

Ryan Cho

Senior Software Engineer | .NET & Cloud Platforms

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full-stack software engineer with 8+ years building scalable backend systems and cloud-native applications in finance and SaaS. Expert in C#, .NET, Python, and JavaScript architecting RESTful APIs, microservices, and event-driven pipelines on AWS. Proven track record optimizing application performance, implementing CI/CD automation, and mentoring developers across Agile teams. Combines algorithmic problem-solving with cross-functional collaboration to deliver secure, high-availability platforms.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and maintained **.NET Core microservices** supporting portfolio analytics and trade execution workflows, sustaining **sub-100ms API latency** across distributed finance platform components.
- Designed **RESTful APIs** and event-driven integrations using **C#**, Python, and AWS **Lambda**, **SQS**, and **SNS** to process high-volume market data with **99.9% uptime**.
- Led migration of legacy monolithic services to **containerized deployments** on AWS with **ECR**, Application Load Balancer, and **RDS**, reducing deployment cycles from days to hours.
- Built and optimized **CI/CD pipelines** with automated testing and staged rollouts, enabling **15+ weekly releases** while enforcing standards through structured **code reviews**.
- Implemented **DynamoDB** and **S3-backed** data pipelines with **Kinesis Data Streams** and **Firehose** for real-time ingestion and archival of trading signals and audit logs.
- Mentored **3 junior engineers** on software architecture patterns, **Agile/Scrum** practices, and performance profiling, improving delivery consistency and reducing production defects.
- Collaborated with product managers and architects to define **technical requirements**, evaluate design alternatives, and mitigate **security and scalability risks** in cloud-based applications.
- Diagnosed production bottlenecks using **CloudWatch** metrics and custom dashboards, improving **API throughput by 40%** without over-provisioning infrastructure.
- Enforced **coding best practices** and efficient **algorithm implementations** across backend services, including optimized data structures for portfolio rebalancing computations.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full-stack features** for internal banking platforms using **C#**, **.NET**, JavaScript, and Python across **Agile sprint** cycles with cross-functional teams.
- Built **RESTful microservices** integrating with core banking systems, applying **clean code** principles and thorough documentation for long-term maintainability.
- Participated in **software development planning** and system design sessions with architects and product stakeholders to align technical roadmaps with business objectives.
- Implemented **AWS Lambda** and **Step Functions** workflows automating reconciliation and reporting processes, reducing manual operational effort by **30%**.
- Conducted **code reviews** and paired with junior developers to enforce team **coding standards** and improve algorithm efficiency in data processing modules.
- Optimized **RDS-backed** application queries and caching layers, improving dashboard and batch job performance for analyst-facing tools.
- Deployed cloud-based services with **S3** storage and **SQS** message queues, ensuring **high availability** during peak trading periods.

- Identified weaknesses in legacy integration points and recommended **mitigation strategies**, preventing downtime during regulatory reporting cycles.
- Integrated and tested program components end-to-end, validating outputs against **sample datasets** to ensure accuracy before production release.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **full-stack web features** with JavaScript, Python, and **REST APIs** supporting inventory and compliance workflows for restaurant clients.
- Wrote **clean, well-documented code** following team style guides and participated in **Agile stand-ups**, sprint planning, and retrospectives.
- Assisted senior engineers in **code reviews**, learning scalable application design, error handling, and industry best practices.
- Integrated third-party APIs and optimized database queries, improving **response times by 25%** on key reporting endpoints.
- Collaborated on **algorithm implementations** for data validation and duplicate detection across large menu datasets.
- Tested integrated program modules with structured datasets, verifying output correctness before deployment to staging.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** and interactive components for nonprofit fundraising campaigns using modern **JavaScript** and CSS.
- Implemented backend integration with **REST APIs** to manage donor data and event registrations across campaign workflows.
- Applied **clean coding practices** and version control workflows within a small **remote Agile** team.
- Optimized front-end performance and accessibility, improving **page load speed** for mobile users across campaign landing pages.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: JavaScript, TypeScript, React, HTML5, CSS3, Bootstrap

Backend: C#, .NET Core, .NET Framework, Python, Node.js, RESTful APIs, Microservices

Databases: PostgreSQL, SQL Server, RDS, DynamoDB, Redis

Cloud & DevOps: AWS (Lambda, S3, SQS, SNS, Step Functions, ECR, ALB, NLB, WAF), Docker, CI/CD, GitHub Actions, Terraform

Monitoring & Tools: CloudWatch, Kinesis, Firehose, Grafana, Splunk, Jira

Workflow & PM: Agile, Scrum, Sprint Planning, Code Review, Technical Mentorship, Cross-functional Collaboration
