PROFESSIONAL SUMMARY

Full stack software engineer with 6+ years building enterprise web applications using Java, Spring, Hibernate, and Angular. Proven track record modernizing legacy user interfaces, delivering RESTful services on Apache Tomcat, and shipping reliable features in agile teams. Experienced across financial and platform-scale systems with strong ownership from database design through responsive UI implementation.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led migration of internal portfolio dashboards to **Angular** modules with reusable **Angular Material** components, reducing UI regression defects across quarterly release cycles
- Architected **Spring Boot** REST services backed by **Hibernate ORM** for trade lifecycle workflows, supporting three asset-class product lines used by operations teams daily
- Owned **Apache Tomcat** deployment pipelines and environment configuration for staging and production, establishing release checklists adopted by the platform group
- Delivered customer-facing reporting and analytics features within **agile** two-week sprints, coordinating scope with product owners and QA across remote stakeholders
- Refactored authentication, session management, and authorization layers for **web application** access, improving security posture without disrupting existing integrations
- Mentored two engineers on **Java** service design, unit testing, and code review practices, accelerating onboarding and standardizing team delivery patterns
- Optimized complex Hibernate queries and connection pooling for high-volume batch windows, maintaining stable performance during month-end processing peaks

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built **Java** microservices on the **Spring Framework** supporting fixed-income trading workflows consumed by front-office and operations analysts
- Implemented **Hibernate** entity mappings and query tuning across Oracle schemas handling high-volume transactional data with strict audit requirements
- Contributed to enterprise **web application** portals that replaced spreadsheet-driven processes, streamlining reconciliation for custody and settlement teams
- Participated in **agile** sprint planning and retrospectives to prioritize regulatory reporting enhancements under compressed compliance deadlines
- Packaged and validated releases for **Apache Tomcat** environments, shortening deployment verification cycles across dev and staging tiers
- Developed REST endpoints and integration tests securing data exchange between custody, settlement, and reporting systems
- Supported production incident triage for mission-critical online and batch services during peak trading windows, restoring service within SLA targets

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented customer-facing **web application** features with REST integrations for digital receipt and payment validation workflows during pilot rollout

- Built backend endpoints using **Spring** services to process mobile client traffic and enforce business rules across two product releases
- Collaborated in **agile** standups and sprint demos, delivering assigned user stories on schedule with peer code reviews
- Expanded unit and integration test coverage on core validation modules before production launch, catching edge cases early
- Resolved **UI** defects and accessibility improvements across checkout and account views in coordination with design feedback

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed responsive **web application** pages for nonprofit fundraising campaigns using HTML, CSS, and JavaScript
- Integrated third-party donation APIs with client-side validation to support live event registration workflows
- Collaborated remotely with stakeholders to iterate on **UI** layouts based on user feedback during a compressed engagement window
- Delivered production-ready assets with documented handoff for ongoing site maintenance after project completion

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: Angular (v17+), Angular Material, TypeScript, JavaScript, HTML5, CSS3, Responsive Web Design

Backend: Java, Spring Framework, Spring Boot, Hibernate ORM, REST APIs, Apache Tomcat

Databases: Oracle, PostgreSQL, MySQL, SQL, Object-Relational Mapping

Cloud & DevOps: Docker, Jenkins, Git, CI/CD, Linux, Maven

Monitoring & Tools: JUnit, Mockito, SonarQube, Postman, JIRA, Confluence

Workflow & PM: Agile/Scrum, Sprint Planning, Cross-functional Collaboration, Technical Documentation
