

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with 8+ years building scalable, consumer-facing web applications across finance and investment platforms. Deep expertise in React, JavaScript, and component-driven UI architecture coupled with object-oriented backend services, REST APIs, and data modeling. Collaborates with product, design, and engineering stakeholders to deliver reliable features for growing user bases while mentoring teams and improving front-end and back-end engineering practices.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led design and delivery of a **React-based investor portal** serving 12,000+ monthly active users, replacing legacy views and improving completion rates across portfolio management workflows.
- Architected **modular front-end systems** with TypeScript and shared component libraries that reduced duplicate UI code by 35% and accelerated feature delivery across three product squads.
- Built **RESTful APIs and service layers** in Node.js and Java integrating portfolio, reporting, and compliance backends while sustaining 99.9% uptime during peak trading cycles.
- Partnered with **product managers and non-technical stakeholders** to translate evolving requirements into iterative releases, shipping 40+ production features on two-week sprint cadences.
- Optimized **client-side performance** through code splitting, lazy loading, and caching strategies that cut initial page load times by 45% on data-heavy dashboard screens.
- Established **front-end testing standards** with Jest, React Testing Library, and Cypress, increasing regression coverage to 82% and reducing post-release defects by 30%.
- Mentored **four engineers** on React patterns, API contracts, and code review practices, lifting squad throughput while maintaining consistent quality across the codebase.
- Drove **cross-functional technical reviews** with security and infrastructure teams to harden authentication flows and align deployments with CI/CD pipelines on AWS.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **large-scale trading and operations dashboards** in React and JavaScript used by 200+ analysts across global markets desks, surfacing real-time risk data from complex backend systems.
- Engineered **object-oriented Java microservices** processing high-volume market feeds, applying data structures and algorithmic optimizations to sustain sub-second response times under peak load.
- Collaborated with **cross-functional teams** including quants, operations, and compliance to deliver regulatory reporting features across five business units within compressed release windows.
- Implemented **reusable UI components** and state management patterns that standardized client-side development and shortened onboarding for new front-end contributors by three weeks.
- Integrated **REST and messaging interfaces** connecting browser applications to distributed backend services, improving data consistency across trader-facing workflows spanning 12 internal platforms.
- Presented **technical solution designs** to senior stakeholders and non-technical partners, clarifying architectural tradeoffs and securing alignment before major platform upgrades.
- Contributed to **code reviews and engineering guild sessions** that raised adherence to coding standards, unit testing practices, and performance guidelines across a 15-person technology group.
- Supported **production incident response** for mission-critical web applications, diagnosing client and server issues to restore services within SLA targets and document preventive fixes.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **JavaScript and React features** for a consumer check-management web application, enabling users to track deposits and transaction history through an intuitive browser interface.
- Developed **REST API integrations** between the front end and Ruby on Rails services, ensuring reliable data flow for account and payment workflows across 8 core user screens.
- Wrote **unit and integration tests** validating UI behavior and API contracts, contributing to a 25% reduction in regression issues during active product iteration cycles.
- Collaborated with **senior engineers and designers** in agile sprints, implementing responsive layouts and accessible components for mobile and desktop users.
- Refactored **legacy AngularJS modules** toward modern React patterns, reducing technical debt in shared components used across customer-facing screens.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered **responsive web pages** with HTML, CSS, and JavaScript for a nonprofit research platform, supporting content publishing for distributed contributor teams.
- Implemented **client-side form validation and dynamic layouts** that improved data capture accuracy for program intake workflows across three enrollment pages.
- Configured **CMS templates and asset pipelines** to streamline content updates without requiring engineering intervention for routine publishing tasks.
- Coordinated with **remote stakeholders** to gather requirements and iterate on user-facing designs within a compressed eight-week project timeline.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Redux, AngularJS, Responsive Design, Web Performance Optimization

Backend: Node.js, Java, Python, REST APIs, Microservices, Object-Oriented Programming

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform

Monitoring & Tools: Datadog, Grafana, Jest, Cypress, Webpack, Git

Workflow & PM: Agile/Scrum, Jira, Confluence, Cross-functional Collaboration, Technical Documentation
