

Ryan Cho

Senior Full-Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full-stack engineer with 8+ years delivering production web platforms, data-intensive applications, and API-backed services across finance and SaaS. Led end-to-end ownership from React dashboards and workflow UIs through Python microservices, ETL integrations, and cloud deployments. Integrates ML and LLM capabilities into user-facing products with strong emphasis on reliability, security, and cross-functional delivery with product, data, and platform teams.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned **end-to-end delivery** of investor-facing analytics portal using **React**, **TypeScript**, and **FastAPI** services, enabling portfolio teams to act on model outputs across **12+ fund strategies**.
- Designed **RESTful APIs** and event-driven workflows connecting front-end applications to **feature stores** and ML inference endpoints, reducing manual reconciliation effort by **35%**.
- Built **RAG-backed document search** and conversational interfaces over internal research corpora, improving analyst retrieval time for due-diligence materials by **40%**.
- Implemented **CI/CD pipelines** with automated testing, security scanning, and staged releases on **AWS**, sustaining **99.9% uptime** for production SaaS workloads.
- Partnered with data scientists to translate model outputs into **self-serve dashboards** and approval workflows, increasing stakeholder adoption of quantitative signals by **2x**.
- Developed **ETL integrations** and batch ingestion jobs syncing market and alternative data into application data layers, processing **5M+ records nightly** with validation gates.
- Established engineering standards for **AI-assisted development**, code review, and documentation while mentoring **3 engineers** on full-stack patterns and observability practices.
- Integrated **semantic search** and agent-style automation into operational tools using vector stores and orchestration layers, cutting repetitive task handling across ops teams.
- Led technical design reviews across platform, security, and product groups for **enterprise-ready** authentication, audit logging, and role-based access patterns.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **full-stack trading support applications** using **Angular** and **Python/Django** services for fixed-income desks, supporting **200+ daily users** across global markets.
- Built **RESTful APIs** exposing risk metrics and position data to internal dashboards, standardizing data access patterns used by **4 downstream teams**.
- Designed **data pipeline integrations** ingesting market feeds and reference data into operational databases with reconciliation checks and alerting.
- Collaborated with quants and business analysts to ship **interactive analytics views** that surfaced model outputs for credit and rates workflows.
- Implemented **automated test suites** and deployment automation for microservices on **Azure**, improving release confidence and reducing regression incidents by **25%**.
- Authored service documentation and runbooks for **on-call reliability**, shortening incident triage time for production API failures.
- Contributed to cross-team architecture sessions on **scalable API design**, caching, and secure service-to-service communication for regulated environments.

- Migrated legacy reporting modules to modular **React** components with shared design patterns, accelerating feature delivery for compliance reporting.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React** features for check-processing workflows, improving operator throughput on verification screens.
- Built **Python Flask** endpoints supporting inventory and audit APIs used by internal operations tools.
- Wrote unit and integration tests for backend services, raising coverage on critical payment paths to **80%**.
- Participated in agile ceremonies and paired with senior engineers on **code reviews** and deployment checklists.
- Refactored legacy UI components for accessibility and responsive layouts across tablet deployments.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Implemented responsive **web pages** and CMS-driven content updates for foundation outreach programs.
- Integrated third-party donation and newsletter forms with **JavaScript** validation and analytics hooks.
- Optimized page load performance through asset bundling and image compression, improving Lighthouse scores by **20%**.
- Collaborated with nonprofit stakeholders to iterate on public-facing information architecture and publishing workflows.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Angular, TypeScript, Next.js, HTML5, CSS3, Redux, Material UI, Responsive Design

Backend: Python, FastAPI, Django, Flask, Node.js, RESTful APIs, GraphQL, Microservices

Databases: PostgreSQL, MySQL, Redis, MongoDB, Vector Stores, SQL Optimization

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, CI/CD, GitHub Actions

Monitoring & Tools: Datadog, Prometheus, Grafana, ELK Stack, Sentry, OpenTelemetry

Workflow & PM: Agile/Scrum, Jira, Confluence, Cross-functional Delivery, Technical Documentation
