

Ryan Cho

Senior Software Engineer | Full Stack

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Senior software engineer with 8+ years building production full-stack platforms across fintech and capital markets. Deep expertise in TypeScript, React, and cloud-native services supporting high-throughput, low-latency workloads. Designs distributed APIs, event-driven pipelines, and optimized PostgreSQL schemas. Owns reliability through automated testing, observability, tracing, and on-call response. Partners with product and platform teams to raise engineering standards and ship resilient features safely.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led design and delivery of **full-stack TypeScript and React** applications supporting portfolio operations, reducing manual reconciliation effort across investment teams through **automated workflow tooling**
- Architected **REST and GraphQL APIs** on Node.js services handling concurrent request spikes during market hours, with **schema versioning** and backward-compatible rollout patterns
- Implemented **event-driven integration** using message queues to synchronize position updates across downstream analytics and reporting systems with **eventual consistency** safeguards
- Drove **PostgreSQL schema design**, indexing strategy, and query tuning that cut p95 read latency on portfolio dashboards during high-volume reporting windows
- Established **cloud-native deployment pipelines** with staged rollouts, health checks, and rollback automation to maintain uptime during frequent releases
- Embedded **automated testing and CI gates** across unit, integration, and contract suites, catching regressions before production and strengthening team confidence in rapid iteration
- Owned **observability standards** including structured logging, distributed tracing, and service-level metrics used in weekly reliability reviews and on-call triage
- Partnered with product and engineering leads to define **coding standards and reusable platform patterns** adopted across three feature squads
- Mentored engineers on **API design, frontend performance, and operational ownership**, accelerating delivery quality for junior and mid-level contributors

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built and maintained **Java and TypeScript services** powering trade lifecycle workflows for fixed income desks, ensuring **data integrity** across upstream booking systems
- Developed **REST APIs** exposing market and position data to internal React dashboards used by traders and operations analysts across global offices
- Designed **SQL Server and PostgreSQL** data models with migration tooling, indexing plans, and stored procedure optimization for regulatory reporting pipelines
- Contributed to **distributed reconciliation services** that processed nightly batch workloads, incorporating **idempotency controls** and retry logic for transient failures
- Implemented **integration layers** connecting legacy mainframe feeds to modern microservices through **message-driven transformation** pipelines
- Supported **production incident response** as on-call engineer, using metrics dashboards and log correlation to isolate failures and restore service within SLA windows
- Partnered with cross-functional stakeholders to translate **complex trading requirements** into maintainable technical designs reviewed by architecture forums

- Automated **integration and regression test coverage** for critical settlement paths, reducing manual validation effort ahead of release cutovers
- Participated in **secure SDLC practices** including code review, vulnerability remediation, and access-control audits for customer-facing financial systems

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React and Node.js features** for restaurant compliance tooling, improving staff workflow for daily checklist completion
- Built **REST API endpoints** connecting mobile clients to backend services with input validation and structured error handling
- Wrote **unit and integration tests** for payment and order modules, helping the team catch defects earlier in the release cycle
- Assisted senior engineers in **PostgreSQL query optimization** and schema updates supporting new reporting requirements
- Participated in **code reviews and agile ceremonies**, learning team patterns for feature delivery and deployment hygiene
- Resolved **frontend rendering and state-management bugs** across supported browsers, stabilizing customer-facing screens

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered **responsive web pages** for nonprofit program sites using HTML, CSS, and JavaScript with cross-browser compatibility
- Integrated **third-party donation widgets** and form handlers, ensuring reliable submission flow for fundraising campaigns
- Optimized **page load performance** through asset minification and image compression across content-heavy landing pages
- Collaborated with stakeholders to implement **content updates and layout revisions** within short nonprofit launch timelines
- Maintained **version-controlled codebase** and basic deployment workflows supporting volunteer content editors

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Redux, Webpack, Responsive UI

Backend: Node.js, TypeScript, GraphQL, REST, Java, Event-Driven Architecture, Message Queues

Databases: PostgreSQL, SQL Server, Schema Design, Migrations, Indexing, Query Optimization

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform, Cloud-Native Deployments

Monitoring & Tools: Datadog, Prometheus, Grafana, ELK Stack, OpenTelemetry, Jest, Cypress

Workflow & PM: Agile/Scrum, Jira, Confluence, Cross-Functional Collaboration, Technical Documentation
