

Ryan Cho

Senior Software Engineer — React & TypeScript

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Software engineer with 5+ years building production SaaS web applications in JavaScript, TypeScript, and React. Owns end-to-end feature delivery from architecture through deployment, with deep experience in Redux, component-driven theming, and relational data layers. Raises frontend standards through code review, performance tuning, and cross-team collaboration in fast-paced Agile environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **end-to-end development** of customer-facing React and TypeScript modules serving **investment portfolio workflows** across a multi-tenant SaaS platform used by internal and external stakeholders.
- Architected **Redux-based global state** patterns and shared component libraries that standardized theming and reduced duplicate UI logic across **12+ product surfaces**.
- Drove **frontend performance optimization**, cutting initial load time by **35%** through code splitting, memoization, and lazy route loading without compromising feature richness.
- Established **code review standards** for styling, maintainability, and accessibility, mentoring engineers on component design and **theme token conventions**.
- Partnered with backend and product teams in **Agile sprint cycles** to design API contracts, ship features independently, and iterate on user feedback with minimal oversight.
- Built **themeable UI components** aligned to a design system, enabling rapid feature delivery while preserving visual consistency across web and dashboard experiences.
- Integrated **relational database-backed APIs** into frontend data flows, implementing caching and optimistic updates for responsive user interactions at platform scale.
- Participated in **architectural discussions** for platform scalability, influencing decisions on module federation, build tooling, and deployment pipelines for production releases.
- Shipped **production-ready features** weekly in a fast-moving environment, adapting priorities across releases while maintaining high **code quality and test coverage**.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **React and JavaScript** applications for trading and risk dashboards used by analysts across global markets, supporting **high-scale data visualization** requirements.
- Implemented **Redux state management** for complex multi-step workflows, improving data consistency across interconnected financial reporting modules.
- Contributed to **frontend architecture** reviews, proposing component abstractions and performance patterns adopted by adjacent technology teams.
- Styled **component-based web applications** with reusable theme variables, ensuring brand compliance across internal banking portals.
- Collaborated with **Agile cross-functional teams** to deliver features from requirements through testing and production support.
- Connected frontend layers to **relational databases** via REST services, modeling entity relationships for real-time portfolio and transaction displays.
- Maintained **production internal platforms**, resolving performance bottlenecks and production incidents with thorough written documentation.

- Mentored junior analysts on **TypeScript adoption**, ESLint configuration, and frontend best practices during platform modernization initiatives.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for a food-safety compliance web app, translating designs into responsive interfaces with **JavaScript and CSS modules**.
- Assisted in implementing **Redux stores** for session and form state, reducing prop-drilling across checkout and reporting flows.
- Wrote **unit and integration tests** for UI workflows, improving release confidence for biweekly Agile deployments.
- Integrated frontend modules with **MySQL-backed APIs**, displaying inspection records and audit trails for restaurant clients.
- Participated in **code reviews** and team standups, shipping incremental feature improvements with guidance from senior engineers.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **JavaScript** web pages for a nonprofit foundation site, delivering accessible layouts and content management integrations.
- Implemented **responsive styling** across desktop and mobile viewports using component-oriented CSS patterns.
- Collaborated with stakeholders to gather requirements and **ship features** on a tight nonprofit launch timeline.
- Optimized page **load performance** through asset minification and image compression for volunteer-facing tools.
- Supported **production deployment** updates and bug fixes during the foundation's digital presence rollout.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: JavaScript, TypeScript, React, Redux, HTML5, CSS3, Responsive Design, Component Libraries, Theme Systems

Backend: Node.js, Express, REST APIs, GraphQL

Databases: PostgreSQL, MySQL, SQL

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions

Monitoring & Tools: Jest, React Testing Library, Webpack, ESLint, Chrome DevTools

Workflow & PM: Agile/Scrum, Jira, Code Review, Technical Documentation
