

Ryan Cho

Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with 7+ years building web applications, data pipelines, and production systems across fintech and SaaS. Proficient in React, JavaScript, Python, Ruby, and SQL databases with end-to-end ownership from architecture through deployment. Known for translating complex data into intuitive UIs, leading cross-functional delivery, mentoring engineers, and driving CI/CD and quality practices that scale with product growth.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led end-to-end delivery of a **React and Python** platform for portfolio operations teams, owning architecture, implementation, and **production deployment** through on-call support.
- Designed **RESTful APIs** and **data ingestion pipelines** consolidating trade and reference data from five upstream systems, reducing manual reconciliation effort by **40%**.
- Built responsive **UI dashboards** that presented complex financial metrics in consumable views, shortening stakeholder decision cycles from days to **under four hours**.
- Partnered with product and analytics stakeholders to define requirements and ship features on **two-week release cycles** without compromising quality or regression coverage.
- Established **CI/CD pipelines** with automated testing and staged rollouts, cutting deployment time from hours to **15 minutes** while maintaining **99.9% uptime**.
- Mentored **three junior engineers** on React patterns, code review practices, and production debugging, accelerating their path to independent feature ownership.
- Refactored legacy **Ruby services** into modular Python microservices, improving maintainability and enabling **horizontal scaling** during peak reporting windows.
- Introduced **observability tooling** including structured logging and metrics dashboards, reducing mean time to detect production incidents by **50%**.
- Drove cross-team technical design reviews for SaaS integrations, influencing **platform standards** adopted across two engineering groups.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full-stack web applications** using JavaScript, React, and Python for risk and operations teams across global markets divisions.
- Built **SQL Server** stored procedures and reporting layers supporting daily regulatory submissions processing **\$2B+** in daily transaction volume.
- Owned **end-to-end delivery** of a client-facing portal from tech stack selection through production, serving **500+ internal users** across three regions.
- Collaborated with cross-functional teams in **high-velocity sprints** to deliver BI dashboards translating complex derivatives data into actionable summaries.
- Implemented **MySQL** data models and ETL jobs synchronizing reference data, eliminating duplicate records and improving query performance by **35%**.
- Automated manual workflow steps with **Python scripts** and scheduled jobs, saving operations teams an estimated **20 hours per week**.
- Participated in **code reviews and design sessions**, mentoring interns on testing discipline and secure coding practices for financial systems.

- Integrated third-party APIs and internal services behind a unified **backend layer**, reducing integration defects by **30%** in subsequent releases.
- Contributed to **CI/CD adoption** by containerizing legacy applications and documenting deployment runbooks for the technology analyst rotation program.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React components** and **Node.js APIs** for a restaurant SaaS product used by **50+ client locations**.
- Translated design mockups into responsive **HTML/CSS** interfaces with consistent cross-browser behavior and accessibility improvements.
- Wrote **unit and integration tests** covering critical checkout flows, increasing test coverage from **45% to 78%** during the internship.
- Assisted in debugging production issues and deploying fixes through a **Git-based CI pipeline**, reducing average patch cycle time across releases.
- Collaborated with senior engineers on **MySQL schema** updates supporting new menu and inventory features without disrupting live tenants.
- Documented **API endpoints** and onboarding guides that shortened new developer environment setup to **under one day**.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built foundation website features with **HTML, CSS, and JavaScript**, improving page load performance by **25%** through asset optimization.
- Maintained content management workflows and deployed updates via **Git**, ensuring reliable publishing for nonprofit stakeholders.
- Integrated **donation forms** and email capture flows with third-party services, improving online engagement tracking visibility.
- Partnered with nonprofit leadership to simplify complex program information into **clear, accessible web content** for public audiences.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Redux, Responsive UI, Accessibility, Data Visualization

Backend: Python, Ruby, Node.js, REST APIs, GraphQL, Microservices, ETL Pipelines, Background Jobs

Databases: SQL Server, MySQL, PostgreSQL, Redis, Query Optimization, Schema Design, Stored Procedures

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform, Containerization, Infrastructure as Code

Monitoring & Tools: Datadog, Grafana, Prometheus, Structured Logging, Git, Jest, Pytest, Postman, Swagger

Workflow & PM: Agile, Scrum, Jira, Confluence, Cross-Functional Collaboration, Technical Design Reviews, Mentorship
