

Ryan Cho

Senior Software Engineer | .NET, Cloud & Full-Stack Development

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software engineer with 8+ years building scalable full-stack applications in financial services and SaaS. Expertise in .NET, C#, Python, and JavaScript with deep experience designing RESTful APIs, microservices, and AWS cloud architectures. Proven track record leading code reviews, mentoring developers, and delivering high-availability systems through Agile delivery and CI/CD automation.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and maintained **microservices-based platform services** in **.NET Core** and **C#**, supporting portfolio management workflows with consistent uptime across production environments
- Designed and deployed **RESTful APIs** integrated with **AWS Lambda**, **S3**, and **RDS**, streamlining analytics pipelines for investment operations teams
- Implemented **CI/CD pipelines** with containerized deployments through **Elastic Container Registry**, enabling automated releases and reducing manual deployment effort
- Led **code reviews** and **mentored junior engineers**, establishing team coding standards and improving pull request quality across the engineering group
- Built event-driven orchestration using **AWS Step Functions**, **SQS**, and **SNS** to coordinate asynchronous settlement and notification workflows across distributed services
- Optimized application performance through query tuning, caching, and **CloudWatch** observability, resolving production bottlenecks before they affected end users
- Collaborated with architects and product managers to define **technical requirements** and system design for new capital management capabilities
- Developed **Python** ingestion pipelines consuming **Kinesis Data Streams** and **Firehose** for real-time market data processing and downstream reporting
- Configured **Application Load Balancer** routing and **Web Application Firewall** policies to strengthen security posture for customer-facing web applications

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed and maintained **.NET** backend services for trade settlement and risk reporting systems supporting global front-office and operations teams
- Built **RESTful APIs** connecting trading tools with downstream reconciliation platforms, ensuring reliable data exchange across **microservices**
- Participated in **Agile/Scrum** ceremonies including sprint planning and retrospectives, delivering features within consistent two-week iteration cycles
- Implemented **algorithm-driven** pricing and reconciliation logic in **C#**, improving accuracy of daily batch processing for fixed-income instruments
- Deployed cloud-native components on **AWS** using **Lambda**, **DynamoDB**, and **S3** for scalable document storage and serverless compute workloads
- Conducted **code reviews** and enforced **coding standards**, reducing defect volume reaching QA through structured review practices
- Analyzed production incidents, identified root causes, and recommended **mitigation strategies** for recurring failures in payment processing workflows

- Collaborated with architects and business analysts to translate regulatory requirements into **technical specifications** and implementation plans

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **JavaScript** and **React** front-end features for a restaurant technology platform used by client locations nationwide
- Developed **Python** scripts for data extraction and reporting, automating weekly analytics workflows previously handled manually
- Participated in **Agile** stand-ups and sprint delivery, contributing production-ready code alongside senior engineers
- Integrated third-party **REST APIs** for payment and inventory data, improving order synchronization reliability across backend services
- Documented API endpoints and deployment procedures, supporting smoother onboarding for subsequent engineering hires

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed responsive **web pages** using HTML, CSS, and **JavaScript** for a nonprofit organization's public-facing website
- Implemented form validation and backend integration for **donor registration workflows**, improving data capture reliability
- Optimized page load performance through asset minification and image compression techniques
- Collaborated remotely with stakeholders to gather requirements and iterate on design feedback across release cycles

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: JavaScript, TypeScript, React, HTML5, CSS3, Angular

Backend: .NET, C#, Python, Node.js, RESTful APIs, Microservices

Databases: PostgreSQL, RDS, DynamoDB, SQL Server, Redis

Cloud & DevOps: AWS (Lambda, S3, SQS, SNS, Step Functions, ECR, Kinesis, Firehose), Docker, CI/CD, GitHub Actions, Terraform

Monitoring & Tools: CloudWatch, Application Load Balancer, Network Load Balancer, Web Application Firewall, Git, Jira

Workflow & PM: Agile, Scrum, Sprint Planning, Code Review, Technical Mentorship
