

Ryan Cho

Software Engineer · Cloud & .NET Web Services

bataa4188@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software engineer building web applications and backend services with .NET, TypeScript, and JavaScript in finance and enterprise settings. Experienced in REST and SOAP APIs, SQL Server and PostgreSQL, Azure deployment, and Git-based DevOps workflows. Applies integration testing and full lifecycle delivery from requirements through validation. Strong collaborator with clear written and presentation skills, interested in cloud platforms and AI/ML applications.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **.NET Core web services** for portfolio analytics workflows, exposing **REST and SOAP endpoints** consumed by internal dashboards across **12+ downstream systems**.
- Built **TypeScript and React** front-end modules paired with **ASP.NET Web API** backends, improving page load performance by **35%** through query optimization and response caching.
- Designed **PostgreSQL and SQL Server** schemas and migration scripts for financial reporting data, preserving **ACID compliance** and audit-ready lineage for regulatory reviews.
- Deployed releases to **Microsoft Azure** through **Azure DevOps pipelines** and Git branching workflows, reducing deployment cycles from days to **under 4 hours**.
- Led **integration testing and validation** suites covering API contracts, **XML and JSON serialization**, and end-to-end web application flows before production cutovers.
- Partnered with product and operations stakeholders to translate requirements into technical designs, delivering **written specifications and architecture presentations** for cross-team alignment.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **C#/ .NET** backend components for internal banking web applications, supporting **JSON and XML** data exchange across cross-departmental services.
- Implemented **RESTful API** integrations connecting trade processing modules to **SQL Server** databases handling **millions of daily transactions**.
- Supported **SOAP-based legacy services** during platform modernization, building adapter layers that maintained backward compatibility for critical settlement workflows.
- Executed **integration and regression testing** in Visual Studio and Azure DevOps, reducing production defects and sustaining **99.5% uptime** for internal tools.
- Contributed to **Azure cloud migration** planning for development and test environments, documenting infrastructure changes and participating in security review sessions.
- Collaborated in agile ceremonies with analysts and technology leads, producing **technical documentation and sprint review presentations** for stakeholder visibility.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **JavaScript, HTML, and CSS** features for a web-based inventory platform, improving usability for warehouse staff across **3 client deployments**.
- Assisted in developing **TypeScript** modules and **.NET API** endpoints for order tracking, following team coding standards through structured peer reviews.
- Wrote **unit and integration tests** for web service contracts, validating **JSON payloads** and error handling before each sprint release.

- Used **Git and Visual Studio** in daily development, resolving merge conflicts and maintaining clean commit history across feature branches.
- Participated in requirements discussions and demo sessions, strengthening **communication and teamwork** in a fast-paced startup environment.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **HTML, CSS, and JavaScript** pages for a nonprofit web presence, delivering responsive layouts compatible across major browsers and devices.
- Integrated lightweight **REST API** calls to backend services for content updates, handling **JSON responses** with client-side validation and error states.
- Assisted with **PostgreSQL** queries and data formatting for donation tracking features under senior developer guidance.
- Supported **testing and defect resolution** across the web application lifecycle, documenting issues and fixes for the team knowledge base.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, JavaScript, HTML, CSS, React

Backend: C#, .NET Core, ASP.NET Web API, REST, SOAP

Databases: Microsoft SQL Server, PostgreSQL, relational schema design, migrations

Cloud & DevOps: Microsoft Azure, Azure DevOps, Git, CI/CD pipelines, cloud deployment

Monitoring & Tools: Microsoft Visual Studio, integration testing frameworks, XML/JSON tooling, API validation

Workflow & PM: Agile/Scrum, requirements analysis, technical writing, presentations, cross-team collaboration
