

Ryan Cho

Full Stack Software Engineer

Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 6+ years building scalable web platforms and microservice architectures across finance and asset management. Experienced delivering React and Node.js applications on AWS with containerized deployments, relational and document databases, and Agile delivery. Partners with product and engineering leaders to ship reliable services from design through production while mentoring teams on full stack best practices.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **microservice platform capabilities** with **Node.js** and **React**, supporting portfolio analytics workflows used daily by investment operations teams.
- Led **containerized AWS deployments** on EC2 and S3 with **CI/CD automation**, improving release consistency across staging and production environments.
- Built **REST and GraphQL APIs** backed by **PostgreSQL** and **MongoDB**, enabling flexible reporting and dashboard experiences for internal stakeholders.
- Partnered with **product managers** to refine requirements and deliver roadmap milestones within **Agile/Scrum** sprints spanning frontend and backend workstreams.
- Designed **database schemas and query tuning** across SQL and document stores, improving reliability for high-volume financial data processing pipelines.
- Mentored **junior engineers** on service design, code review practices, and production troubleshooting, strengthening team delivery standards.
- Drove **cross-team architecture reviews** for service boundaries and API contracts, aligning new features with long-term platform scalability goals.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **backend services** supporting trading and risk reporting pipelines within a regulated **DevOps delivery** environment.
- Built **React** interfaces for internal operations dashboards, giving analysts faster access to market and position data.
- Optimized **MySQL and PostgreSQL** queries and stored procedures handling large transaction datasets with improved batch stability.
- Contributed to **microservice decomposition** efforts, extracting monolithic batch processes into independently deployable services on **AWS**.
- Collaborated with technology, operations, and compliance partners to ship features under strict audit, security, and release controls.
- Automated **Git-based deployment and testing workflows**, reducing manual steps for recurring regulatory reporting cycles.
- Supported **production incident response** for critical banking applications, documenting root causes and preventive monitoring improvements.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React** UI features and **Node.js** endpoints for a customer-facing web application in an **Agile** startup environment.

- Integrated **MongoDB** persistence for session and catalog data, supporting concurrent reads and writes across active user traffic.
- Authored **automated tests** and participated in peer code reviews, improving confidence for weekly production releases.
- Containerized the development stack with **Docker**, aligning local environments with production-like configuration standards.
- Contributed across **Scrum ceremonies** and sprint planning, delivering assigned stories spanning frontend and backend responsibilities.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** with HTML, CSS, and JavaScript for foundation marketing and program content.
- Managed site updates through **Git version control** and shared deployment workflows with nonprofit stakeholders.
- Improved **page load performance** via asset optimization and lightweight scripting for mobile visitors.
- Coordinated content revisions with program leads, delivering accessible layouts aligned with organizational branding.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Redux, GraphQL clients, responsive UI design

Backend: Node.js, Express, REST APIs, GraphQL, Python, Java, microservices architecture

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, SQL optimization, schema design

Cloud & DevOps: AWS (EC2, S3), Azure, Docker, Kubernetes, CI/CD pipelines, Git, infrastructure automation

Monitoring & Tools: CloudWatch, centralized logging, metrics and alerting, Jest, Postman, Swagger/OpenAPI

Workflow & PM: Agile, Scrum, Jira, Confluence, stakeholder collaboration, technical mentorship
