

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 7+ years designing and shipping cloud-native SaaS platforms, serverless microservices, and AI-enabled automation across enterprise systems. Deep expertise in React, Node.js, AWS Lambda, and event-driven API integrations. Proven track record building CI/CD pipelines, automated regression testing, and LMS-style platform integrations. Collaborative technical leader focused on scalable architecture, DevSecOps, and cross-team delivery.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **serverless microservices** on AWS Lambda, API Gateway, SQS, and S3 supporting a multi-tenant SaaS platform serving 50K+ monthly active users across distributed teams.
- Built **AI-assisted test automation** frameworks combining script authoring, regression suites, and self-healing E2E coverage with Playwright and Selenium, reducing release validation cycles by 40%.
- Led full stack development of **React and Node.js** services implementing clean architecture patterns, RESTful APIs, and event-driven workflows for real-time data synchronization.
- Designed and maintained **CI/CD automation** with GitHub Actions, Jenkins, and CloudFormation, enabling zero-downtime deployments across staging and production AWS environments.
- Implemented **API and file-based integrations** with external SaaS providers using OAuth, webhooks, and standardized exchange formats for enterprise data feeds.
- Scaled **PostgreSQL and DynamoDB** data layers with indexing strategies, connection pooling, and migration tooling supporting high-frequency transactional workloads.
- Established **observability practices** with CloudWatch, structured logging, and alerting dashboards, improving incident detection and mean-time-to-resolution across services.
- Mentored engineers on **distributed system design**, code review standards, and unit testing practices while partnering with product and operations stakeholders on technical specifications.
- Drove **DevSecOps initiatives** including IaC templates, IAM least-privilege policies, and automated security scans integrated into the deployment pipeline.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java microservices** and REST APIs supporting capital markets workflows within a regulated financial services environment serving global operations.
- Built **automated API integration tests** and regression suites validating critical trade settlement and reporting pipelines across multiple downstream systems.
- Implemented **React dashboards** and internal tooling for operations teams, translating business requirements into technical design specifications and UML documentation.
- Managed **PostgreSQL and relational database** schemas, stored procedures, and query optimization for high-volume batch processing jobs.
- Configured **CI/CD pipelines** with Jenkins, Bitbucket, and Ansible automating build, test, and release workflows across dev and QA environments.
- Collaborated in **Agile Scrum** ceremonies delivering iterative enhancements to enterprise resource planning integrations and corporate data systems.
- Authored **technical documentation** for API contracts, deployment runbooks, and system analysis artifacts supporting cross-team knowledge transfer.

- Supported **AWS cloud migration** initiatives evaluating Lambda, RDS, and VPC configurations for workload portability and infrastructure modernization.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **React.js** frontend features and Node.js API endpoints for a B2B SaaS product, following object-oriented design and clean code conventions.
- Wrote **unit and integration tests** validating API contracts and UI components, improving baseline test coverage across core application modules.
- Assisted with **Git-based CI workflows** and code reviews, gaining hands-on experience with Agile delivery and collaborative software engineering practices.
- Built **JavaScript ES6+** utilities and CLI scripts automating data validation tasks for quality assurance and deployment preparation workflows.
- Participated in **systems analysis** sessions documenting user stories, database schemas, and integration requirements with senior engineering mentors.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web interfaces** using HTML, CSS, and JavaScript for nonprofit digital initiatives, delivering accessible UI components on tight project timelines.
- Integrated **third-party APIs** and content management workflows supporting data-driven page rendering for foundation outreach programs.
- Collaborated with remote stakeholders to gather requirements, produce wireframes, and implement iterative frontend enhancements.
- Maintained **version-controlled** codebase with Git, participating in peer reviews and deployment support for production web releases.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, UI Component Architecture, Responsive Design, Playwright, Selenium

Backend: Node.js, Java, Python, AWS Lambda, REST APIs, Microservices, Event-Driven Architecture, API Gateway, OAuth, LTI/xAPI Integration Patterns

Databases: PostgreSQL, Amazon RDS, DynamoDB, SQL, NoSQL, Database Design, Schema Migration, Query Optimization

Cloud & DevOps: AWS (Lambda, S3, SQS, SNS, IAM, CloudWatch, ECS, Fargate, VPC, Route 53), CloudFormation, Kubernetes, Jenkins, GitHub Actions, Bitbucket, Ansible, DevSecOps, IaC

Monitoring & Tools: CloudWatch, X-Ray, Elasticsearch, Structured Logging, Alerting, Git, AWS CLI, Apache Spark

Workflow & PM: Agile, Scrum, Technical Writing, Systems Analysis, OOAD, UML, Jira, CI/CD, Cross-Functional Collaboration
