

Ryan Cho

Senior Software Engineer | Enterprise Systems & Integration

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software engineer with nine years designing, enhancing, and supporting production enterprise systems in financial services and investment platforms. Owns REST API and microservice integrations, resolves complex middleware and authentication issues, and leads testing and architecture-fit modifications. Mentors engineers, collaborates with business stakeholders on requirements and estimates, and participates in rotating on-call support.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **system enhancement initiatives** across portfolio management platforms, evaluating existing architecture and delivering modular modifications that preserved upstream dependencies for **40+ internal users**.
- Designed and maintained **REST APIs** supporting service-to-service integration, authentication flows, and downstream reporting pipelines with documented contracts consumed by **6 partner teams**.
- Served on a **rotating on-call rotation**, diagnosing production incidents, restoring service within SLA targets, and publishing root-cause analyses that reduced repeat failures across critical batch workflows.
- Built **automated test plans** and regression suites validating application behavior across release cycles, catching integration defects before production deployment.
- Integrated **identity and access management** patterns for SSO-enabled internal tooling, aligning session management and role-based access with security review requirements.
- Mentored **3 junior engineers** on middleware design, code review standards, and incident response practices while delegating workstreams on cross-team enhancement projects.
- Partnered with product and operations stakeholders to **scope user requests**, estimate system impacts, and prioritize backlog items aligned with quarterly business objectives.
- Implemented **CI/CD pipelines in Azure DevOps** for build, test, and release automation, shortening deployment cycles and improving traceability across environment promotions.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Supported **production trading and operations systems** for a global banking platform, resolving complex technical issues and coordinating fixes across development and infrastructure groups.
- Developed **Java and Spring Boot services** extending departmental applications, constructing modules from programming specifications while preserving existing system architecture constraints.
- Executed **test plans and validation procedures** for application releases, inspecting code, documentation, and implementation plans for accuracy before sign-off.
- Built **SQL scripting utilities** and reporting extracts analyzing user request data to determine scope, effort estimates, and downstream system impacts.
- Provided **technical mentorship** to associates within the work group, leading knowledge-sharing sessions on API integration patterns and troubleshooting methodologies.
- Collaborated with **cross-functional teams** to gather business requirements and ensure middleware integrations aligned with regulatory and operational needs.
- Triageed and resolved **API and authentication issues** affecting internal applications, partnering with security teams on SAML and enterprise identity configurations.
- Led **major enhancement projects**, delegating tasks across analysts and ensuring deliverables met quality standards within Agile sprint timelines.

- Contributed to **ServiceNow ticketing workflows** and change management processes, documenting incidents and maintenance requirements for audit-ready production support.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **full-stack features** for a document verification platform using React and Node.js, shipping user-facing workflows that improved client onboarding efficiency.
- Implemented **REST API endpoints** connecting frontend components to backend services with structured error handling and input validation.
- Wrote **unit and integration tests** covering core application paths, supporting reliable releases during iterative sprint delivery.
- Participated in **Agile ceremonies** and code reviews, incorporating feedback to align implementations with team coding standards.
- Resolved **production defects** reported by customers, reproducing issues locally and deploying fixes through established release procedures.
- Documented **API contracts and deployment steps** enabling smoother handoffs between engineering and support functions.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for a nonprofit foundation site using HTML, CSS, and JavaScript, delivering accessible layouts aligned with stakeholder branding requirements.
- Integrated **third-party form and donation widgets** into the site architecture while maintaining cross-browser compatibility.
- Collaborated with **remote stakeholders** to translate content requirements into maintainable front-end components.
- Performed **manual testing** across devices and browsers before launch, documenting defects and verification results.
- Handed off **deployment documentation** outlining hosting configuration and update procedures for ongoing maintenance.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Responsive Design

Backend: Java, Spring Boot, Node.js, REST APIs, Microservices, PowerShell Scripting

Databases: SQL, PostgreSQL, MySQL, Query Optimization, Stored Procedures

Cloud & DevOps: Azure DevOps, CI/CD Pipelines, Docker, Git, Environment Promotion

Monitoring & Tools: ServiceNow, Okta, SAML/SSO, Application Logging, Incident Triage

Workflow & PM: Agile, Scrum, Waterfall, SDLC, JIRA, Cross-Functional Collaboration
