

Ryan Cho

Full-Stack AI Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full-stack software engineer with 8+ years delivering production web applications and data-intensive platforms across finance and SaaS. Experienced building React and Python services, RESTful APIs, ETL pipelines, and CI/CD workflows for enterprise stakeholders. Integrates LLM features, RAG workflows, and AI-assisted development tools into scalable, observable systems. Collaborates with product, data science, and engineering teams to ship end-to-end solutions from ingestion to user-facing analytics.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led end-to-end design of **full-stack analytics applications** connecting React dashboards to Python APIs serving portfolio and risk data for **investment teams across 12+ business units**.
- Architected **RESTful microservices** with FastAPI and Django handling high-volume trade and reference data, improving API consistency and reducing integration defects across downstream consumers.
- Built **ETL ingestion pipelines** synchronizing market feeds, custodian files, and internal warehouses, establishing data quality checks that improved downstream reporting reliability.
- Integrated **LLM-powered semantic search** and document understanding into internal research tools, enabling analysts to query unstructured filings through **RAG-backed conversational interfaces**.
- Deployed **CI/CD pipelines** with automated testing, security scanning, and observability hooks on **AWS**, supporting frequent releases without degrading production stability.
- Partnered with data scientists to operationalize model outputs via **model-serving APIs**, translating analytical results into actionable portfolio management workflows.
- Championed **AI-assisted engineering** using Claude Code and Codex-style tooling, accelerating delivery while maintaining code review rigor and documentation standards.
- Mentored engineers on **cross-layer ownership** spanning frontend state management, backend service design, and pipeline reliability for platform-scale features.
- Designed **self-serve analytics dashboards** with React and TypeScript, applying product thinking to improve usability for non-technical stakeholders.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **production-grade web applications** and internal tooling supporting trading, risk, and operations teams across global markets infrastructure.
- Built **RESTful backend services** in Python and Java integrating custody, settlement, and market data systems used by cross-functional analyst pods.
- Implemented **data pipeline integrations** connecting upstream feeds to internal lakehouse-style storage, improving timeliness of regulatory and client reporting datasets.
- Designed **React-based operational dashboards** surfacing batch job health, exception queues, and SLA metrics for technology and business stakeholders.
- Contributed to **CI/CD automation** and deployment pipelines for cloud-hosted services, strengthening release discipline across distributed engineering teams.
- Collaborated with enterprise data engineers on **ETL workflows** and schema contracts, reducing reconciliation errors between source systems and analytics layers.
- Supported **agile delivery** across product, compliance, and engineering partners, translating ambiguous requirements into secure, auditable software increments.

- Established **monitoring and alerting** patterns for mission-critical services, improving incident detection and mean time to recovery during market-hours operations.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **full-stack features** for a hospitality SaaS platform using React and Node.js, supporting real-time check tracking for restaurant partners.
- Developed **RESTful API endpoints** for mobile and web clients, improving data consistency across order and payment workflows.
- Implemented **automated test suites** and CI workflows, raising confidence in weekly releases for a small cross-functional product team.
- Collaborated with designers and product owners to refine **user-facing dashboards**, improving clarity of operational metrics for venue managers.
- Integrated third-party **payment and notification services**, hardening error handling and retry logic for production traffic.
- Participated in **code reviews** and documentation updates, contributing to engineering standards during platform growth.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered **responsive web pages** and CMS-driven content for a nonprofit foundation site, improving accessibility and mobile engagement.
- Implemented **JavaScript enhancements** for donation flows and event registration, reducing form abandonment through clearer validation feedback.
- Configured **deployment pipelines** and staging environments, enabling faster content updates for marketing stakeholders.
- Collaborated with distributed volunteers on **HTML, CSS, and PHP** maintenance, keeping legacy pages consistent with brand guidelines.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Angular, TypeScript, Next.js, JavaScript, HTML/CSS, Redux, responsive UI design

Backend: Python, FastAPI, Django, Flask, Node.js, RESTful APIs, microservices

Databases: PostgreSQL, MySQL, Redis, SQL, data warehousing concepts

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD, Terraform, GitHub Actions

Monitoring & Tools: Datadog, Grafana, Prometheus, observability, AI coding tools (Claude Code, Codex, Copilot)

Workflow & PM: Agile/Scrum, Jira, cross-functional delivery, technical documentation, code review
