PROFESSIONAL SUMMARY

Full stack software engineer with 7+ years building and shipping production web applications across finance and startup environments. Deep experience in React, Next.js, Python, and Django, with a track record of modernizing legacy platforms through phased migrations and scalable API design. Proven collaborator with Product, Design, and stakeholders in remote settings. Advocate for AI-assisted development, automated testing, and engineering standards that raise code quality and team velocity.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **full stack modernization** of internal portfolio management tools, migrating legacy modules to **React and Next.js** while preserving business-critical workflows for 200+ investment analysts
- Architected and shipped **RESTful APIs** with **Python and Django**, enabling frontend teams to decouple from monolithic services and accelerate release cycles across quarterly delivery windows
- Drove a **phased platform migration** strategy replacing aging reporting systems with scalable services, reducing deployment risk and enabling incremental rollout without disrupting live trading operations
- Integrated **AI-assisted development workflows** into team practices, improving code review throughput and reducing repetitive implementation work across the engineering organization
- Established **automated testing standards** including unit, integration, and end-to-end suites that increased release confidence and cut production regressions in investor-facing applications
- Partnered with Product and Design to translate stakeholder requirements into **clean, maintainable solutions** for dashboards, reporting views, and transactional workflows used daily by portfolio teams
- Mentored engineers on **cross-stack debugging**, code review practices, and engineering patterns spanning frontend components and backend service layers in a fully remote environment
- Documented **architectural decisions** and onboarding guides that improved distributed team ramp-up and preserved institutional knowledge across rotating project contributors
- Optimized **PostgreSQL** query patterns and caching layers supporting high-volume financial data retrieval with consistently sub-second response targets under peak load

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built and maintained **production web applications** supporting trading desk operations, collaborating with cross-functional teams across New York and London in a remote-first delivery model
- Contributed to **legacy system modernization** initiatives, refactoring critical services toward modular APIs consumed by React-based internal tools used by front-office analysts
- Designed **API contracts** and integration layers connecting front-office systems with middle-office risk platforms, improving data consistency across departmental workflows
- Wrote **unit and integration tests** with pytest and Jest, strengthening CI pipelines and reducing post-release defects in regulated banking release cycles
- Participated in **technical architecture discussions** for new product features, evaluating tradeoffs between delivery speed, compliance requirements, and long-term maintainability
- Delivered **Django REST Framework** endpoints for client reporting modules, enabling faster iteration on regulatory compliance features requested by business stakeholders
- Collaborated with business analysts and non-technical stakeholders to clarify ambiguous requirements and ship **customer-focused solutions** under tight regulatory deadlines

- Improved **debugging and troubleshooting** practices by introducing structured logging and monitoring hooks across distributed services supporting daily trading operations

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React components** for customer-facing ordering interfaces, improving mobile responsiveness and checkout flow usability across partner restaurant sites
- Implemented **Python backend endpoints** supporting menu management and order processing for restaurant partner integrations in a production SaaS environment
- Wrote **automated tests** covering API handlers and frontend state logic, contributing to more reliable weekly releases across the engineering team
- Participated in **code reviews** and sprint planning with senior engineers, building practical experience in agile remote collaboration and iterative delivery
- Assisted in **API documentation** and integration testing for third-party POS system connectors, reducing onboarding friction for new restaurant partners

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built responsive **HTML, CSS, and JavaScript** pages for nonprofit campaign sites, ensuring accessibility across desktop and mobile browsers
- Integrated **CMS workflows** enabling non-technical staff to publish fundraising content without developer intervention
- Optimized page load performance through **asset compression** and lazy loading, improving engagement on donor-facing landing pages
- Collaborated remotely with foundation stakeholders to refine **user experience** based on donor feedback and analytics review

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Redux, Responsive Design

Backend: Python, Django, Django REST Framework, Node.js, RESTful APIs, GraphQL

Databases: PostgreSQL, MySQL, Redis, MongoDB

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform

Monitoring & Tools: Datadog, Sentry, Jenkins, Jest, pytest, Playwright

Workflow & PM: Agile, Scrum, Jira, Cursor, GitHub Copilot, Code Review, Technical Documentation
