

Ryan Cho

Senior Software Engineer

Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with 7+ years building scalable web platforms, RESTful APIs, and event-driven services in regulated industries. Experienced across Angular, TypeScript, C#, and PostgreSQL with a focus on performance, reliability, and clean architecture. Led feature delivery from design through production, mentored engineers, and partnered with cross-functional teams to ship SaaS solutions that support high-stakes business workflows.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full-stack features** across Angular frontends and **ASP.NET Core services**, enabling portfolio analytics workflows used daily by 40+ investment analysts.
- Designed **RESTful and event-driven APIs** on PostgreSQL-backed services that processed 2M+ monthly transactions with consistent sub-200ms response times under peak load.
- Led **architecture reviews** for service decomposition and caching strategies, reducing duplicate data-fetching logic across 6 client-facing modules by 35%.
- Built reusable **Angular component libraries** with TypeScript strict mode, cutting feature delivery time for new dashboard views by approximately 25%.
- Mentored **3 junior engineers** through design discussions, code reviews, and pairing sessions, improving team pull-request turnaround by 40%.
- Implemented **CI/CD pipelines** and automated integration tests for .NET microservices, raising deployment confidence and enabling weekly production releases.
- Collaborated with product and compliance stakeholders to translate regulatory requirements into **maintainable service contracts** without disrupting existing API consumers.
- Optimized **SQL query performance** and indexing strategies on PostgreSQL, resolving long-running report generation jobs that previously exceeded 90 seconds.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **C# and .NET Core APIs** supporting trade operations and internal reporting tools used by 200+ banking staff across two business units.
- Contributed to **service-oriented architecture** initiatives that standardized authentication, logging, and error handling across 12 internal web applications.
- Built **Angular dashboards** for real-time risk monitoring, integrating TypeScript services with backend endpoints serving 500K+ daily data points.
- Implemented **relational database schemas** and stored procedures in PostgreSQL and SQL Server, improving batch reconciliation runtimes by 30%.
- Adopted **design patterns** including repository and factory abstractions, reducing code duplication in shared middleware layers across 4 application teams.
- Supported **production incident triage** for critical payment workflows, documenting root causes and delivering hotfixes within SLA windows.
- Partnered with QA and business analysts in **Agile sprints** to refine acceptance criteria and ship compliance-driven feature updates on quarterly release trains.
- Refactored legacy **monolithic endpoints** into modular service boundaries, improving testability and enabling parallel development across 3 feature squads.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **JavaScript and HTML/CSS** UI enhancements for a restaurant compliance platform, improving mobile form completion rates by 18%.
- Built **REST API integrations** between frontend components and Node.js backend services for real-time checklist synchronization.
- Wrote unit and integration tests covering **critical user flows**, raising code coverage on assigned modules from 42% to 68%.
- Participated in **code reviews** and daily standups, contributing bug fixes that reduced open defect backlog on the checkout module by 15%.
- Refactored legacy **jQuery components** into modular TypeScript widgets, making future feature work easier for the core engineering team.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered **responsive web pages** for foundation outreach campaigns using HTML, CSS, and JavaScript, supporting a 12% increase in newsletter sign-ups.
- Integrated **third-party form APIs** to capture donor interest data and route submissions to internal mailing lists reliably.
- Maintained content updates across **CMS-driven site sections**, ensuring accessibility standards and cross-browser compatibility.
- Collaborated with nonprofit stakeholders to iterate on **landing page layouts** based on analytics feedback from 3K+ monthly visitors.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Responsive Web Design, Component Architecture

Backend: C#, ASP.NET Core, .NET, RESTful APIs, Event-Driven Architecture, SOA, Node.js

Databases: PostgreSQL, SQL Server, Relational Schema Design, Query Optimization, Stored Procedures

Cloud & DevOps: Azure, Docker, CI/CD, GitHub Actions, Infrastructure as Code

Monitoring & Tools: Application Insights, Serilog, Swagger/OpenAPI, Redis, RabbitMQ, Git

Workflow & PM: Agile/Scrum, Jira, Code Review, Technical Mentorship, Cross-functional Collaboration
