PROFESSIONAL SUMMARY

Full-stack software engineer with 8+ years building production systems across financial services, SaaS, and enterprise platforms. Own end-to-end delivery from React interfaces through Node.js APIs, database design, and cloud deployment. Ship AI-enabled features including RAG pipelines, agent workflows, and production guardrails. Experienced translating ambiguous requirements into secure, scalable software while collaborating with stakeholders across regulated environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **end-to-end delivery** of a client-facing portfolio analytics platform using **React**, **TypeScript**, and **Node.js**, owning UI architecture, API design, and **AWS** deployment pipelines serving 200+ internal users.
- Built production **RAG-powered** document search and summarization features with **vector embeddings**, **PostgreSQL/pgvector**, and structured prompting, reducing research time for investment teams by an estimated 40%.
- Designed **agent-style workflows** with tool-calling, eval harnesses, and **guardrails** for PII-aware handling of financial documents, maintaining audit trails and RBAC across multi-tenant access patterns.
- Shipped **Next.js** dashboards and REST services integrated with **Redis** caching and real-time market data feeds, hardening for reliability under peak trading-window traffic.
- Owned **CI/CD** configuration including environment secrets, staged rollouts, and automated test gates, cutting release cycles from weeks to days while preserving production stability.
- Prototyped AI features rapidly using **LLM-assisted development** workflows, then refactored for cost control, latency budgets, and security review before client-facing release.
- Collaborated directly with portfolio managers and operations stakeholders to clarify ambiguous requirements, present architectural trade-offs, and unblock delivery without escalation.
- Implemented **OAuth/RBAC** authentication, encrypted secrets management, and structured logging for compliance-ready systems in a regulated investment environment.
- Mentored junior contractors on **full-stack patterns**, code review standards, and test coverage expectations, raising team throughput on parallel feature streams.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **internal trade reporting tools** using **JavaScript**, **React**, and **Java/Spring Boot** services backed by **SQL Server**, supporting daily operations for 50+ analysts across global markets desks.
- Built RESTful APIs and batch processing jobs for **regulatory reporting workflows**, improving data validation accuracy and reducing manual reconciliation effort across cross-border teams.
- Contributed to **CI/CD pipeline** improvements and deployment automation on enterprise infrastructure, shortening release windows for critical risk-management applications.
- Implemented **role-based access controls** and audit logging for sensitive financial data systems aligned with banking compliance standards and internal security policies.
- Partnered with business analysts to translate functional specs into production-ready features, delivering iteratively in two-week sprint cycles across distributed teams.
- Optimized database queries and caching strategies for **high-volume transaction reporting**, improving batch job completion times during month-end processing peaks.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React** and **Node.js** features for a restaurant check-tracking SaaS platform used by hospitality clients, contributing to payment reconciliation and venue analytics modules.
- Developed REST APIs integrated with third-party POS systems, implementing error handling and retry logic for **reliable data sync** across distributed restaurant locations.
- Wrote unit and integration tests with **Jest** and improved CI test coverage for core billing workflows, catching regressions before production releases.
- Collaborated with product and design teams in remote sprint ceremonies to deliver UI improvements aligned with customer feedback from pilot deployments.
- Refactored legacy JavaScript components to **TypeScript**, improving type safety and reducing production bugs in checkout and reporting flows.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed responsive **HTML/CSS/JavaScript** web pages for nonprofit digital campaigns, improving mobile accessibility and page load performance for fundraising initiatives.
- Integrated third-party donation APIs and analytics tracking, enabling campaign stakeholders to monitor **engagement metrics** in real time.
- Maintained content management workflows and cross-browser compatibility fixes for organization websites serving community outreach programs.
- Collaborated with remote stakeholders to implement design revisions under tight launch deadlines for seasonal awareness campaigns.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Responsive UI

Backend: Node.js, Express, NestJS, REST APIs, GraphQL, Microservices, Java/Spring Boot

Databases: PostgreSQL, Redis, Vector Stores (pgvector, Pinecone), SQL Server

Cloud & DevOps: AWS, GCP, Docker, CI/CD, GitHub Actions, Vercel, Secrets Management

Monitoring & Tools: Datadog, Sentry, Structured Logging, LLM Tooling (Cursor, Copilot), Jest

Workflow & PM: Agile/Scrum, Jira, Confluence, Cross-functional Collaboration, Technical Documentation
