

Ryan Cho

Full-Stack Software Engineer | E-Commerce & Platform Systems

Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full-stack software engineer with eight years building customer-facing web applications and commerce-adjacent platforms across finance and capital markets. Owns end-to-end delivery from storefront UX through API integrations, order workflows, and third-party payment systems. Combines strong front-end craftsmanship with back-end reliability, performance tuning, and cross-functional partnership with operations and leadership.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **end-to-end development** of an internal capital markets web platform serving **120+ analysts**, owning React storefront patterns and Node.js services behind allocation and fulfillment-style workflows.
- Built **order processing pipelines** connecting portfolio requests, approval gates, and settlement handoffs, reducing manual fulfillment steps by **35%** across operations teams.
- Integrated **Stripe and payment-adjacent APIs** for subscription billing and transfer validation, improving payment success rates to **99.2%** through idempotent webhook handling.
- Designed **inventory and position tracking modules** with real-time availability views for desk staff, supporting **\$2B+** in monitored assets across daily reconciliation cycles.
- Optimized **mobile-responsive storefront** experiences and **PWA caching** strategies, cutting median page load times from **3.8s to 1.4s** on repeat visits.
- Partnered with **operations and executive stakeholders** to translate business requirements into shippable features on two-week release cadences with measurable adoption metrics.
- Hardened platform **security and reliability** through auth middleware, audit logging, and automated regression suites covering **85%** of critical commerce paths.
- Mentored **two junior engineers** on React component architecture, API design, and production debugging across the full stack.
- Migrated legacy reporting views to a **modular React design system**, accelerating feature delivery for new product lines by **40%**.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **customer-facing banking portals** with HTML, CSS, JavaScript, and React, supporting **50K+ monthly** authenticated sessions with accessible, responsive layouts.
- Built **REST API integrations** between core banking systems and third-party compliance tools, enabling automated data exchange for regulatory reporting workflows.
- Implemented **order and transaction processing services** on Java and Node.js middleware, improving batch settlement throughput by **28%** during peak trading windows.
- Collaborated with **cross-functional product and operations teams** to refine UX flows for account servicing, reducing customer support escalations tied to navigation issues by **18%**.
- Tuned **database queries and caching layers** on PostgreSQL and Oracle backends, lowering average API latency from **420ms to 180ms** for high-traffic endpoints.
- Supported **PCI-adjacent payment integrations** and secure credential handling in regulated financial environments with strict audit and access controls.
- Contributed to **CI/CD pipelines** and automated test coverage for release-critical banking features, cutting production rollback incidents by **30%** year over year.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for a food-service ordering web app, improving mobile checkout completion rates by **12%** through streamlined cart and payment flows.
- Integrated **Stripe payment APIs** for in-app purchases, implementing webhook listeners and error handling for reliable transaction confirmation.
- Developed **Node.js REST endpoints** for menu inventory and order status updates consumed by the customer-facing storefront and admin dashboard.
- Optimized **CSS and JavaScript bundles** for faster first paint on mobile devices, reducing time-to-interactive by **25%** on 3G networks.
- Partnered with design stakeholders to refine **UI/UX patterns** for order tracking screens, increasing repeat customer engagement on post-purchase flows.
- Wrote **unit and integration tests** for checkout-critical paths, helping the team ship weekly releases with fewer regression defects.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered **responsive HTML, CSS, and JavaScript** pages for a nonprofit e-commerce site selling branded merchandise and event registrations.
- Integrated **PayPal and card checkout flows** with server-side validation, enabling online donations and product purchases for **800+ monthly** visitors.
- Built lightweight **PHP back-end scripts** for order confirmation emails and inventory decrement logic tied to the storefront catalog.
- Improved **site performance and mobile layout** through image optimization and progressive enhancement, boosting mobile conversion by **15%**.
- Collaborated with foundation leadership to translate **fundraising requirements** into publishable web features on a tight nonprofit launch timeline.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: HTML, CSS, JavaScript, React, Responsive Design, PWA, UI/UX, Accessibility

Backend: Node.js, REST APIs, Order Processing, Webhooks, PHP, Java

Databases: PostgreSQL, SQL, Oracle, Redis, Query Optimization

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Nginx, Linux

Monitoring & Tools: Stripe, QuickBooks, PayPal, Jest, Postman, Datadog, Git

Workflow & PM: Agile, Scrum, Jira, Cross-functional Collaboration, Technical Documentation
