

Ryan Cho

Full Stack Software Engineer | Cloud & Web Services

bataa4188@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with experience building web applications and backend services across finance and enterprise environments. Skilled in .NET, TypeScript, and JavaScript with hands-on work on REST and SOAP integrations, relational databases, and Azure-hosted deployments. Strong record of end-to-end ownership from requirements through integration testing, cross-team collaboration, and delivering reliable services at scale.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led development of an **internal banking web platform** used by portfolio operations teams, delivering **ASP.NET Core services** and responsive UI components across daily production workflows.
- Designed and implemented **REST and SOAP integration layers** connecting third-party market data vendors, reducing manual reconciliation through **automated XML and JSON parsing pipelines**.
- Owned **Azure cloud deployment** workflows including app service configuration, environment promotion, and **zero-downtime release practices** for production-critical applications.
- Built and maintained **SQL Server and PostgreSQL** schemas supporting transactional reporting; optimized queries that improved **batch processing throughput** for end-of-day workflows.
- Drove **integration testing strategy** across API boundaries, establishing reusable test harnesses that increased release confidence for cross-team service changes.
- Partnered with business analysts and compliance stakeholders to translate **requirements into system architecture** designs, presenting technical options in sprint planning and roadmap reviews.
- Mentored junior engineers on **.NET best practices**, code review standards, and Git branching workflows, improving delivery consistency across two product squads.
- Introduced **AI-assisted development tooling** into team workflows for code generation and test scaffolding, accelerating feature delivery while preserving review quality gates.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **web application features** for trading technology teams using **.NET and JavaScript**, supporting operational dashboards used by front-office and middle-office staff.
- Implemented **REST API endpoints** and service contracts for internal data exchange, enabling downstream systems to consume normalized **JSON payloads** reliably.
- Contributed to **systems engineering** efforts defining service boundaries and integration patterns for a multi-tier banking application portfolio.
- Wrote **integration and unit tests** in Visual Studio, participating in validation cycles that verified behavior across **SOAP and REST** service interfaces.
- Managed **SQL Server** stored procedures and data access layers for regulatory reporting modules, ensuring accuracy under high-volume transactional loads.
- Collaborated with cross-functional teams in a **fast-paced Agile environment**, delivering sprint commitments through written status updates and live technical presentations.
- Supported **Azure-hosted proof-of-concept environments** for application modernization initiatives, gaining hands-on exposure to cloud migration and deployment patterns.

Software Engineering Intern Chexology

Jun/2018 - May/2019

Remote | 17th Floor, New York

- Built **full stack web features** using **JavaScript, HTML, and CSS** for a restaurant technology platform, improving checkout flow usability for venue staff.
- Assisted in developing **backend web services** that exposed JSON APIs for mobile client consumption, following established coding standards and peer review processes.
- Participated in **Git-based collaborative development**, branching and merging changes through Azure DevOps pipelines under senior engineer supervision.
- Created **PostgreSQL queries** and lightweight data models supporting inventory tracking modules during iterative sprint cycles.
- Documented API behavior and test cases, strengthening **integration testing coverage** for newly shipped endpoints.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** with HTML, CSS, and JavaScript for a nonprofit foundation site, improving content accessibility across desktop and mobile browsers.
- Integrated **third-party REST services** for event registration and donation workflows, handling XML and JSON response formats with client-side validation.
- Configured **relational database connections** for content management features, supporting structured data retrieval for program listings.
- Collaborated with stakeholders to gather **requirements and present design prototypes**, aligning deliverables with organizational communication goals.
- Performed **manual and scripted testing** across browsers, identifying defects early and supporting stable releases for a remote volunteer team.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, Responsive Web Design, Component-Based UI

Backend: .NET, C#, ASP.NET Core, REST APIs, SOAP/XML Web Services, JSON Serialization

Databases: Microsoft SQL Server, PostgreSQL, Relational Data Modeling, Stored Procedures, Query Optimization

Cloud & DevOps: Microsoft Azure, Azure App Service, Azure DevOps, Git, CI/CD Pipelines, Cloud Deployment

Monitoring & Tools: Microsoft Visual Studio, Integration Testing, Unit Testing, Application Logging, IDE Workflow Tools

Workflow & PM: Agile/Scrum, Requirements Analysis, Technical Documentation, Cross-Functional Collaboration, Presentations
