

Ryan Cho

Software Engineer | Web Platforms & Systems Integration

Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software engineer with 7+ years building customer-facing web applications and business system integrations across finance and SaaS environments. Experienced in C#, .NET, JavaScript, HTML, CSS, and SQL with hands-on ownership of REST/SOAP APIs, file-based data exchange, and cloud workflow automation connecting internal platforms with vendors and partners. Partners effectively with marketing, operations, and engineering teams to improve reliability, performance, and user experience on business-critical systems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led development and maintenance of **customer-facing web applications** supporting portfolio and client workflows, improving page performance and reliability for **40+ active users** across distributed teams.
- Designed and implemented **REST and SOAP API integrations** connecting internal order management, CRM, and third-party vendor systems to automate data exchange and reduce manual processing across business operations.
- Built **Azure-based integration workflows** using Functions, Logic Apps, and Service Bus to orchestrate file transfers, message routing, and transformation pipelines for supplier and customer onboarding.
- Developed **eCommerce-style storefront features** including catalog browsing, checkout flows, and account modules using **C#, .NET, JavaScript, HTML, and CSS**, partnering with marketing to optimize user experience.
- Established **QA testing practices** and regression coverage for web releases, identifying and resolving production defects while maintaining **uptime, security, and compliance standards** across deployed applications.
- Partnered with **Sales, Customer Service, and Operations** to gather integration requirements, document technical specifications, and deliver scalable solutions supporting **automated order processing** for external partners.
- Implemented **SQL Server** data models and stored procedures supporting reporting, reconciliation, and audit trails while ensuring **data integrity** across integrated systems.
- Monitored application and integration performance, performed **root cause analysis** on production incidents, and deployed fixes that stabilized critical business workflows during peak processing periods.
- Mentored junior engineers on **integration architecture**, code review standards, and modern development practices while contributing to cross-team design discussions for platform scalability.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Supported development of **internal web applications and dashboards** for trading and operations teams using **C#, .NET, and JavaScript**, delivering features on agile sprint cycles with consistent release cadence.
- Built and maintained **API integrations** between front-office platforms, middle-office systems, and external data providers, enabling automated reconciliation across **multiple business units**.
- Developed **SQL queries and database procedures** supporting trade reporting, compliance workflows, and operational analytics consumed by stakeholders across the organization.
- Implemented **file-based data exchange** pipelines including SFTP transfers and scheduled batch processing for vendor feeds, with monitoring and alerting for failed transmission recovery.
- Collaborated with **technology and business analysts** to translate integration requirements into technical designs, workflow mappings, and support documentation for production deployments.
- Performed **QA testing and troubleshooting** on employee- and client-facing web tools, resolving defects and performance bottlenecks ahead of regulatory and business deadlines.
- Participated in **system architecture discussions** recommending scalable integration patterns for new product onboarding and third-party platform connections.

- Contributed to **Azure cloud migration** initiatives by refactoring legacy .NET components and validating deployment pipelines for improved reliability and maintainability.
- Documented **integration architecture and support procedures** for cross-team handoffs, reducing onboarding time for engineers supporting business-critical production systems.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **customer-facing web features** for a SaaS platform using **HTML, CSS, and JavaScript**, implementing responsive UI components aligned with design specifications and accessibility guidelines.
- Assisted senior engineers with **REST API integration** between frontend modules and backend services, enabling dynamic data loading and form validation across user workflows.
- Wrote **unit and integration tests** to validate bug fixes and new functionality, supporting QA efforts during sprint releases and reducing regression issues in staging environments.
- Participated in **agile ceremonies** including stand-ups and code reviews, incorporating feedback to improve code quality and development velocity across the intern team.
- Documented **API endpoints and component behavior** for the internal engineering wiki, helping onboard new developers and streamline future feature work.
- Investigated and resolved **frontend defects** reported through ticketing systems, performing root cause analysis and deploying patches under mentorship from full-time engineers.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built and maintained **marketing and informational web pages** for a nonprofit foundation using **HTML, CSS, and JavaScript**, ensuring consistent branding and mobile-friendly layouts.
- Implemented **form integrations and CMS updates** supporting donation flows and event registration, collaborating with stakeholders to refine user experience based on feedback.
- Performed **cross-browser QA testing** to identify rendering and functionality issues, delivering fixes that improved site stability across desktop and mobile devices.
- Optimized **page performance and SEO fundamentals** including asset compression and semantic markup, contributing to improved load times and search visibility.
- Supported deployment of **content updates and feature releases** on schedule, coordinating with remote team members to meet campaign launch deadlines.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Responsive Web Design, eCommerce UI Development

Backend: C#, .NET, ASP.NET, REST APIs, SOAP Web Services, Node.js

Databases: SQL Server, PostgreSQL, T-SQL, Query Optimization, Data Modeling

Cloud & DevOps: Microsoft Azure, Azure Functions, Azure Logic Apps, Azure Service Bus, Azure Storage, CI/CD Pipelines, Git

Monitoring & Tools: Visual Studio, Application Insights, Postman, SFTP, EDI/cXML Processing

Workflow & PM: Agile/Scrum, Jira, Technical Documentation, Root Cause Analysis, Cross-functional Collaboration
