

Ryan Cho

Senior Software Engineer | Frontend & UI Development

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Senior software engineer with 8+ years building responsive, high-performance web applications in React, TypeScript, and modern JavaScript. Led design and delivery of reusable UI component libraries, REST API integrations, and accessible interfaces across enterprise financial platforms. Partners with UX, backend, and product teams in Agile environments to ship scalable front-end systems with strong performance, cross-browser compatibility, and maintainable architecture.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and maintained a **reusable React component library** adopted across 12+ internal dashboards, reducing UI build time and enforcing consistent design patterns.
- Built **responsive, high-performance web interfaces** for portfolio analytics tools serving 500+ daily users, optimizing bundle size and render latency through code splitting and memoization.
- Integrated front-end applications with **RESTful APIs and JSON services**, implementing resilient error handling, caching, and optimistic updates for real-time financial data displays.
- Partnered with UX designers and backend engineers in **Agile/Scrum sprints** to translate wireframes into accessible, cross-browser compatible UI without sacrificing development velocity.
- Drove **WCAG 2.1 accessibility improvements** across primary workflows, adding keyboard navigation, ARIA labels, and contrast fixes that expanded usability for assistive technology users.
- Led **frontend performance audits** using Lighthouse and Chrome DevTools, resolving bottlenecks that improved Core Web Vitals scores across key application routes.
- Mentored two junior engineers on **React best practices**, code review standards, and component testing patterns, elevating team delivery quality and reducing production defects.
- Refactored legacy jQuery modules into a **modern React/TypeScript architecture**, improving maintainability and enabling faster feature iteration for capital markets tooling.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **React-based trading and risk dashboards** for internal banking teams, delivering responsive layouts and data-rich visualizations aligned with enterprise UI standards.
- Implemented **REST API integrations** with backend microservices, parsing JSON payloads and orchestrating client-side state for multi-step financial workflows.
- Built **reusable UI components** for form validation, data tables, and modals used across three analyst-facing applications, standardizing interaction patterns.
- Optimized **frontend performance** for high-volume data grids through virtualization and selective rendering, keeping interaction smooth under large dataset loads.
- Collaborated with cross-functional stakeholders including **business analysts and QA** in Agile ceremonies to clarify requirements and ship features on predictable release cadences.
- Enforced **Git-based version control** workflows and participated in peer code reviews, catching regressions early and maintaining clean, scalable codebases.
- Resolved **cross-browser compatibility issues** in legacy and modern browsers, ensuring consistent behavior for globally distributed remote teams.
- Contributed to **HTML5/CSS3 responsive layouts** for mobile-friendly internal tools, supporting analysts accessing platforms from varied screen sizes.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **responsive web pages** with React, JavaScript, and CSS3, translating design mockups into production-ready interfaces for a document-management platform.
- Integrated UI features with **REST APIs**, handling JSON responses and loading states to support reliable client-side data presentation.
- Created **reusable React components** for navigation, forms, and notifications, improving consistency across application screens.
- Participated in **Agile standups and code reviews**, fixing frontend bugs and applying ES6+ JavaScript patterns under senior engineer guidance.
- Improved **page load performance** by lazy-loading assets and optimizing component re-renders on data-heavy listing views.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **HTML5/CSS3 landing pages** and interactive sections for a nonprofit foundation site, ensuring responsive layouts across desktop and mobile devices.
- Implemented **JavaScript enhancements** for dynamic content updates and form interactions, improving visitor engagement on key campaign pages.
- Collaborated remotely with stakeholders to **translate design requirements** into clean, maintainable front-end code delivered on tight timelines.
- Applied **Git version control** for feature branches and deployments, following basic code review practices with the small engineering team.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Next.js, responsive web design, WCAG accessibility, component architecture, performance optimization

Backend: Node.js, REST APIs, JSON, Express, API integration patterns

Databases: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, CI/CD pipelines, cloud-hosted web applications

Monitoring & Tools: Git, Webpack, Jest, React Testing Library, Chrome DevTools, Lighthouse

Workflow & PM: Agile/Scrum, Jira, code reviews, cross-functional collaboration, technical documentation
