

# Ryan Cho

## Senior Full Stack Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

### PROFESSIONAL SUMMARY

---

Full stack engineer with 8+ years designing and deploying production serverless systems on AWS. Expert in Node.js, Lambda, Step Functions, DynamoDB, SQS, and Terraform with strong SQL and data modeling skills. Delivered cost-optimized, highly observable workflows through cross-team collaboration, code review leadership, and GitHub Actions CI/CD automation.

### WORK EXPERIENCE

---

#### Software Engineer

May/2022 - May/2026

##### Aspen Capital

Remote | 10th Floor, New York

- Architected **serverless applications** on AWS using **Lambda**, **API Gateway**, and **Step Functions** to orchestrate multi-stage investment workflow processing across 12 downstream services
- Built and maintained **Node.js** services handling **2M+ monthly API requests** with structured error handling, logging, and **Splunk** dashboards for real-time incident triage
- Designed **DynamoDB data models** with partition key strategies and **DynamoDB Streams** integration, reducing query latency by **40%** for portfolio analytics workloads
- Implemented **Terraform** modules provisioning **S3**, **SQS**, **EventBridge**, and **Kinesis Firehose** resources with environment-scoped state management and peer-reviewed IaC standards
- Optimized **Lambda memory allocation** and **SQS batching** configurations, cutting monthly AWS spend by **28%** while maintaining 99.9% workflow completion rates
- Established **GitHub Actions CI/CD** pipelines with automated testing, staged deployments, and rollback procedures supporting zero-downtime releases across three environments
- Partnered with product and operations stakeholders to translate **business process requirements** into **Step Function state machines** with comprehensive retry and dead-letter handling
- Developed **PostgreSQL** reporting schemas and **SQL analytics queries** feeding executive dashboards while maintaining separation from operational NoSQL stores
- Led **code reviews** and documented **serverless architecture** best practices, mentoring three engineers on observability patterns and **disaster recovery** runbooks

#### Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

##### Summer Analyst,

##### BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Node.js REST APIs** integrating trading desk workflows with internal risk systems, supporting **500+ daily transactions** with validated request schemas
- Wrote complex **SQL queries** and stored procedures across **PostgreSQL** and Oracle databases for regulatory reporting and reconciliation pipelines
- Deployed **cloud-native services** on AWS utilizing **S3** for document storage and **Lambda** for event-driven notification processing
- Participated in **Git-based code reviews** and **CI pipelines**, contributing to team coding standards and automated test coverage improvements
- Collaborated with cross-functional teams to resolve production incidents, applying **systematic debugging** that reduced mean time to recovery by **25%**
- Built internal tooling with **API integrations** connecting legacy mainframe interfaces to modern web dashboards for technology analysts

#### Software Engineering Intern

Jun/2018 - May/2019

##### Chexology

Remote | 17th Floor, New York

- Implemented **Node.js backend endpoints** for payment verification workflows, integrating third-party APIs with structured error responses and input validation
- Contributed to **Git version control** workflows including feature branching, pull requests, and merge conflict resolution across a four-person engineering team
- Wrote **SQL migrations** and queries supporting customer transaction history features backed by **PostgreSQL**
- Assisted in deploying application updates through **CI/CD pipelines** with automated linting and unit test gates before production promotion
- Collaborated with senior engineers during **code reviews** to improve API documentation and test case coverage

## Web Developer

Sep/2017 - Nov/2017

### Bayesquare Foundation

Remote | New York

- Built responsive web interfaces and **API integrations** for nonprofit donation platforms using JavaScript and modern frontend patterns
- Developed backend scripts connecting content management workflows with **relational database stores** using **SQL** for data persistence
- Maintained **Git repositories** with consistent commit practices and branch management across distributed remote collaborators
- Resolved cross-browser compatibility and performance issues through **systematic debugging** and iterative testing approaches

## EDUCATION

---

### New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

## SKILLS

---

**Frontend:** JavaScript, TypeScript, React, HTML5, CSS3, REST API Integration

**Backend:** Node.js, Express, AWS Lambda, API Gateway, Step Functions, EventBridge, Microservices

**Databases:** DynamoDB, DynamoDB Streams, DAX, PostgreSQL, SQL, Data Modeling

**Cloud & DevOps:** AWS (S3, SQS, Kinesis, Firehose), Terraform, Serverless Framework, ECS/Fargate, GitHub Actions, CI/CD

**Monitoring & Tools:** Splunk, CloudWatch, Structured Logging, Error Handling, Disaster Recovery, Git

**Workflow & PM:** Agile, Jira, Cross-Functional Collaboration, Code Reviews, Technical Documentation, Stakeholder Communication
