PROFESSIONAL SUMMARY

Full stack software engineer with 6+ years building enterprise financial platforms, payment workflows, and high-availability web services. Expert in React, TypeScript, Node.js, and cloud-native delivery across Azure and AWS, with deep experience in SQL/NoSQL data design, observability, and automated testing. Known for cross-team integration work, reliability improvements, and mentoring engineers through code review and technical guidance.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **full stack development** of internal cash flow and invoicing tools using **React**, **TypeScript**, and **Node.js**, enabling finance teams to reconcile **\$50M+ in monthly payment activity** with fewer manual reconciliation steps.
- Designed **RESTful web services** and integration layers connecting portfolio accounting systems with third-party billing platforms, reducing **payment processing latency by 35%** across partner-facing workflows.
- Built **responsive UI modules** with HTML, CSS, and component-driven patterns, improving operator throughput for invoice review and approval queues serving **200+ daily users**.
- Implemented **Cosmos DB** and **SQL** data models for transaction reporting, supporting idempotent writes and **high-availability reads** during peak end-of-month settlement windows.
- Improved **system reliability and observability** by adding structured logging, alerting dashboards, and synthetic checks, cutting mean time to detect production incidents from hours to minutes.
- Established **automated testing** and deployment pipelines in **Azure DevOps**, including unit, integration, and contract tests that raised release confidence and reduced rollback frequency.
- Partnered with product, design, and operations stakeholders to estimate delivery scope, clarify acceptance criteria, and represent engineering in **cross-functional planning** sessions.
- Mentored **two junior engineers** through code reviews, pairing sessions, and documentation of best practices for API design, version control, and error handling.
- Refactored legacy **jQuery dashboards** into maintainable **React** surfaces, decreasing page load times and simplifying ongoing feature work for the payments operations team.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **Java services** and batch pipelines supporting trade settlement and cash management workflows processing **millions of daily transactions** across global banking operations.
- Optimized **SQL and NoSQL** database queries for operational reporting dashboards, improving performance on high-volume ledger tables and reducing overnight batch windows by **20%**.
- Built internal web tools with **JavaScript**, HTML, and CSS that streamlined operational reporting for technology and finance partners across multiple business units.
- Integrated external **web services** and messaging interfaces to synchronize account data between legacy mainframe systems and modern microservices, improving consistency for downstream invoice and payment feeds.
- Contributed to **high-availability platform upgrades** through capacity planning, failover testing, and incident response for tier-1 banking applications.
- Implemented **unit and integration testing** frameworks and enforced code review standards that raised quality across a **15-person engineering squad**.
- Collaborated with business analysts and vendor teams in **JIRA** and **Confluence** to translate regulatory and operational requirements into actionable technical delivery plans.

- Supported **Docker-based** local development environments and CI workflows that shortened onboarding time for new analysts joining the technology organization.
- Analyzed production defects using monitoring and log aggregation tools, driving root-cause fixes that reduced recurring incident volume in payment-adjacent services.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React** and **Node.js** features for a restaurant payments platform, helping merchants track checks and settlement activity through a responsive web interface.
- Wrote **SQL migrations** and API endpoints to persist transaction records, supporting reliable retrieval of payment history for customer support workflows.
- Added **automated tests** and Postman collections for REST endpoints, catching regressions early during iterative sprint delivery.
- Participated in **Git-based code reviews** and paired with senior engineers to implement UI components aligned with design specifications.
- Containerized a prototype service with **Docker** to simplify demo deployments for partner integration discussions.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** with HTML, CSS, and Bootstrap for nonprofit fundraising campaigns, improving mobile readability across donor traffic spikes.
- Integrated donation forms with backend **PHP handlers** using PDO and MySQL, ensuring sanitized inputs and consistent receipt generation.
- Applied **Git version control** and lightweight testing to manage content updates with minimal downtime during live event windows.
- Collaborated with stakeholders to clarify requirements, estimate page delivery, and iterate on layouts based on usability feedback.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML, CSS, Bootstrap, jQuery, Responsive Layouts

Backend: Node.js, Java, PHP, RESTful Web Services, API Integration

Databases: SQL, MySQL, NoSQL, Azure Cosmos DB, Amazon DynamoDB

Cloud & DevOps: Microsoft Azure, Azure DevOps, AWS, Docker, Git, Lambda, Deployment Automation

Monitoring & Tools: Observability, Alerting, Reporting Dashboards, Postman, Synthetic Monitoring, Structured Logging

Workflow & PM: JIRA, Confluence, Project Estimation, Code Reviews, Cross-functional Collaboration, Mentorship
