

Ryan Cho

Senior Full Stack Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Senior full stack engineer with 8+ years building scalable web platforms across financial services and SaaS. Expert in Java/Spring services, React and modern front-end architecture, and API design across REST and GraphQL. Led cross-functional delivery from schema design through CI/CD, mentored engineers through complex migrations, and partnered with product, design, and data teams to ship performant, maintainable systems at scale.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected **full-stack investment management platform** using Java/Spring Boot and React, enabling portfolio teams to manage **\$2B+ in assets** through unified dashboards and workflow automation.
- Designed and implemented **RESTful and GraphQL APIs** with optimized PostgreSQL schemas, reducing average query latency by **40%** through indexing, caching, and connection pooling strategies.
- Led **frontend framework modernization** from legacy Angular to React/Next.js, establishing component libraries and state management patterns adopted by **three engineering teams**.
- Established **CI/CD pipelines** with Docker and Kubernetes on GCP, cutting deployment cycles from days to hours while maintaining **99.9% uptime** across production services.
- Mentored **four junior and mid-level engineers** through code reviews, architecture sessions, and pairing, raising team velocity and on-time delivery rates.
- Partnered with product and design to translate requirements into **technical specifications**, delivering responsive UI components and accessible interfaces for stakeholder-facing workflows.
- Implemented **automated testing strategy** spanning unit, integration, and end-to-end suites, increasing code coverage to **85%** and reducing regression incidents in production.
- Collaborated with data engineering and analytics teams to integrate **real-time data pipelines** and reporting APIs, supporting executive dashboards and regulatory reporting needs.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **enterprise trading and risk management applications** on Java/Spring microservices architecture, processing **millions of transactions daily** across global markets operations.
- Built **responsive React frontends** for internal banking tools, implementing state management and reusable component patterns that accelerated feature delivery across **five product squads**.
- Architected **database schemas and API layers** for regulatory reporting systems, ensuring data integrity and auditability for compliance with financial industry standards.
- Optimized **application performance** by profiling JVM bottlenecks, implementing Redis caching, and refactoring critical paths to reduce API response times by **35%**.
- Contributed to **technical architecture decisions** for platform modernization initiatives, evaluating framework options and guiding migration from monolithic to service-oriented design.
- Mentored **summer analysts and incoming technology analysts** on coding standards, Git workflows, and full-stack development practices within agile delivery teams.
- Implemented **automated deployment pipelines** using Jenkins and containerization, standardizing release processes across development, staging, and production environments.
- Collaborated cross-functionally with business analysts and operations teams to define **technical requirements** and deliver features supporting capital markets workflows.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React-based customer portal features** for receipt and checklist management, improving user task completion rates through intuitive UI flows.
- Developed **REST API integrations** between frontend and Node.js backend services, enabling real-time synchronization of restaurant compliance data.
- Implemented **unit and integration tests** for critical user journeys, contributing to more reliable releases during agile sprint cycles.
- Participated in **code reviews and pair programming** sessions, learning modern web development practices and Git-based collaborative workflows.
- Optimized **database queries and API endpoints** for reporting modules, reducing page load times for operations teams monitoring venue compliance.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for nonprofit fundraising campaigns using HTML, CSS, and JavaScript, supporting donor engagement across desktop and mobile devices.
- Integrated **third-party payment APIs** into donation flows, enabling secure online contributions with confirmation and receipt generation.
- Maintained **content management workflows** and performed cross-browser testing to ensure consistent rendering for foundation stakeholders.
- Collaborated with program staff to translate **business requirements** into functional web features delivered within tight nonprofit project timelines.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, Angular, Vue.js, TypeScript, JavaScript, HTML5, CSS3, Redux, Responsive UI, Component Architecture

Backend: Java, Spring Boot, Spring MVC, Node.js, REST APIs, GraphQL, gRPC, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis, Database Schema Design, Query Optimization, Caching Strategies

Cloud & DevOps: GCP, Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions, Container Orchestration

Monitoring & Tools: Prometheus, Grafana, Application Performance Monitoring, Git, JUnit, Selenium, Postman

Workflow & PM: Agile/Scrum, Technical Leadership, Code Review, Jira, Confluence, Cross-functional Collaboration
