

Ryan Cho

Senior Full Stack Software Engineer

Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with 8+ years delivering production Java and JavaScript systems in financial services. Builds AI-enabled platforms spanning agentic workflows, RAG pipelines, and LLM integrations embedded in CI/CD and code review. Leads cross-team adoption of responsible AI practices while improving engineering productivity, quality, and release cycle time. Partners with stakeholders to ship scalable backend services and full stack applications from design through production.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered an **AI-assisted code review platform** integrating Claude and GPT APIs into GitHub workflows, reducing manual review turnaround for 40+ engineers across 12 repositories.
- Built **production Java microservices** exposing LLM-powered test generation and static analysis suggestions, processing 2,000+ pull requests monthly with monitored latency and fallback paths.
- Designed **agentic workflows** with tool use, conversation memory, and multi-step reasoning to automate regression test triage, cutting flaky-test investigation time by roughly 35%.
- Implemented a **RAG pipeline** over internal API documentation and runbooks, enabling context-aware developer assistants that shortened onboarding time for new team members.
- Led **full stack delivery** in React and Spring Boot for portfolio analytics dashboards used by investment analysts across multiple asset classes.
- Established **guardrails for responsible AI usage** including prompt versioning, output validation, and audit logging adopted as team-wide engineering standards.
- Partnered with **DevOps and QA leaders** to embed LLM capabilities into CI/CD pipelines, automating changelog generation and deployment risk summaries.
- Mentored **3 junior engineers** on Java and JavaScript patterns, prompt engineering practices, and production observability for AI-integrated services.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java-based trading and risk APIs** supporting front-office applications, handling high-volume requests with strict latency and compliance requirements.
- Shipped **JavaScript and React dashboards** for technology operations monitoring, giving stakeholders real-time visibility into system health across 20+ services.
- Built **integration services** connecting legacy banking platforms to modern REST APIs, enabling smoother data exchange for financial reporting workflows.
- Contributed to **automated testing frameworks** that expanded regression coverage and shortened validation cycles for quarterly release trains.
- Collaborated with **cross-functional teams** spanning business analysts, QA, and infrastructure to deliver features on aggressive regulatory timelines.
- Optimized **SQL queries and batch jobs** processing large transaction datasets, improving nightly reconciliation runtime for critical downstream systems.
- Participated in **incident response and root-cause analysis**, implementing fixes and preventative monitoring for production outages in payments infrastructure.
- Documented **technical designs and runbooks** that reduced knowledge silos and accelerated ramp-up for rotating analyst cohorts.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components and REST integrations** for a customer-facing web application supporting digital receipt and compliance workflows.
- Implemented **Node.js API endpoints** for authentication, data validation, and third-party service integration used by mobile and web clients.
- Wrote **unit and integration tests** improving coverage on core checkout flows and reducing regression bugs across sprint releases.
- Participated in **code reviews and agile ceremonies**, contributing fixes and feature updates across the full stack codebase.
- Resolved **frontend performance issues** through bundle optimization and lazy loading, improving page load times on low-bandwidth connections.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** using HTML, CSS, and JavaScript for a nonprofit foundation's public-facing site.
- Integrated **CMS content workflows** enabling non-technical staff to update program information without developer assistance.
- Fixed **cross-browser compatibility issues** and accessibility gaps identified during QA review cycles.
- Collaborated with **design stakeholders** to implement layout updates aligned with brand guidelines within tight launch deadlines.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Webpack

Backend: Java, Spring Boot, Node.js, REST APIs, GraphQL, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD

Monitoring & Tools: Datadog, Prometheus, Grafana, Splunk, Git, LLM APIs (Claude, GPT, Gemini)

Workflow & PM: Agile/Scrum, Jira, Confluence, Technical design, Cross-functional collaboration
