PROFESSIONAL SUMMARY

Software engineer with 7+ years delivering enterprise web applications and modern front-end experiences. Deep expertise in Angular, NgRx, RxJS, and TypeScript across financial and SaaS platforms. Builds accessible, responsive interfaces integrated with REST APIs, AI capabilities, and cloud-native services on AWS. Proven in CI/CD automation, Terraform infrastructure, performance optimization, and Agile cross-functional delivery.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **enterprise Angular applications** using standalone components, Signals, and modern template flow control for portfolio analytics tools used across multiple investment teams.
- Built and maintained a **shared UI component library** with Angular Material and custom SCSS aligned to an internal design system, improving accessibility compliance and reducing duplicate front-end code across three product surfaces.
- Implemented advanced **NgRx state management** with selectors, effects, reducers, and actions to coordinate complex data workflows, caching strategies, and optimistic updates on high-traffic dashboard views.
- Designed **RxJS data pipelines** leveraging Observable contracts, pipeable operators, and Subjects to synchronize real-time market feeds and REST API responses with consistent, low-latency UI updates.
- Partnered with back-end and **AI engineers** to integrate search, analytics, and recommendation APIs into customer-facing applications, translating model outputs into clear, actionable user experiences.
- Established **GitHub Actions CI/CD workflows** and Terraform modules for AWS deployments, enabling repeatable releases to ECS and Lambda services with automated linting and testing gates.
- Optimized **front-end performance** through lazy loading, change detection tuning, and browser profiling, improving responsiveness on data-heavy views across Chrome, Firefox, and Safari.
- Led **Agile sprint ceremonies** including estimation, planning, and production support rotations while mentoring developers on TypeScript strict-mode standards and code review practices.
- Monitored production workloads with **AWS CloudWatch, S3, and Step Functions**, diagnosing incidents and shipping targeted fixes that restored application stability within team SLA targets.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **enterprise banking web applications** with Angular and TypeScript for internal risk and trading platforms used by analysts across global offices.
- Integrated **RESTful APIs** with JWT authentication flows, managing authorization states and secure session handling for sensitive financial data displays.
- Contributed to **NgRx store architecture** for portfolio dashboards, implementing reducers and selectors to manage multi-step transaction workflows.
- Collaborated with architects and product owners in **Agile delivery cycles**, participating in sprint planning, demos, and cross-team integration testing.
- Built responsive UI components with **HTML, CSS, and SCSS** ensuring consistent rendering across browsers and adherence to corporate design standards.
- Supported **CI/CD pipeline** improvements and deployment automation for front-end assets to cloud-hosted environments.
- Documented technical specifications and led **knowledge-sharing sessions** on RxJS patterns and component testing strategies for the front-end guild.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **JavaScript and TypeScript features** for a SaaS compliance platform, contributing to user-facing workflows under senior engineer mentorship.
- Implemented UI components with **HTML and CSS** following responsive design patterns for tablet and desktop form factors.
- Consumed **REST APIs** to display real-time check and inventory data, handling loading states and error boundaries in the interface.
- Participated in **Git-based workflows** including feature branches, pull requests, and code reviews within an Agile team cadence.
- Wrote unit tests and assisted with **cross-browser debugging** for layout issues identified during QA cycles.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **web pages and interactive forms** for a nonprofit foundation site using HTML, CSS, and JavaScript with attention to mobile responsiveness.
- Integrated third-party **REST endpoints** to surface program and donation data dynamically across landing pages.
- Collaborated remotely with stakeholders to translate content requirements into **clean, accessible layouts** aligned with WCAG-oriented practices.
- Performed **cross-browser testing** and resolved rendering inconsistencies across Chrome, Safari, and Firefox.
- Maintained version-controlled source code with **Git**, deploying updates through a lightweight staging workflow.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: Angular, Angular Material, NgRx, RxJS, TypeScript, JavaScript (ES6+), HTML, CSS, SCSS, Standalone Components, Angular Signals, Responsive Design, Accessibility (WCAG)

Backend: RESTful APIs, Node.js, JWT Authentication, API Integration, Python

Databases: PostgreSQL, Aurora PostgreSQL, SQL

Cloud & DevOps: AWS (ECS, Lambda, S3, Step Functions), Terraform, GitHub Actions, CI/CD Pipelines

Monitoring & Tools: CloudWatch, Git, GitHub Copilot, Browser DevTools, ESLint

Workflow & PM: Agile, Scrum, Sprint Planning, Technical Documentation, Code Review, Mentoring
