

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software engineer with 8+ years delivering REST APIs, React and TypeScript UIs, and relational data systems across finance and SaaS. Builds transaction evaluation workflows, schema migrations, and third-party integrations serving high-volume user flows. Leads end-to-end feature development, SQL query optimization, test automation, and mentors engineers on API design and scalable full stack architecture.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and evolved **REST APIs** powering client onboarding and portfolio workflows, reducing average request latency by **35%** through endpoint consolidation and caching strategies.
- Optimized **PostgreSQL schemas** and analytical queries across transaction history tables, cutting p95 read times from 800ms to **120ms** while supporting millions of monthly records.
- Implemented **transaction evaluation and risk scoring** algorithms for capital allocation decisions, improving automated approval rates without increasing default exposure.
- Integrated **15+ third-party financial APIs** with retry logic and idempotent handlers serving **50K+ daily transactions** across payments, KYC, and market data providers.
- Built **React and TypeScript** interfaces with interaction design and motion patterns for portfolio dashboards, increasing feature engagement by **22%** in controlled A/B experiments.
- Developed **visual regression automation** using snapshot testing pipelines that caught UI defects pre-release across **4 web client surfaces**.
- Launched **mobile-responsive web clients** for new fund management products, owning delivery from API contracts through production deployment and release validation.
- Created **internal automation tooling** that reduced customer support ticket volume by **30%** through self-service status tracking and exception resolution flows.
- Mentored **3 junior engineers** on API design, code review practices, and end-to-end feature ownership across quarterly release cycles.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java Spring REST services** supporting trade settlement and regulatory reporting flows processing **\$2B+ daily** notional volume.
- Designed **SQL database migrations** and indexing strategies for trade ledger tables, improving batch reconciliation runtime by **40%**.
- Built **React dashboards** for operations teams to monitor transaction exceptions and income verification queues from API layer through UI delivery.
- Implemented **predictive risk models** for credit indicators used in analyst review workflows across corporate lending portfolios.
- Integrated external **market data and compliance APIs** with standardized error handling and audit logging for regulatory traceability.
- Conducted **A/B experiments** on internal workflow tools that increased analyst throughput by **18%** without sacrificing review accuracy.
- Automated **integration and regression test suites** for API contract changes across **12 microservices** in the payments technology group.

- Collaborated with cross-functional stakeholders to define **API specifications** and schema changes for quarterly compliance releases.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** with TypeScript for check processing workflows, contributing to a platform used by **200+ restaurant partners**.
- Consumed **REST APIs** to surface real-time transaction status and inventory data across internal admin tools.
- Implemented **SQL queries** and lightweight schema updates for reporting features requested by operations teams.
- Participated in **code reviews** and sprint planning, shipping **8+ features** during a 12-month internship rotation.
- Added **form validation and UX improvements** that reduced data entry errors in partner onboarding flows.
- Containerized local development environments using **Docker** to standardize setup across the engineering team.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for a nonprofit foundation site using HTML, CSS, and JavaScript across **10+ content sections**.
- Integrated **contact and donation forms** with backend endpoints, enabling staff to manage submissions without manual email routing.
- Optimized **page load performance** through asset minification and lazy loading, improving Lighthouse scores by **25 points**.
- Collaborated with stakeholders to translate **design mockups** into accessible, mobile-friendly layouts.
- Maintained version-controlled codebase using **Git**, supporting handoff documentation for future volunteer developers.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Motion Design, Responsive UI, A/B Testing

Backend: Java, Spring Boot, REST APIs, GraphQL, Node.js, Microservices, Third-Party API Integration, Transaction Processing

Databases: PostgreSQL, MySQL, SQL Server, Schema Design, Migrations, Query Optimization, Analytical Queries

Cloud & DevOps: Docker, Kubernetes, AWS, CI/CD Pipelines, Container Orchestration, Infrastructure as Code

Monitoring & Tools: Visual Regression Testing, Jest, Cypress, Git, Maven, Gradle, Logging and Observability

Workflow & PM: Agile/Scrum, Jira, Technical Mentorship, Cross-Functional Collaboration, Independent Project Ownership
