PROFESSIONAL SUMMARY

Full stack software engineer with 7+ years building scalable web applications across fintech and SaaS. Experienced delivering React and TypeScript interfaces alongside RESTful services in Go and Node.js, with emphasis on performance, observability, and maintainable design patterns. Collaborates effectively with product, design, and data teams to ship customer-facing features, improve release reliability, and drive continuous improvement in Agile environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led end-to-end delivery of **customer-facing analytics dashboards** in React and TypeScript, enabling portfolio managers to monitor positions and workflows across **200+ active accounts** with sub-second page loads.
- Designed and implemented **RESTful Go microservices** backing trade validation and reporting APIs, reducing synchronous request latency by **35%** through query optimization and caching strategies.
- Partnered with product managers and designers in **cross-functional Agile squads** to define roadmaps, refine usability, and ship iterative releases on a two-week cadence.
- Built **CI/CD pipelines** on AWS integrating automated testing and staged deployments, improving release stability across **12 backend services** and reducing rollback frequency.
- Established **observability standards** with structured logging, metrics, and alerting that shortened mean time to detect production anomalies from hours to minutes.
- Mentored two junior engineers through **code reviews** and pairing sessions, improving test coverage and adoption of design patterns across the team's shared component library.
- Refactored legacy Node.js modules into **maintainable TypeScript services**, improving code reuse and reducing duplicate business logic across three product surfaces.
- Collaborated with operations and support teams to **troubleshoot production issues**, resolving customer-impacting defects and documenting runbooks for recurring workflow failures.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full stack web applications** for internal banking workflows using React, TypeScript, and Java-based REST APIs serving thousands of daily users across trading and operations teams.
- Contributed to a **cloud migration initiative** moving on-premise reporting tools to AWS, improving scalability and reducing infrastructure provisioning time for new environments.
- Implemented **RESTful service integrations** with core banking platforms, enabling automated reconciliation pipelines that processed high-volume transaction batches with improved reliability.
- Participated in **architectural design sessions** with senior engineers to improve system performance, applying caching and asynchronous processing patterns that reduced batch job runtimes.
- Supported **CI/CD adoption** across technology teams by integrating automated builds, unit tests, and deployment gates into Jenkins pipelines for multiple application repositories.
- Collaborated with business analysts and stakeholders to translate regulatory requirements into **maintainable software features**, balancing usability with audit-ready traceability.
- Improved **monitoring and logging** for critical batch workflows, giving on-call teams visibility into failures and accelerating root-cause analysis during production incidents.
- Delivered strong results across **technology analyst rotations**, earning consistent recognition for communication, problem solving, and execution in fast-paced Agile sprints.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for a customer-facing digital receipt platform, improving checkout workflow usability and supporting rapid feature iterations with product stakeholders.
- Developed **Node.js REST endpoints** for receipt storage and retrieval, applying validation and error handling patterns that improved API reliability for mobile clients.
- Wrote **unit and integration tests** within CI pipelines, helping the team catch regressions early and maintain code quality across weekly releases.
- Collaborated with designers to implement **accessible UI patterns**, ensuring keyboard navigation and semantic markup met baseline usability standards.
- Participated in **code reviews** and sprint planning, contributing constructive feedback and documenting API contracts for cross-team consumers.
- Optimized frontend bundle size through **lazy loading and code splitting**, improving initial load performance on mobile devices.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed responsive **web pages** for a nonprofit foundation site using HTML, CSS, and JavaScript, delivering content updates within tight publication deadlines.
- Integrated third-party **donation and newsletter widgets**, enabling stakeholders to manage campaigns without engineering support for each release.
- Implemented **cross-browser compatibility** fixes and performance optimizations that improved page load times on mobile devices.
- Coordinated remotely with foundation leadership to gather requirements and iterate on **usability improvements** for public-facing program resources.
- Maintained version-controlled source assets and deployment scripts, supporting reliable updates to the organization's primary web presence.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Accessibility, Component Libraries

Backend: Go, Node.js, RESTful APIs, Java, Microservices, Design Patterns

Databases: PostgreSQL, MySQL, Redis, MongoDB

Cloud & DevOps: AWS, Google Cloud Platform, Microsoft Azure, Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions

Monitoring & Tools: Structured Logging, Metrics, Prometheus, Grafana, Datadog, Splunk

Workflow & PM: Agile, Scrum, Jira, Cross-functional Collaboration, Code Review, Technical Writing
