

Ryan Cho

Software Developer

Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software developer with a Computer Science degree from NYU and four years delivering production web applications in finance and growth-stage environments. Works across the full development lifecycle—design, implementation, testing, deployment, and application support—for distributed services using Node.js, Python, Java, and PHP/Laravel. Proficient with relational and NoSQL databases, complex SQL queries, and shell/CLI automation. Clear communicator who thrives on small teams solving challenging technical problems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned **end-to-end delivery** of Node.js and Python services supporting portfolio analytics workflows, guiding features from design through **production deployment** across multi-tier distributed infrastructure.
- Expanded **PHP/Laravel reporting applications** by refactoring data-access layers and optimizing complex relational queries, improving responsiveness for **high-volume client datasets** used by investment teams.
- Integrated **REST and event-driven APIs** with downstream financial systems, partnering with analysts and stakeholders to encode business rules in maintainable, testable backend code.
- Established **automated testing and CI pipelines** covering unit, integration, and deployment validation, increasing release confidence for **weekly production pushes**.
- Resolved production defects through **shell scripting, log analysis, and CLI diagnostics**, shortening investigation cycles for application-support issues across distributed services.
- Modeled **PostgreSQL schemas and NoSQL document stores** for financial data workflows, authoring complex queries and migrations that preserved **data integrity** across reporting pipelines.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java backend services** supporting trading and risk platforms, contributing to design, implementation, testing, and **deployed releases** in a regulated enterprise environment.
- Authored **complex SQL queries and stored procedures** across Oracle and PostgreSQL databases, enabling analytics teams to extract insights from **large relational datasets**.
- Built **internal CLI utilities and shell automation** that streamlined data validation, environment provisioning, and batch processing for technology operations teams.
- Supported **distributed application tiers** by troubleshooting integration failures across middleware, API gateways, and downstream consumer services during **monthly production releases**.
- Participated in **code reviews and technical design sessions**, improving service reliability and documentation standards for cross-functional engineering groups.
- Implemented **JUnit and integration test coverage** for critical payment and reporting modules, reducing regression risk before **production deployment**.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **full-stack web features** using JavaScript and Node.js, pairing with senior engineers on design, implementation, and **QA testing** before production rollout.
- Wrote **SQL queries and API endpoints** connecting mobile check-deposit workflows to PostgreSQL backends, ensuring accurate transaction state across **distributed services**.
- Assisted with **Docker-based local environments** and deployment scripts, supporting applications through the complete development lifecycle from build to **hosted deployment**.

- Fixed bugs and improved **PHP application modules** for customer-facing tools, documenting root causes and verification steps for team handoffs.
- Collaborated in **Agile sprint ceremonies**, communicating progress and blockers clearly while iterating on features within a **small engineering team**.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** and CMS integrations for a nonprofit foundation site, delivering design-to-deployment work within a **three-month remote engagement**.
- Implemented **JavaScript interactions and form flows** that improved visitor engagement and simplified donation pathways across production-hosted pages.
- Configured **HTML/CSS layouts** aligned to brand guidelines, validating cross-browser behavior before remote deployment to shared hosting.
- Coordinated with stakeholders on content updates and bug fixes, practicing **clear written communication** throughout a fast-paced delivery cycle.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Responsive Web Design, Bootstrap

Backend: Node.js, Python, PHP, Laravel, Java, REST APIs, Object-Oriented Design

Databases: PostgreSQL, MySQL, Oracle, MongoDB, Complex SQL, NoSQL Querying, Schema Design

Cloud & DevOps: Docker, AWS, Linux, CI/CD, Git, Shell Scripting, CLI Automation

Monitoring & Tools: Jenkins, JUnit, Logging & Diagnostics, Postman, npm, Composer

Workflow & PM: Agile/Scrum, Jira, Code Review, Technical Documentation, Cross-functional Collaboration
