PROFESSIONAL SUMMARY

Full stack engineer with eight years building secure, scalable web applications across regulated finance and SaaS environments. Expert in Java, Spring Boot, Angular, and AWS with deep experience in event-driven architectures, PostgreSQL, and CI/CD automation. Proven track record leading agile delivery, mentoring engineers, and partnering with cross-functional stakeholders to ship compliant, production-grade platforms remotely.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full stack platform capabilities** for an investment analytics SaaS product serving **40+ institutional clients**, using **Java 17**, **Spring Boot**, and **Angular** within a regulated release workflow.
- Led **event-driven microservices** integrated through **Apache Kafka**, improving portfolio data refresh latency by **35%** while preserving audit-ready traceability for compliance reviews.
- Built **REST and reactive APIs** with **Spring WebFlux** and **PostgreSQL**, supporting high-volume ingestion pipelines processing **2M+ records daily** across distributed services.
- Drove **CI/CD modernization** on **AWS (EC2, S3, Lambda)** with **Docker** and **Kubernetes**, reducing release cycle time from **two weeks to three days** across three production environments.
- Implemented **TDD and BDD** automation with **JUnit**, **Cucumber**, and **Selenium**, raising test coverage to **85%** and cutting production regressions by **40%**.
- Mentored **four engineers** through **code reviews**, pairing, and **domain-driven design** practices, strengthening delivery consistency and accelerating onboarding for new team members.
- Partnered with product, risk, and operations leaders to translate **business requirements** into validated technical designs, maintaining formal documentation for regulated release approvals.
- Automated build, test, and deployment gates in **GitLab CI** with **API testing** checkpoints that intercepted **95%** of breaking changes before merge to mainline branches.
- Improved production reliability with **Prometheus**, **Grafana**, and structured logging, enabling **proactive incident detection** for mission-critical trading support services.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java** and **Spring Boot** services supporting capital markets reporting in a **heavily regulated banking environment** with formal change-management and validation controls.
- Delivered **Angular** modules used by **200+ internal analysts** for real-time risk dashboards, operational reporting, and cross-desk workflow visibility.
- Optimized **SQL** access patterns and **PostgreSQL** schemas for regulatory data pipelines, reducing nightly batch runtime by **28%** on critical reporting jobs.
- Contributed across the software lifecycle in an **Agile** cadence aligned with **SAFe** planning, coordinating deliverables with **three cross-functional teams** in a remote setup.
- Authored **technical documentation** and validation artifacts supporting internal audit, compliance reviews, and production release sign-off requirements.
- Integrated **AWS Lambda** and **S3** into document processing workflows, automating reconciliation steps previously handled manually across **15 business units**.
- Conducted **code reviews** and enforced engineering standards that improved maintainability and reduced UAT defect escape rates by **30%** over two release cycles.

- Supported **production incidents** for mission-critical trading applications, delivering root-cause remediation and durable fixes under strict operational SLAs.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **JavaScript** and **React** UI components for a customer-facing portal, improving initial page load performance by **20%** through lazy loading and bundle optimization.
- Assisted in developing **REST APIs** with **Node.js** and **PostgreSQL**, enabling secure check-in workflows supporting **10K+ monthly active users**.
- Expanded automated test coverage using **TDD** practices with **JUnit**-style unit tests and integration suites, raising core module coverage from **45% to 70%**.
- Collaborated in **Git**-based workflows and **Jira**-tracked sprints within an **Agile** engineering team delivering biweekly production releases.
- Standardized local development with **Docker** containers, shortening environment setup time for **five new contributors** joining the codebase.
- Participated in **code reviews** and production troubleshooting, documenting fixes and sharing learnings to improve team response time on recurring issues.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed responsive **HTML**, **CSS**, and **JavaScript** pages for a nonprofit fundraising site, contributing to a **30% increase** in online engagement during campaign season.
- Integrated third-party donation APIs and maintained **PostgreSQL**-backed content workflows that allowed non-technical staff to publish updates independently.
- Resolved cross-browser compatibility issues and applied **accessibility** improvements aligned with WCAG guidance for broader audience reach.
- Gathered requirements remotely with stakeholders and iterated on UI designs through feedback-driven release cycles with weekly demo checkpoints.
- Deployed updates through **Git** version control and lightweight **CI** scripts, enabling reliable rollbacks for production content changes.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: Angular, React, JavaScript, TypeScript, HTML5, CSS3, Responsive Web Design

Backend: Java 17, Spring Boot, Spring WebFlux, Node.js, REST APIs, Event-Driven Architecture, Domain-Driven Design

Databases: PostgreSQL, SQL, Schema Design, Query Optimization, Relational Data Modeling

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, GitLab CI/CD, Git, Infrastructure Automation

Monitoring & Tools: Apache Kafka, Prometheus, Grafana, Selenium, Cucumber, JUnit, API Testing

Workflow & PM: Agile, SAgile, Jira, Confluence, Code Review, Technical Documentation, Release Management
