

Ryan Cho

Software Engineer | Web Applications & Production Support

Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software engineer with 8+ years designing, developing, and supporting web applications across finance and technology. Proficient in Python, SQL, Linux administration, and Selenium automation for production troubleshooting, platform configuration, and operational maintenance. Strong analytical and communication skills with a track record of second-level support, cross-team collaboration, and reliable delivery of in-house application systems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned **end-to-end development and configuration** of in-house web applications supporting portfolio operations, delivering features used daily by **40+ internal stakeholders** across trading and risk teams.
- Provided **second-level production support** for complex user enquiries, performing **Linux-based log analysis** and SQL diagnostics to resolve priority incidents with **95% same-day closure**.
- Built **Python automation scripts** and **Selenium test suites** to validate web platform releases, reducing manual regression effort by **60%** and catching configuration defects pre-deployment.
- Led **operational maintenance and housekeeping** across legacy and modern web stacks, including dependency upgrades, cache purges, and scheduled batch jobs on **Linux production servers**.
- Designed and implemented **SQL-backed reporting modules** and REST APIs that consolidated fragmented data sources into a **single operational dashboard** for finance users.
- Partnered with infrastructure and QA teams to **troubleshoot cross-system failures**, documenting root causes and preventive runbooks that cut repeat incident volume by **30%**.
- Mentored **two junior developers** on web application architecture, debugging workflows, and production support protocols during onboarding and sprint delivery.
- Standardized **application setup and environment configuration** pipelines across dev, staging, and production, eliminating environment drift that previously caused **weekly deployment blockers**.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed and maintained **internal web applications** for capital markets operations, implementing new modules and configuration changes aligned with **regulatory and business requirements**.
- Responded to **escalated production support tickets** as a second-line resource, diagnosing application failures through **Python scripts, SQL queries, and Linux server inspection**.
- Executed **routine operational support** including database housekeeping, session cleanup, and batch job monitoring across **15+ in-house platforms** supporting front-office workflows.
- Automated **Selenium-based smoke tests** for critical web workflows, improving release confidence and reducing post-deployment rollback incidents by **25%**.
- Collaborated with business analysts and offshore teams to **implement and configure** application features, translating functional specs into deployable solutions within **two-week sprint cycles**.
- Performed **root-cause analysis** on recurring production defects, patching application logic and updating SQL stored procedures to stabilize high-traffic transaction paths.
- Supported **application setup and deployment** activities during quarterly releases, coordinating configuration changes across **multiple Linux-hosted environments**.
- Documented troubleshooting procedures and **knowledge base articles** that accelerated onboarding for new team members and reduced average ticket resolution time by **20%**.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **web application development** using JavaScript and Python, implementing UI components and backend endpoints under senior engineer guidance.
- Wrote **SQL queries** to extract and validate customer data, supporting QA and product teams with accurate datasets for feature testing.
- Assisted with **production support tasks** including bug triage, log review on **Linux development servers**, and ticket updates in team tracking systems.
- Built **Selenium test scripts** covering checkout and authentication flows, expanding automated coverage for **core user journeys**.
- Participated in **code reviews and deployment checklists**, gaining hands-on experience with application configuration and release hygiene.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** and interactive features for foundation outreach platforms using HTML, CSS, and JavaScript.
- Configured **web server environments** on Linux hosts, deploying static and dynamic content with documented setup steps for team reuse.
- Integrated **SQL-backed contact forms** and content management workflows, enabling non-technical staff to update site sections independently.
- Diagnosed **cross-browser compatibility issues** through systematic testing, resolving layout defects before public launch deadlines.
- Collaborated with designers and project leads to **implement site updates**, delivering incremental releases on a **biweekly maintenance schedule**.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: HTML, CSS, JavaScript, React, TypeScript, Responsive Web Design, REST API Integration

Backend: Python, Node.js, Flask, Django, Shell Scripting, API Development, Web Application Configuration

Databases: SQL, PostgreSQL, MySQL, Query Optimization, Stored Procedures, Data Validation

Cloud & DevOps: Linux Administration, Bash, Docker, CI/CD, Environment Configuration, Deployment Automation, Nginx

Monitoring & Tools: Selenium, WebDriver, Log Analysis, Application Performance Monitoring, Git, Postman, Jira

Workflow & PM: Agile/Scrum, Production Support, Incident Triage, Root-Cause Analysis, Technical Documentation, Cross-Functional Collaboration
