

Ryan Cho

Senior Full-Stack Software Engineer | AI & Data Platforms

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Senior full-stack engineer with 9 years building production web applications, APIs, and data-intensive platforms across finance and SaaS. Designs solutions spanning React frontends, Python backends, and cloud services, integrating ML endpoints, semantic search, and analytics into scalable products. Collaborates with product, data science, and business stakeholders in agile delivery while using AI-assisted development to ship reliable, enterprise software with testing and observability.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned **end-to-end architecture** for investor-facing web applications and **REST APIs** delivering portfolio analytics, underwriting workflows, and reporting dashboards used across distributed deal teams.
- Built **React** dashboards and self-serve analytics experiences that translated **model outputs** and portfolio metrics into actionable views, shortening investment review cycles for stakeholders.
- Developed **Python (FastAPI/Flask)** services connecting applications to **data pipelines**, feature stores, and **ML model endpoints**, enabling dependable scoring and recommendation flows in production.
- Integrated **LLM-powered capabilities** including semantic search, document understanding, and conversational assistants into internal platforms with evaluation gates suited for enterprise use.
- Designed **RAG pipelines** and ingestion workflows to synchronize application state with document repositories and agent memory systems, improving retrieval quality for research and diligence workflows.
- Implemented **CI/CD pipelines**, automated testing, and **observability** across services on **AWS**, sustaining high release velocity while maintaining production stability.
- Partnered with **product owners**, data engineers, and data scientists on cross-functional pods to scope requirements, lead technical reviews, and align frontend usability with analytical deliverables.
- Adopted **AI coding assistants** as a core development multiplier, establishing review and testing standards that preserved code quality on AI-generated implementations.
- Mentored engineers on **full-stack patterns**, API design, and secure service boundaries while contributing to documentation, code review, and production readiness standards.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **production web applications** and **RESTful services** supporting trading, risk, and operations workflows across global capital markets technology teams.
- Built **React** and Angular interfaces for data-intensive dashboards surfacing market, position, and regulatory datasets to analysts and portfolio managers.
- Developed **Python** and Java-backed APIs integrating applications with **ETL pipelines**, reference data stores, and downstream reporting systems in a regulated banking environment.
- Contributed to **system design** and technical reviews for scalable, secure services handling high-throughput financial data with strict reliability requirements.
- Collaborated with **cross-functional squads** in agile delivery, translating business requirements into iterative releases that improved workflow efficiency for front-office users.
- Implemented automated testing, **CI/CD workflows**, and monitoring hooks that increased deployment confidence and reduced incident response time for production services.
- Supported **data platform integrations** connecting frontend experiences to warehouse extracts and analytics endpoints, enabling self-serve access to curated datasets.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React** components and internal web tools supporting restaurant compliance workflows within a production codebase used by operations teams.
- Developed **REST API** integrations between frontend applications and backend services, enabling reliable data capture and validation across mobile and web clients.
- Assisted with **Python** service enhancements and database queries that improved reporting accuracy for customer-facing compliance features.
- Participated in **agile sprints**, code reviews, and QA cycles, shipping incremental improvements with attention to usability and maintainability.
- Documented API contracts and component behavior to accelerate onboarding and reduce handoff friction for full-time engineers.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** and UI components for a nonprofit foundation site using modern **JavaScript** and HTML/CSS standards.
- Implemented client-side integrations with **REST endpoints** to display dynamic program content and donation workflows for site visitors.
- Collaborated with stakeholders to refine layouts and accessibility, ensuring content remained maintainable for non-technical editors.
- Supported deployment and performance tuning for a lightweight **remote** web presence during a focused delivery window.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Angular, Next.js, TypeScript, JavaScript, HTML/CSS, Data Visualization, Responsive UI

Backend: Python (FastAPI, Flask, Django), REST APIs, Node.js, Microservices, GraphQL

Databases: PostgreSQL, MySQL, Redis, MongoDB, Data Warehousing, Lakehouse Concepts

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD, Terraform, GitHub Actions

Monitoring & Tools: Datadog, Prometheus, Grafana, ELK Stack, Sentry, AI Coding Assistants (Claude, Codex)

Workflow & PM: Agile/Scrum, Jira, Confluence, Cross-functional Collaboration, Technical Documentation
