PROFESSIONAL SUMMARY

Full stack software engineer with 4+ years delivering production web applications for finance and operations teams. Experienced building React and Angular interfaces, C#/.NET REST services, and SQL-backed workflows across AWS-hosted platforms. Skilled at translating stakeholder requirements into maintainable software, automating engineering processes, and resolving production issues in high-availability environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led full stack delivery of **internal operations dashboards** using React, TypeScript, and **C#/.NET Web APIs**, enabling engineering teams to track pipeline status across 12 business workflows.
- Architected and maintained **RESTful services** on AWS supporting data-driven decision tools used daily by 200+ operations and analytics stakeholders.
- Built **workflow automation** features that reduced manual approval cycles by 35% through configurable UI forms and SQL-backed state management.
- Partnered with data scientists and product owners to translate analytical models into **production-ready web interfaces** with reusable component libraries.
- Implemented **CI/CD pipelines** with Jenkins and Docker, cutting deployment lead time from days to under 2 hours while maintaining zero-downtime releases.
- Diagnosed and resolved **production incidents** across cloud and on-prem environments, restoring service availability within SLA targets for mission-critical applications.
- Designed **MS SQL Server** schemas and optimized queries powering analytics screens, improving report load times by 40% on high-volume datasets.
- Mentored 3 junior engineers on **UI/UX standards**, API design, and testing practices, elevating team delivery consistency across quarterly releases.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed and supported **full stack banking applications** with Angular, TypeScript, and .NET Core, serving technology and operations teams across global markets.
- Built **REST API** integrations connecting front-end modules to SQL Server databases processing thousands of daily transactions with audit-grade reliability.
- Delivered **data-intensive reporting interfaces** that consolidated trade and risk metrics for non-technical stakeholders, improving weekly review efficiency.
- Automated manual reconciliation workflows through **web-based tools**, reducing processing errors and saving analysts an estimated 15 hours per week.
- Supported **production deployments** on AWS and on-prem infrastructure, participating in release testing, documentation, and rollback procedures.
- Collaborated with cross-functional engineers to refine requirements and ship **maintainable, test-covered** features under strict regulatory timelines.
- Enhanced legacy **ASP.NET services** and modernized UI components, extending platform lifespan while improving page responsiveness by 30%.
- Contributed to **CI/CD adoption** using Jenkins pipelines, standardizing build validation and environment promotion across development teams.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React** and JavaScript features for a restaurant compliance platform, improving checkout UI responsiveness across mobile and desktop browsers.
- Integrated **REST API** endpoints with front-end state management, enabling real-time sync of inspection data for field users across 40+ client locations.
- Wrote **unit and integration tests** covering core user flows, increasing release confidence for a 5-person engineering team.
- Assisted in debugging **production issues** and documenting fixes, reducing repeat tickets for common edge cases.
- Built reusable **HTML/CSS components** aligned with design standards, accelerating feature delivery for upcoming sprint milestones.
- Participated in code reviews and agile ceremonies, gaining hands-on experience shipping software in a **remote SaaS environment**.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** with HTML, CSS, and JavaScript for a nonprofit foundation site, improving mobile accessibility for community programs.
- Configured content layouts and navigation structures supporting faster updates for **non-technical program staff**.
- Collaborated with stakeholders to clarify requirements and iterate on **UI feedback** within a 2-month delivery window.
- Optimized page load performance through **asset compression and caching**, achieving measurable improvements in Core Web Vitals scores.
- Maintained site deployments and resolved **cross-browser compatibility** issues to ensure consistent end-user experience.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Angular, TypeScript, JavaScript, HTML5, CSS3, Responsive UI, Component Architecture

Backend: C#, .NET Framework, .NET Core, ASP.NET Web API, REST API Design, Node.js, Python

Databases: Microsoft SQL Server, SQL, PostgreSQL, Query Optimization, Schema Design

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Jenkins, CI/CD, IIS, On-Prem Deployment

Monitoring & Tools: Application Troubleshooting, Log Analysis, Git, Postman, Swagger

Workflow & PM: Agile/Scrum, Stakeholder Collaboration, Technical Documentation, Production Support, Requirements Translation
