

# Ryan Cho

## Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

### PROFESSIONAL SUMMARY

---

Full-stack engineer with 7+ years building web applications, data pipelines, and backend services across fintech and capital markets. Experienced in React, JavaScript, Python, and SQL with end-to-end ownership from design through production. Led cross-functional delivery, mentored developers, and integrated AI-ready workflows into scalable SaaS platforms while improving data quality and developer experience.

### WORK EXPERIENCE

---

#### Software Engineer

May/2022 - May/2026

##### Aspen Capital

Remote | 10th Floor, New York

- Led full-stack development of **React and TypeScript** dashboards serving portfolio managers across **50+ active accounts**, presenting complex financial data through clear, consumable interfaces.
- Owned **end-to-end delivery** of REST APIs in **Python** supporting trade reconciliation workflows, reducing manual review effort through automated validation and exception routing.
- Designed **data ingestion pipelines** that normalized vendor feeds into SQL schemas, improving reporting accuracy across daily batch jobs and downstream analytics.
- Built **CI/CD workflows** with Docker and GitHub Actions, enabling safe weekly production releases and a faster developer feedback loop across the platform team.
- Partnered with product and operations stakeholders to scope features, communicate technical tradeoffs, and prioritize roadmap work using **usage metrics and production signals**.
- Mentored two junior engineers on **React architecture, code review standards**, and testing practices, accelerating their contribution to core platform modules.
- Integrated **machine learning scoring outputs** from research teams into production web workflows, exposing model results through intuitive UI components for analyst review.
- Optimized **MySQL query performance** and indexing for high-volume ledger tables, reducing latency on portfolio views used during daily trading operations.
- Established shared frontend patterns and component libraries that improved consistency across **multiple product surfaces** and shortened feature delivery cycles.

#### Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

##### Summer Analyst,

##### BNP Paribas

Remote | Seventh Avenue, New York

- Developed **JavaScript and React** interfaces for internal risk dashboards used by trading desk analysts across **multiple asset classes**.
- Built **Python services** and SQL stored procedures supporting regulatory reporting pipelines with strict audit and data lineage requirements.
- Collaborated with technology, compliance, and front-office stakeholders to deliver features under **tight release windows** in a high-speed cross-functional environment.
- Implemented backend integration layers connecting legacy banking systems to modern **REST APIs**, enabling incremental platform modernization without disrupting core operations.
- Automated data validation checks across **SQL Server** batch jobs, catching anomalies before downstream consumption and reducing recurring production incidents.
- Contributed to team CI/CD adoption by documenting build pipelines and improving shared deployment templates used across **three application teams**.
- Presented complex trade and position data through simplified UI flows, helping non-technical users interpret **multi-source datasets** quickly and confidently.

- Supported on-call rotation and incident response, driving root-cause analysis and durable fixes for platform issues affecting **daily reporting cycles**.
- Evaluated new frameworks and tooling for internal web applications, recommending adoption paths that balanced delivery speed with long-term maintainability.

## Software Engineering Intern

Jun/2018 - May/2019

### Chexology

Remote | 17th Floor, New York

- Built **React components** and responsive layouts for customer-facing web features supporting restaurant compliance workflows.
- Implemented REST API integrations in **JavaScript** connecting frontend forms to backend services for digital receipt management.
- Wrote unit tests and participated in code reviews, improving consistency across the **shared component library**.
- Contributed bug fixes and performance improvements to existing **Node.js** endpoints, reducing error rates during peak usage periods.
- Collaborated with designers and product owners in agile sprints, translating wireframes into **accessible HTML and CSS** implementations.

## Web Developer

Sep/2017 - Nov/2017

### Bayesquare Foundation

Remote | New York

- Developed **HTML, CSS, and JavaScript** pages for nonprofit fundraising campaigns with mobile-friendly layouts across devices.
- Integrated third-party donation APIs and form handlers, enabling reliable **payment submission flows** for seasonal fundraising drives.
- Maintained content updates and styling fixes on the organization website during a **rapid launch timeline**.
- Coordinated with remote stakeholders to gather requirements and iterate on page structure based on **user feedback**.
- Applied SEO and accessibility improvements to public pages, supporting broader reach for foundation initiatives.

## EDUCATION

---

### New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

## SKILLS

---

**Frontend:** HTML, CSS, JavaScript, TypeScript, React, Redux, Responsive Design, Web Accessibility

**Backend:** Python, Ruby, Node.js, REST APIs, GraphQL, Microservices, Data Pipelines

**Databases:** MySQL, SQL Server, PostgreSQL, Query Optimization, Schema Design, Stored Procedures

**Cloud & DevOps:** AWS, Docker, CI/CD, GitHub Actions, Terraform, Linux

**Monitoring & Tools:** Datadog, Grafana, Git, Jest, Pytest, ESLint, Postman

**Workflow & PM:** Agile/Scrum, Jira, Cross-functional Collaboration, Technical Mentorship, Stakeholder Communication
