

Ryan Cho

Lead Software Engineer, Full Stack

bataa4188@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Lead software engineer with 7+ years building full stack and distributed systems in regulated finance environments. Led microservices platforms on AWS and Kubernetes serving high-volume customer workflows, while mentoring engineers and partnering with product on cloud-native delivery. Proficient in JavaScript, TypeScript, Java, Python, and SQL across RDBMS and NoSQL stores. Experienced in Agile delivery, cross-team architecture, and applying AI-assisted tooling to accelerate engineering productivity.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full stack microservices** on **AWS** and **Kubernetes** for investment operations, enabling **regulatory reporting** pipelines across multiple business units.
- Led **technical design reviews** and mentored **4 engineers** on distributed system patterns, REST APIs, and **TypeScript/Node.js** service ownership.
- Built **React/TypeScript** dashboards integrated with **Java** backend services, improving portfolio analytics visibility for stakeholders across finance teams.
- Designed **PostgreSQL** and **MongoDB** data models supporting **high-throughput transaction processing** with strong consistency requirements.
- Implemented **CI/CD pipelines** with **Docker**, automated testing, and **Terraform** infrastructure, reducing deployment cycles for production releases.
- Partnered with product managers on **Agile** delivery of **cloud-native features**, translating compliance requirements into scalable service boundaries.
- Introduced **Elasticsearch** indexing for document search and screening workflows, cutting query latency for operations teams.
- Leveraged **AI-assisted development tooling** beyond code completion to accelerate refactors, test generation, and cross-service documentation.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java** and **Python** services on **Azure** supporting trade finance and **regulatory compliance** workflows for global banking operations.
- Built **full stack** internal tools with **JavaScript**, **HTML/CSS**, and **SQL** for screening, onboarding, and audit-ready reporting.
- Migrated legacy monolith components to **containerized microservices** using **Docker**, improving release independence across analyst teams.
- Optimized **RDBMS** queries and stored procedures on **SQL Server**, improving batch processing for high-volume reconciliation jobs.
- Collaborated with legal and compliance stakeholders to implement **screening** and documentation features with traceable audit logs.
- Participated in **Agile** ceremonies and cross-functional delivery with product, QA, and operations for iterative feature releases.
- Integrated **Elasticsearch** for fast retrieval of customer and transaction records in support tooling.
- Mentored summer analysts on **software engineering** practices, code review standards, and test-driven development.

- Supported **technical troubleshooting** for production incidents, coordinating root-cause analysis and durable fixes across distributed systems.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **JavaScript** and **HTML/CSS** features for a SaaS check management platform used by hospitality clients.
- Built **REST API** integrations connecting front-end forms to backend services with validated input and error handling.
- Wrote **SQL** queries and data access layers supporting reporting dashboards for client-facing analytics.
- Contributed to **Agile** sprints with code reviews, unit tests, and documentation for shared team components.
- Containerized development environments with **Docker** to standardize onboarding for remote interns.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **HTML/CSS/JavaScript** web pages and interactive components for nonprofit digital outreach campaigns.
- Integrated **form submissions** with backend endpoints to capture donor and volunteer data reliably.
- Improved **page performance** and responsive layouts across desktop and mobile breakpoints.
- Collaborated with stakeholders remotely to iterate on content structure and accessibility improvements.
- Maintained legacy site assets and deployed updates through version-controlled release workflows.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, HTML/CSS, Redux, Responsive UI

Backend: Java, Node.js, Python, Go, REST APIs, Microservices, Spring Boot

Databases: PostgreSQL, SQL Server, MongoDB, Redis, Elasticsearch, SQL

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Terraform, CI/CD

Monitoring & Tools: Datadog, Prometheus, Grafana, Git, Jenkins, GitHub Actions

Workflow & PM: Agile/Scrum, Jira, Confluence, Technical Mentorship, Cross-functional Collaboration
