PROFESSIONAL SUMMARY

Senior full-stack engineer with 8+ years building React/TypeScript and Python services for data-heavy SaaS workflows. Owns outcomes from API design through accessible UIs, partnering with Product and Design to scope increments, write RFCs, and ship reliable features. Raises engineering standards through testing, observability, and mentorship across distributed teams.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Delivered **end-to-end full-stack features** across React/TypeScript clients and Python services, landing scoped increments that accelerated portfolio reporting workflows for investment teams.
- Designed **REST API contracts** and evolved relational schemas with backward-compatible migrations, keeping data models aligned as business rules grew in complexity.
- Built **background job pipelines** with idempotent retries and failure isolation, improving batch settlement reliability across nightly processing windows.
- Partnered with Product and Design from discovery to release, drafting **lightweight RFCs** that clarified trade-offs and tightened milestone scope before development.
- Strengthened **UI accessibility and error-handling** patterns in shared component libraries, giving operators clearer recovery paths during partial service disruptions.
- Introduced **testing and observability hooks** spanning Jest unit coverage and Cypress regression flows, supporting trunk-based releases with feature-flag rollouts.
- Tuned **PostgreSQL queries** and introduced Redis caching for read-heavy endpoints, reducing p95 API latency on reporting surfaces used across the firm.
- Mentored engineers through **architecture reviews** and pairing, propagating conventions for state management, API versioning, and resilient client-server contracts.
- Collaborated with operations and support on **production investigations**, converting recurring UX friction into durable fixes and clearer monitoring signals.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Shipped **internal web applications** supporting trading and risk workflows, translating analyst requirements into stable releases across a regulated engineering environment.
- Developed **Python and JavaScript services** integrated with enterprise data stores, enabling analysts to access normalized market and position data faster.
- Contributed to **REST API integrations** between front-office tools and middle-office reporting systems, reducing manual data exports across teams.
- Improved **SQL query performance** on high-volume reporting tables, shortening refresh cycles for desk-level dashboards.
- Participated in **code reviews** and release governance, helping enforce testing standards before production deployments.
- Built **React dashboards** with responsive layouts for portfolio metrics, giving stakeholders earlier visibility into exposure trends.
- Supported **incident triage** and root-cause analysis alongside operations, documenting fixes that prevented repeat production regressions.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React components** for receipt and compliance workflows, improving form validation and reducing incomplete submissions from venue staff.
- Extended **Node.js APIs** backing mobile capture features, adding endpoints that streamlined checklist state synchronization.
- Wrote **unit tests** for critical parsing utilities, catching edge cases in OCR-normalized receipt data before release.
- Collaborated with senior engineers on **database schema updates**, supporting migration scripts for new compliance fields.
- Resolved **front-end bugs** across device breakpoints, keeping tablet-first experiences consistent for on-site users.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** for nonprofit program content, improving mobile readability for community outreach campaigns.
- Integrated **CMS templates** with custom CSS layouts, enabling faster publishing cycles for seasonal fundraising updates.
- Configured **analytics and form tracking** on donation flows, giving stakeholders clearer insight into visitor engagement.
- Maintained **cross-browser compatibility** fixes across legacy browsers used by partner organizations.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, Vite, Webpack, Jest, Cypress, HTML/CSS, Accessible UI, State Management

Backend: Python, Django, REST APIs, Background Jobs, Node.js, GraphQL, API Design, RBAC

Databases: PostgreSQL, Redis, SQL, Schema Migrations, Query Tuning, Relational Modeling

Cloud & DevOps: AWS, Kubernetes, Docker, CI/CD, Feature Flags, Linux

Monitoring & Tools: Observability, Logging, OpenAI API, Kafka, Git, Code Review

Workflow & PM: RFC/PRD Writing, Product Partnership, Agile Delivery, Mentorship, Trunk-Based Development
