PROFESSIONAL SUMMARY

Full stack software engineer with 6+ years building client-facing web applications and microservice integrations across financial services and investment platforms. Strong frontend depth in TypeScript and modern SPA architecture, with backend experience delivering APIs and distributed services. Proven collaborator across product, design, and platform teams, shipping workflow-driven interfaces that balance usability, performance, and reliability at scale.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned **TypeScript frontend modules** for an institutional investor portal, delivering document-heavy subscription and reporting workflows used across multiple client-facing platform surfaces.
- Architected **microservice UI integrations** with Ruby on Rails and REST APIs, establishing shared patterns for contract alignment, error handling, and resilient data fetching across distributed services.
- Improved **usability and frontend performance** on portfolio and account dashboards through code splitting, lazy loading, and render optimization, reducing time-to-interaction on high-traffic views.
- Partnered with **Product, Design, and platform engineers** to translate complex investment requirements into reusable React components and scalable end-to-end feature delivery.
- Contributed to **API design and backend development** for reporting and workflow services, enabling faster cross-team releases without blocking frontend delivery.
- Led **code reviews and architectural discussions** that standardized TypeScript conventions, testing practices, and continuous improvement across the engineering organization.
- Built **multi-step workflow interfaces** for account onboarding and document collection, managing validation, state persistence, and accessibility across long-running user journeys.
- Mentored engineers on **frontend architecture and service integration**, strengthening delivery quality for teams spanning frontend and backend ownership.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **TypeScript and React applications** for banking and investment operations, supporting client-facing and internal workflow tools across payments, settlements, and reporting domains.
- Integrated frontend services with **Scala and Java microservices**, implementing API clients, retry logic, and observability hooks for high-availability distributed systems.
- Collaborated with **multiple backend and platform teams** to deliver API-backed features, aligning frontend modules with service boundaries and release schedules at enterprise scale.
- Enhanced **document-heavy compliance workflows** through progressive disclosure, form optimization, and clearer interaction patterns that reduced friction for operations users.
- Participated in **architectural reviews and code reviews**, contributing to engineering standards, service contracts, and continuous improvement across cross-team initiatives.
- Supported **production client-facing platforms** with monitoring-driven triage and remediation, helping maintain reliability for critical financial applications.
- Delivered **REST API integrations** connecting UI modules to backend services, enabling end-to-end ownership of features spanning frontend presentation and service orchestration.

Software Engineering Intern Chexology

Jun/2018 - May/2019

Remote | 17th Floor, New York

- Built **TypeScript and React features** for a SaaS product, implementing responsive UI components, routing, and client-side state management for core user workflows.
- Integrated application screens with **Ruby on Rails backend APIs**, supporting authenticated CRUD flows and consistent error handling across service calls.
- Collaborated with senior engineers during **code reviews and automated testing**, improving component reliability and maintainability across the frontend codebase.
- Delivered **customer-facing interface improvements** that clarified multi-step workflows and strengthened usability across primary product journeys.
- Contributed to **API consumption patterns** and frontend service layers that simplified integration with distributed backend endpoints.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web interfaces** with JavaScript and modern CSS, delivering accessible pages for foundation digital initiatives within tight delivery timelines.
- Implemented **frontend components** integrated with backend services, supporting content updates and user interaction workflows for public-facing properties.
- Collaborated with stakeholders to translate **business requirements into technical solutions**, balancing scope, usability, and maintainability for short-cycle releases.
- Maintained and enhanced **client-facing web properties**, improving load performance and cross-browser compatibility across core site experiences.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, JavaScript, React, HTML5, CSS3, SPA Architecture, Responsive Design, Web Performance, Microservice UI Integration, Workflow-Driven Interfaces

Backend: Ruby on Rails, Scala, Node.js, REST APIs, Microservices, API Design, Service Integration

Databases: PostgreSQL, MySQL, Redis, MongoDB

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform

Monitoring & Tools: Datadog, Grafana, Sentry, Jest, Cypress, Webpack, Vite

Workflow & PM: Agile/Scrum, Jira, Cross-functional Collaboration, Code Review, Technical Documentation
