### PROFESSIONAL SUMMARY

---

Full-stack engineer with 8+ years building production web applications, REST APIs, and data-intensive platforms across financial services and enterprise SaaS. Skilled in React, Python (FastAPI, Django), and cloud-native AWS architecture with CI/CD and observability. Deliver end-to-end solutions from pipeline integration to stakeholder-facing dashboards, including LLM-powered features and AI-assisted development. Collaborative builder across product, data science, and engineering to ship secure, scalable systems.

### WORK EXPERIENCE

---

#### Software Engineer

May/2022 - May/2026

##### Aspen Capital

Remote | 10th Floor, New York

- Led development of **full-stack web applications** using React and Python (FastAPI) that delivered portfolio analytics and investment workflows to trading and research teams
- Built and maintained **RESTful APIs** and backend services processing high-volume market and reference data with consistent sub-second response performance
- Integrated **ML model endpoints** into production dashboards, enabling analysts to act on predictive outputs through intuitive self-serve interfaces
- Designed **data ingestion pipelines** and ETL workflows connecting third-party feeds, internal warehouses, and application feature stores
- Implemented **semantic search and document retrieval** capabilities over research filings and internal knowledge bases to accelerate analyst discovery
- Established **CI/CD pipelines** with automated testing, security scanning, and staged AWS deployments supporting reliable release cadence
- Adopted **AI coding assistants** as a core development workflow to accelerate iteration while upholding code review and quality standards
- Partnered with product owners and **cross-functional pods** to translate evolving requirements into usable analytics tools and workflow applications
- Improved **observability and reliability** through structured logging, metrics, and alerting that reduced mean time to diagnosis for production incidents

#### Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

##### Summer Analyst,

##### BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full-stack features** for capital markets platforms using React frontends and Java/Python microservices supporting trade lifecycle workflows
- Built and maintained **REST APIs** for pricing, risk, and reference data consumed by traders, operations, and downstream enterprise applications
- Created interactive **dashboards and reporting interfaces** surfacing warehouse analytics to business stakeholders across global markets teams
- Contributed to **data pipeline integrations** syncing batch feeds into relational stores and application services with validation and error handling
- Participated in **agile delivery** across cross-functional teams spanning technology, operations, and business analysis functions
- Implemented **automated test suites** and deployment workflows that improved release confidence for regulated production environments
- Supported **production reliability** through incident response, root-cause analysis, and performance tuning of data-intensive service endpoints

## Software Engineering Intern

Jun/2018 - May/2019

### Chexology

Remote | 17th Floor, New York

- Built **React and Node.js features** for a restaurant technology platform enabling digital check, payment, and order management workflows
- Developed **RESTful API integrations** between mobile clients, payment providers, and internal order management services
- Implemented **responsive UI components** and form workflows that improved usability for restaurant staff during peak service periods
- Wrote **unit and integration tests** supporting agile sprint delivery with product and design collaborators on a distributed team
- Participated in **code reviews** and documentation practices while resolving production defects in customer-facing web modules
- Contributed to **performance optimizations** in client-side rendering and API response handling for high-traffic checkout flows

## Web Developer

Sep/2017 - Nov/2017

### Bayesquare Foundation

Remote | New York

- Delivered a nonprofit **web presence** using HTML, CSS, and JavaScript with CMS-backed content management for program information
- Implemented **responsive layouts** and accessibility improvements across community program and donation pages
- Collaborated with stakeholders to **gather requirements** and iterate on site structure within a compressed project timeline
- Configured **hosting and deployment** for a lightweight public website with analytics tracking and basic SEO optimization

## EDUCATION

---

### New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

## SKILLS

---

**Frontend:** React, Angular, Next.js, TypeScript, JavaScript, HTML5, CSS3, Redux, Tailwind CSS

**Backend:** Python, FastAPI, Django, Flask, Node.js, REST APIs, GraphQL, Java, Microservices

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, Snowflake, Elasticsearch

**Cloud & DevOps:** AWS, Azure, Docker, Kubernetes, Terraform, CI/CD, GitHub Actions, Infrastructure as Code

**Monitoring & Tools:** Datadog, Prometheus, Grafana, Sentry, Git, Databricks, Claude, Cursor, AI-assisted development

**Workflow & PM:** Agile/Scrum, Jira, Confluence, Cross-functional collaboration, Technical documentation, Code review
