

Ryan Cho

Senior Full Stack Engineer | React, Next.js & TypeScript

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack engineer with 8+ years building scalable React and Next.js applications in regulated finance and enterprise SaaS environments. Deep expertise in TypeScript, TanStack Query, component architecture, and accessible UX. Proven record architecting performant front-end systems, mentoring engineers, and partnering with product and design teams to deliver high-visibility digital products in Agile settings.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led migration of legacy investor dashboards to **Next.js App Router** and **TypeScript**, cutting average page load times by 40% and accelerating feature delivery across three product squads.
- Architected a shared **React component library** and design system adopted by 12+ teams, standardizing **accessible UI patterns** and reducing duplicate front-end code by 35%.
- Implemented a **TanStack Query** data layer with optimistic updates and cache invalidation, delivering **sub-200ms perceived latency** on portfolio views for 50K+ monthly active users.
- Partnered with UX designers to translate Figma specs into **responsive, WCAG 2.1-compliant interfaces**, improving usability scores by 28% on critical investor workflows.
- Drove **front-end performance optimization** through code splitting, lazy loading, and Core Web Vitals tuning, achieving **Lighthouse scores above 95** on production builds.
- Established **React testing standards** with Jest, React Testing Library, and Playwright, raising critical-path coverage to 85% and reducing regression defects by 30%.
- Mentored **four junior and mid-level engineers** on modern front-end architecture, code review practices, and TypeScript adoption, shortening onboarding cycles by six weeks.
- Participated in **cross-functional architecture reviews** with product and platform teams, shaping API contracts to support efficient client-side data hydration and rendering.
- Delivered **enterprise SaaS features** in two-week Agile sprints, shipping production releases with zero critical incidents over eight consecutive quarters.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built **React and TypeScript** applications for global markets teams, supporting **1,200+ internal users** across risk and compliance workflows.
- Developed **responsive web interfaces** for regulatory reporting tools, integrating REST APIs and real-time feeds with **sub-second refresh cycles** on high-density dashboards.
- Collaborated with product owners and UX stakeholders to refine **user-centered workflows**, reducing manual data entry steps by 45% across audit preparation modules.
- Implemented **component-based architecture** with shared UI modules, enabling five development teams to reuse patterns and shorten feature delivery by three weeks per release.
- Optimized **JavaScript bundle sizes** and rendering performance on dashboards displaying 10K+ row datasets using virtualized tables and memoization strategies.
- Contributed to **Agile/Scrum delivery** and sprint planning, shipping 20+ production features annually with on-time completion rates above 90%.
- Conducted **code reviews** and documented front-end best practices, increasing TypeScript strict-mode adoption from 40% to 95% across the codebase.

- Integrated **accessibility standards** into banking applications, resolving WCAG violations and passing internal compliance audits without rework.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React components** for a hospitality SaaS platform, enabling real-time order tracking used by **200+ restaurant partners**.
- Implemented **REST API integrations** with Node.js middleware, reducing order sync latency from eight seconds to under two seconds.
- Wrote **unit and integration tests** with Jest, achieving 75% coverage on payment and checkout modules.
- Collaborated with senior engineers in **Agile sprints**, delivering six feature releases during the internship tenure.
- Refactored legacy jQuery views into **modular TypeScript components**, improving maintainability and cutting open bug backlog items by 25%.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive marketing websites** with HTML, CSS, and JavaScript, improving mobile engagement by 35% across foundation campaigns.
- Implemented **CMS-driven content workflows** enabling non-technical staff to publish updates without developer support.
- Optimized **page performance** through image compression and lazy loading, reducing average load time from 4.2s to 1.8s.
- Integrated **donation and newsletter forms** with third-party APIs, processing 500+ submissions during the engagement period.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), TanStack Query, TanStack Router, HTML5, CSS3, Tailwind CSS, Responsive Design, WCAG Accessibility, Component Libraries, Design Systems, Storybook, Redux, Zustand

Backend: Node.js, Express, REST APIs, GraphQL, Java, Spring Boot

Databases: PostgreSQL, MongoDB, Redis, SQL

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Vercel

Monitoring & Tools: Jest, React Testing Library, Playwright, Cypress, Lighthouse, Webpack, Vite, ESLint, Prettier, Chrome DevTools

Workflow & PM: Agile/Scrum, Jira, Confluence, Figma, Code Reviews, Technical Mentorship, Cross-functional Collaboration
