

Ryan Cho

Senior Software Engineer | Full-Stack & AI-Enabled Platforms

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> ·
<https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software engineer with 7+ years building full-stack, cloud-native platforms in financial services and enterprise SaaS. Skilled in C#, .NET, Azure serverless, SQL, and JavaScript, with experience integrating third-party APIs and embedding AI-assisted workflows into delivery. Known for owning complex integrations end-to-end, mentoring engineers on testing and secure coding, and collaborating across teams to ship scalable, maintainable solutions with autonomy.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected **RESTful API integrations** connecting portfolio management systems with external custodian and banking platforms, processing **15K+ daily transactions** with automated reconciliation and exception handling.
- Built **Azure Functions and Service Bus** event-driven pipelines for document ingestion, validation, and routing, reducing manual processing effort by **40%** across operations workflows.
- Championed team-wide adoption of **AI-assisted coding tools** including Cursor and GitHub Copilot, establishing review guardrails that accelerated delivery without compromising production quality standards.
- Designed **.NET microservices** with comprehensive unit and integration test suites, enabling **CI/CD deployments** to Azure App Services through zero-downtime blue-green release patterns.
- Delivered full-stack **Blazor and JavaScript** reporting features for client-facing SaaS dashboards, partnering with product stakeholders to translate regulatory requirements into intuitive user experiences.
- Provisioned cloud infrastructure using **Terraform modules** for Azure Storage, Event Grid, and App Services, standardizing environment setup across development, staging, and production tiers.
- Mentored **two junior engineers** on secure coding, extensible API design, and test-driven development, improving pull-request quality and lowering recurring production defects.
- Defined **third-party data mapping** and versioning strategies for partner-facing integrations, ensuring backward-compatible API evolution as external platform requirements changed.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **C# and .NET backend services** supporting fixed-income trade lifecycle workflows, serving **high-volume REST API** traffic with structured logging and resilient error handling.
- Engineered integration layers between internal risk platforms and **external vendor APIs**, building data transformation pipelines that normalized heterogeneous feeds into unified SQL schemas.
- Contributed to **microservices decomposition** of monolithic reporting applications, extracting independently deployable services backed by contract-based integration tests.
- Automated release workflows through **Azure DevOps CI/CD pipelines** with unit test and static analysis gates, reducing deployment-related rollbacks across **12 production services**.
- Collaborated with business analysts during **agile ceremonies** to refine user stories, estimate technical complexity, and deliver incremental platform enhancements each sprint.
- Improved observability by instrumenting distributed components with **centralized logging and alerting**, cutting mean time to diagnosis for cross-team production incidents.
- Authored **API documentation and operational runbooks** for maintainable handoffs, enabling downstream teams to extend banking integrations without disrupting core workflows.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React and JavaScript** UI components for a restaurant inventory platform, improving checkout responsiveness for **50+ daily active users** across mobile and desktop clients.
- Implemented **Node.js REST endpoints** for mobile check scanning features, persisting validated receipt data in PostgreSQL with schema migrations and input sanitization.
- Added **unit and integration tests** for critical API paths, contributing to broader team adoption of automated testing within the continuous integration pipeline.
- Participated in code reviews and paired programming sessions focused on **scalable API design**, gaining practical experience with modular web application architecture.
- Diagnosed and resolved defects in **payment reconciliation flows**, introducing logging improvements that reduced recurring support tickets tied to duplicate charge handling.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed responsive **HTML, CSS, and JavaScript** pages for a nonprofit foundation website, ensuring cross-browser compatibility and baseline accessibility compliance.
- Integrated **third-party donation APIs** into the web platform, enabling secure online payment processing for seasonal fundraising campaigns.
- Collaborated with designers to implement **content management workflows**, allowing non-technical staff to update site sections without developer assistance.
- Improved page performance through **asset minification and caching**, raising Lighthouse performance scores on primary landing pages.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: JavaScript, TypeScript, React, Blazor, HTML5, CSS3, Responsive Web Design

Backend: C#, .NET 8, ASP.NET Core, Node.js, RESTful APIs, Microservices, Serverless Architecture

Databases: Microsoft SQL Server, PostgreSQL, Entity Framework, T-SQL, Data Mapping & ETL

Cloud & DevOps: Azure (Functions, App Services, Service Bus, Event Grid, Storage), Terraform, Azure DevOps, CI/CD, Docker

Monitoring & Tools: Application Insights, Structured Logging, Git, GitHub Copilot, Cursor, Claude Code

Workflow & PM: Agile/Scrum, Jira, Technical Documentation, Cross-functional Collaboration, Mentorship
