### PROFESSIONAL SUMMARY

---

Full stack software engineer with 7 years building customer-facing web applications in regulated fintech environments. Delivers end-to-end features across React frontends, REST APIs, and microservices while partnering with product, design, and analytics teams. Experienced in conversion-focused UX, experimentation, performance optimization, and on-call ownership for high-availability production systems.

### WORK EXPERIENCE

---

#### Software Engineer

May/2022 - May/2026

##### Aspen Capital

Remote | 10th Floor, New York

- Led **full-stack development** of investor-facing onboarding and multi-step application flows using **React, TypeScript, and Node.js**, improving form completion through iterative UX refinements and targeted performance work.
- Built and maintained **REST APIs and microservices** backing funding and account workflows, enabling modular expansion across **three investment product lines** without disrupting live traffic.
- Partnered with product and design to ship **A/B experiments** on high-traffic conversion surfaces, using feature flags and analytics instrumentation to measure funnel lift and guide rollout decisions.
- Reduced **p95 page load latency** on application pages through code splitting, CDN caching, and backend query optimization, strengthening Core Web Vitals on customer-facing paths.
- Owned **on-call rotation** and production monitoring for owned services, triaging latency spikes and error-rate anomalies through alerting dashboards, runbooks, and durable root-cause fixes.
- Contributed to architectural direction for a **next-generation multi-product application platform**, defining service boundaries, shared UI libraries, and API contracts for long-term scalability.
- Integrated **ML-driven personalization** into rate and offer presentation layers, collaborating with data science on model upgrades, graceful fallbacks, and safe incremental deployments.
- Strengthened release confidence by expanding **CI/CD pipelines**, automated test coverage, and staged rollouts across fortnightly production deployment cycles.

#### Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

##### BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **end-to-end features** on customer-facing banking portals using **React and Java microservices** within a regulated, high-availability production environment.
- Built **API integrations** connecting frontend application flows to core lending and account services, ensuring compliance with audit trails and data governance requirements.
- Monitored **production latency and error metrics** for mission-critical transaction paths, partnering with platform teams to resolve incidents and prevent recurrence.
- Collaborated with product and UX to refine **multi-step application journeys**, reducing drop-off through usability testing, progressive disclosure, and controlled feature releases.
- Implemented **experimentation infrastructure** supporting staged rollouts and feature toggles across regional banking products serving high daily transaction volume.
- Optimized **database queries and service endpoints** powering rate inquiry and account-opening workflows, improving responsiveness under peak load conditions.
- Mentored summer analysts on **full-stack practices**, secure coding standards, and code review expectations within financial services delivery workflows.

## Software Engineering Intern

Jun/2018 - May/2019

### Chexology

Remote | 17th Floor, New York

- Developed **customer-facing web features** with React and Redux for a B2B SaaS platform, supporting onboarding flows used by restaurant partners across multiple markets.
- Implemented **REST API consumers** and form validation for multi-step merchant registration, improving data capture accuracy at submission checkpoints.
- Partnered with product and design in sprint planning, translating wireframes into **responsive, accessible UI components** aligned with brand and usability standards.
- Expanded **unit and integration test** coverage for frontend modules, contributing to safer iterative releases throughout the internship.
- Profiled and resolved **frontend performance bottlenecks** on dashboard views serving thousands of daily active merchant users.

### Web Developer

Sep/2017 - Nov/2017

### Bayesquare Foundation

Remote | New York

- Built **responsive marketing and donation pages** using HTML, CSS, and JavaScript for a nonprofit foundation digital presence.
- Integrated **third-party payment and newsletter APIs** to streamline supporter conversion paths on campaign landing pages.
- Collaborated with stakeholders to iterate on **page layouts and calls to action** based on analytics feedback and usability goals.
- Maintained **cross-browser compatibility** and mobile-first responsiveness across all public-facing site sections.

## EDUCATION

---

### New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

## SKILLS

---

**Frontend:** React, TypeScript, JavaScript, Redux, HTML5, CSS3, Responsive Design, Web Performance, A/B Testing, Feature Flags

**Backend:** Node.js, Java, REST APIs, Microservices, GraphQL, API Design

**Databases:** PostgreSQL, MySQL, Redis, MongoDB

**Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD, Jenkins, Terraform

**Monitoring & Tools:** Datadog, Grafana, Sentry, Prometheus, Git, Jest, Cypress

**Workflow & PM:** Agile/Scrum, Jira, Confluence, Cross-functional Collaboration, Technical Documentation
