PROFESSIONAL SUMMARY

Full-stack software engineer with 8+ years building enterprise web and mobile platforms across finance and investment operations. Skilled in React, React Native, Java Spring Boot, and AWS microservices with RESTful API design at scale. Uses AI-assisted development and prompt engineering as core daily workflow tools to accelerate delivery and raise code quality. Proven collaborator with product owners and cross-functional teams on microservices architecture and cloud-native systems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **full-stack development** of an investment portfolio management platform using React and Java Spring Boot microservices on AWS, serving analysts across multiple asset classes.
- Architected a **RESTful API layer** connecting a React Native mobile client to backend services, enabling field teams to access real-time portfolio data and operational workflows.
- Integrated **AI-assisted development tooling** into team delivery workflows, applying systematic prompt engineering to shorten feature cycles and improve implementation consistency.
- Designed **scalable microservices** for trade reporting and compliance workflows, handling high-volume financial data with MySQL-backed persistence and optimized SQL access patterns.
- Built cross-platform **React Native features** for portfolio monitoring, collaborating daily with the product owner on sprint targets, priorities, and release planning.
- Deployed **containerized Spring Boot services** on AWS through CI/CD pipelines, improving deployment reliability and rollback readiness for production releases.
- Mentored engineers on **React architecture**, API design patterns, and cloud deployment practices, raising team standards across three concurrent product workstreams.
- Optimized **database schemas and SQL queries** powering analytics dashboards, reducing report generation latency for operations and portfolio management teams.
- Established **REST API versioning and documentation standards** adopted across backend service teams, improving integration consistency for internal and partner consumers.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **React-based trading analytics dashboards** for fixed-income desks, translating complex market data into actionable portfolio views for desk analysts.
- Built **Java Spring Boot REST APIs** supporting trade lifecycle management, integrating with internal messaging systems and downstream reconciliation services.
- Contributed to a **microservices migration initiative** decomposing legacy monolith modules into independently deployable Spring services on AWS infrastructure.
- Implemented **automated testing pipelines** for API endpoints and front-end components, improving release confidence across quarterly deployment cycles.
- Collaborated with technology leads and business stakeholders on **regulatory reporting features** serving operations and compliance teams across global markets.
- Designed **SQL queries and data models** for MySQL databases supporting trade capture, settlement workflows, and operational reporting requirements.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for a restaurant inventory management web application, improving staff workflows for check tracking and table management.
- Developed **RESTful API endpoints** in Node.js and Express connecting front-end interfaces to PostgreSQL-backed data stores.
- Participated in **agile sprint ceremonies** and daily standups, delivering assigned features within two-week iteration cycles alongside senior engineers.
- Refactored legacy JavaScript modules into a **reusable component library**, reducing duplicate UI code across three application views.
- Implemented **unit tests** for critical API routes and React components, contributing to an improved code coverage baseline for the engineering team.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for a nonprofit foundation site using HTML, CSS, and JavaScript, ensuring accessibility across desktop and mobile browsers.
- Implemented **contact forms and CMS integrations** enabling foundation staff to update program information without developer assistance.
- Collaborated with design stakeholders to translate **wireframes into functional components** aligned with organizational branding guidelines.
- Optimized **page load performance** through asset compression and lazy loading, improving initial render times for content-heavy landing pages.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, React Native, JavaScript, TypeScript, HTML5, CSS3, Express.js

Backend: Java, Spring Boot, Python, Node.js, RESTful API Design, Microservices Architecture

Databases: MySQL, SQL, PostgreSQL, Schema Design, Query Optimization

Cloud & DevOps: AWS, Azure, Docker, CI/CD Pipelines, Cloud Deployment, Containerization

Monitoring & Tools: Git, Postman, Jira, AI-Assisted Development Tools, Prompt Engineering Workflows

Workflow & PM: Agile/Scrum, Cross-Functional Collaboration, Technical Mentorship, Stakeholder Communication
