations stakeholders**.
- Implemented **REST APIs and batch ETL jobs** moving data between legacy systems and modern storage layers, strengthening reliability for **regulatory reconciliation** processes.
- Collaborated with enterprise data engineers on **cloud-native integrations** and API gateways, enabling controlled consumption of curated datasets by **downstream application teams**.
- Contributed to **CI/CD pipeline hardening** and automated regression suites that reduced deployment risk across multiple release trains in a **regulated production environment**.
- Supported cross-functional initiatives during **model rollout efforts**, connecting analytical outputs to operator workflows and documenting **data contracts** for sustaining engineering.
- Championed **engineering quality practices** including peer review, technical documentation, and security-aware coding standards across **analyst rotations**.

- Resolved production incidents through **root-cause analysis** and monitoring improvements, restoring service levels for **time-sensitive market-hour applications**.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Shipped **full-stack features** for a document intelligence product using React and Node.js, improving onboarding flows used by **operations teams** during peak processing periods.
- Extended **REST API endpoints** and background jobs handling document ingestion, strengthening validation and error handling for **high-throughput uploads**.
- Participated in agile ceremonies and paired with senior engineers on **code reviews**, adopting patterns for testable service design and **incremental delivery**.
- Built internal tooling dashboards surfacing processing metrics, giving support teams **visibility into queue health** and failure trends.
- Assisted with **CI pipeline updates** and unit test coverage for critical modules ahead of major **release milestones**.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered a **responsive nonprofit web presence** with modern HTML, CSS, and JavaScript, supporting fundraising campaigns and **event registration** for community programs.
- Implemented CMS-friendly page templates and performance optimizations that improved **mobile load performance** for donor-facing content.
- Collaborated with stakeholders to refine content structure and accessibility, ensuring **WCAG-aligned navigation** across primary user journeys.
- Handled deployment and analytics integration, enabling leadership to track engagement during a **compressed launch timeline**.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Angular, Next.js, TypeScript, JavaScript, HTML5, CSS3, Redux, Material UI, Responsive Design

Backend: Python, FastAPI, Flask, Django, Node.js, RESTful APIs, GraphQL, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis, Snowflake, Data Warehousing

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, CI/CD, GitHub Actions

Monitoring & Tools: Datadog, Prometheus, Grafana, ELK Stack, Claude Code, Codex, AI-Assisted Development

Workflow & PM: Agile, Scrum, Jira, Confluence, Cross-functional Collaboration, Technical Documentation
