

Ryan Cho

Software Engineer — .NET & Full-Stack Development

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software engineer with experience building web applications, REST APIs, and system integrations across finance and SaaS environments. Skilled in C#, ASP.NET Core, React, and SQL with hands-on Agile delivery, code reviews, and cross-functional collaboration. Grounded in object-oriented design, API testing, and maintainable code practices from internships through production engineering roles.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Developed and maintained **ASP.NET Core Web APIs** supporting portfolio operations, applying **RESTful design** and structured error handling for downstream consuming applications across internal teams.
- Built **React and JavaScript** front-end modules integrated with .NET services, improving form workflows and data validation for analysts managing recurring reporting tasks.
- Supported **system integration** between internal platforms and third-party data providers through **JSON payload mapping**, request/response logging, and connectivity troubleshooting during release cycles.
- Refactored legacy service components using **object-oriented principles** and reusable abstractions, reducing duplicate logic and improving testability across three shared application modules.
- Authored and executed **unit and API tests** with xUnit and Postman collections, catching regressions early and strengthening confidence in deployment-ready builds.
- Resolved production defects through **SQL query analysis** and targeted debugging, restoring data consistency for time-sensitive financial reporting workflows.
- Participated in **Agile ceremonies**, sprint planning, and peer code reviews via Git pull requests, aligning feature delivery with product owners and QA stakeholders.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Contributed to **C# and .NET application** enhancements for internal banking tools, delivering small feature increments and maintenance updates within established team coding standards.
- Assisted with **Web API development** for service-to-service communication, including endpoint creation, authentication handling, and structured logging for operational traceability.
- Supported **relational database** tasks by writing T-SQL queries for data validation, troubleshooting record mismatches, and backing integration testing across connected systems.
- Helped integrate internal applications with **external vendor services** through REST endpoints, coordinating payload formats and error responses with senior developers and business partners.
- Participated in **code refactoring** and defect resolution efforts, applying clean code practices and SOLID-oriented patterns to improve maintainability of shared components.
- Executed **API and regression testing** during sprint cycles, documenting issues and verifying fixes alongside QA analysts before production releases.
- Collaborated in **Agile delivery** using JIRA and Azure DevOps, attending stand-ups, backlog refinement, and retrospectives while tracking work through branching and pull request workflows.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **JavaScript and HTML/CSS** interface updates for customer-facing web pages, improving layout consistency and interactive form behavior across mobile and desktop views.

- Assisted in building and consuming **REST API endpoints**, handling JSON request bodies and response parsing to connect front-end components with backend services.
- Supported **debugging and code validation** by reproducing reported issues, tracing client-side errors, and verifying fixes through structured manual test passes.
- Applied **Git branching and pull request** workflows under senior engineer guidance, incorporating review feedback to align with team documentation and style conventions.
- Contributed to **small feature development** tasks in a collaborative Agile environment, participating in stand-ups and sprint planning to track assigned deliverables.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **HTML, CSS, and JavaScript** pages for organizational web properties, delivering responsive layouts and content updates aligned with stakeholder requirements.
- Integrated front-end components with **backend data services**, formatting JSON responses and handling basic client-side validation for user-submitted forms.
- Resolved **cross-browser compatibility** issues through targeted CSS adjustments and manual testing, improving consistent rendering across common desktop environments.
- Maintained site content and **source control** updates via Git, coordinating small revisions with team leads during iterative release cycles.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript, HTML, CSS, jQuery, TypeScript, responsive web design

Backend: C#, ASP.NET, .NET Core, REST APIs, Web APIs, object-oriented programming, SOLID principles

Databases: SQL Server, T-SQL, relational database concepts, query writing, data troubleshooting

Cloud & DevOps: Azure, Git, CI/CD pipelines, branching strategies, pull requests, code reviews

Monitoring & Tools: xUnit, Postman, API testing, unit testing, debugging, structured logging, XML, JSON

Workflow & PM: Agile, Scrum, Azure DevOps, JIRA, sprint planning, backlog refinement, technical documentation
