

Ryan Cho

Senior Full Stack Software Engineer

bataa4188@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with 6+ years building cloud-native microservices and customer-facing platforms in regulated financial environments. Led delivery of distributed services on AWS using Java, TypeScript, and Python, integrating LLMs, RAG pipelines, and vector search into production workflows. Mentor and cross-functional collaborator who designs scalable architectures, drives operational ownership, and ships reliable solutions for high-volume acquisition and onboarding flows.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected a **microservices orchestration platform** for client onboarding and account provisioning, coordinating 12 downstream integrations and reducing manual handoffs across operations teams.
- Delivered **full stack acquisition workflows** with Angular and TypeScript frontends backed by Java REST APIs, supporting 40K+ monthly submissions while maintaining 99.9% platform availability.
- Owned **AWS cloud deployment** using ECS, Lambda, and RDS with Docker-based CI/CD pipelines, shortening release cycles from multi-week batches to same-day production deployments.
- Built **LLM and RAG document pipelines** with Python services and vector databases for compliance review automation, increasing analyst throughput by 35% without sacrificing audit quality.
- Led **technical design reviews** and mentored 4 engineers on distributed systems design, API contracts, and test-driven development across a cross-functional product squad.
- Implemented **regulatory screening automation** for KYC and AML workflows, integrating Elasticsearch for searchable audit trails across 2M+ indexed records.
- Partnered with product, legal, and risk stakeholders to translate **policy requirements into service architecture**, defining resilient contracts for lending and onboarding decision flows.
- Established **observability standards** with CloudWatch metrics and structured logging, reducing production incident mean time to resolution by 28% over two quarters.
- Championed **generative AI tooling** for engineering productivity, piloting interactive code assistants that accelerated feature delivery and improved internal documentation coverage.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java microservices** for trade settlement and client provisioning on global banking platforms processing 500K+ daily transactions in a regulated environment.
- Built **AngularJS and TypeScript dashboards** consolidating 6 legacy operations tools into a unified workflow, reducing manual handoff errors by 22% across three regional teams.
- Designed **SQL and NoSQL data layers** with PostgreSQL and MongoDB for reference data services, achieving sub-200ms p95 read latency under peak market-hours load.
- Contributed to **AWS cloud migration** initiatives by containerizing services with Docker and establishing CI/CD templates adopted by 15 application teams.
- Implemented an **API orchestration layer** coordinating credit decisioning and fulfillment services, enabling decoupled upgrades across 8 dependent downstream systems.
- Mentored **2 junior analysts** on software engineering practices, code review standards, and Agile delivery within a 12-person technology squad.
- Automated **regulatory reporting workflows** with Python batch jobs and SQL stored procedures, eliminating 180+ hours of quarterly manual reconciliation effort.

- Participated in **event-driven architecture design** for payment processing, introducing Kafka-based async patterns that improved resilience during downstream service outages.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React and Node.js features** for restaurant inventory tracking on a platform serving 200+ venues across the New York metro area.
- Implemented **REST API endpoints** with PostgreSQL persistence for check and receipt reconciliation workflows used by operations staff daily.
- Raised backend **test coverage from 62% to 81%** by authoring unit and integration tests for authentication and reporting modules within one release cycle.
- Collaborated in **Agile sprint delivery** with senior engineers to refactor legacy session management and strengthen authentication security controls.
- Deployed **containerized services on AWS EC2** using Docker, supporting repeatable staging environments for QA and product validation.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive fundraising web pages** with JavaScript, HTML, and CSS for three nonprofit program sites, improving mobile engagement across campaign landing pages.
- Integrated **third-party donation APIs** with client-side validation and secure form handling for online contribution workflows.
- Improved **page load performance by 40%** through asset minification, image optimization, and lazy loading on content-heavy public pages.
- Maintained **WordPress and custom PHP components** under senior developer guidance while contributing updates in a fully remote collaboration model.
- Documented **deployment and content update procedures** for foundation staff, enabling smoother handoff of routine site maintenance tasks.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: Angular, AngularJS, TypeScript, JavaScript, React, HTML5, CSS3, Responsive UI

Backend: Java, Python, Node.js, Go, REST APIs, Microservices, Event-Driven Architecture, Kafka

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Vector Databases, SQL

Cloud & DevOps: AWS (ECS, Lambda, RDS, S3, EC2), Docker, Kubernetes, CI/CD, Terraform, Azure, GCP

Monitoring & Tools: CloudWatch, Datadog, Git, Jenkins, Elasticsearch, Generative AI Tooling, LLM Integration

Workflow & PM: Agile, Scrum, Technical Mentorship, Cross-Functional Collaboration, Regulatory Compliance
