PROFESSIONAL SUMMARY

Full stack software engineer with eight years of experience building web applications, RESTful APIs, and data-driven products in startup and financial services environments. Proficient in TypeScript, React, Next.js, Node.js, Express, Python, and SQL with ownership from API design through production deployment. Strong in algorithms, optimization, and iterative delivery via vertical and horizontal slices. Collaborates via GitLab and delivers scalable solutions under tight deadlines.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **full stack development** of client-facing investment analytics platform using **TypeScript**, **React**, and **Node.js/Express**, serving portfolio teams across multiple business units
- Architected and maintained **RESTful APIs** with structured validation, versioning, and **Postman**-based integration testing, reducing partner onboarding defects by **40%**
- Built **Next.js** dashboards and reusable component libraries that improved page load performance by **35%** through code splitting and server-side rendering
- Designed **Python** and **SQL** data pipelines to ingest, transform, and persist market datasets safely with transactional integrity and audit logging
- Implemented **AWS**-hosted back-end services (Lambda, S3, RDS) to support **horizontal scaling** during peak reporting cycles without infrastructure rewrites
- Partnered with product and engineering leads in **design-cycle workshops** to decompose initiatives into **vertical slices** shippable within two-week sprints
- Mentored two junior developers on **GitLab** merge request workflows, code review standards, and API contract testing practices
- Delivered **production builds** on tight deadlines by coordinating cross-functional dependencies, flagging blockers early, and prioritizing critical path features
- Researched and prototyped **optimization algorithms** for portfolio rebalancing calculations, improving batch runtime by **25%** over legacy implementations

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full stack** internal banking tools with **React** front ends and **Node.js** services supporting trade operations workflows for global markets teams
- Created and documented **RESTful APIs** consumed by three downstream systems, standardizing error handling and authentication patterns across services
- Wrote **Python** scripts and **SQL** queries to extract, validate, and store regulatory reporting data from heterogeneous source systems
- Collaborated via **GitLab** on feature branches, rebasing strategies, and CI pipelines that accelerated integration testing before release windows
- Applied **algorithmic optimizations** to reconciliation jobs processing **2M+ daily records**, cutting execution time from hours to minutes
- Communicated sprint commitments and dependency risks to teammates and stakeholders, maintaining on-time delivery through quarterly release cycles
- Deployed **production builds** to staged environments with rollback procedures, reducing incident recovery time during peak trading hours

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React** and **TypeScript** UI components for a restaurant check-management web application used by **50+ venue partners**
- Implemented **Express.js** endpoints and **SQL** persistence layers for order tracking, enabling real-time status updates across client devices
- Tested API contracts with **Postman** collections and documented request/response schemas for mobile and web consumers
- Participated in **group brainstorming sessions** to evaluate UX approaches and propose iterative **vertical slice** implementations
- Collaborated on **GitLab** pull requests, incorporating code review feedback to improve component test coverage by **30%**

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed responsive **web application** pages for a nonprofit platform using **JavaScript**, HTML, and CSS, improving mobile accessibility across key user flows
- Integrated **RESTful API** consumers on the front end to display dynamic program content sourced from a **Node.js** back end
- Researched **modern web development** patterns and presented solution options to the team for form validation and data submission workflows
- Met **tight deadlines** for fundraising campaign launches by prioritizing feature scope and coordinating tasks with remote teammates
- Assisted with **production deployment** checks and smoke testing before release, helping ensure stable rollouts for public-facing pages

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, React, Next.js, JavaScript, HTML5, CSS3, Responsive Web Design

Backend: Node.js, Express.js, Python, RESTful API Design

Databases: SQL, PostgreSQL, MySQL, Redis

Cloud & DevOps: AWS (Lambda, S3, RDS, EC2), CI/CD, Docker, Production Deployments

Monitoring & Tools: Postman, GitLab, Jest, Webpack

Workflow & PM: Agile/Scrum, Vertical/Horizontal Slicing, Code Review, Technical Documentation
