PROFESSIONAL SUMMARY

Full stack software engineer with 6+ years building and maintaining responsive web applications across design, development, testing, release, and operations. Proficient in Java, Spring Boot, TypeScript, Angular, and Node.js with AWS infrastructure managed through Terraform and automated CI/CD delivery. Effective cross-functional collaborator in Agile Scrum teams, translating business logic into maintainable architectures.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Built and maintained **full stack web applications** with **Java**, **Spring Boot**, **TypeScript**, and **Angular**, supporting daily operational modules across investment workflows.
- Designed **reusable component architectures** that reduced duplicated UI logic and accelerated feature delivery for multiple product teams.
- Provisioned and managed **AWS** environments using **Terraform**, standardizing cloud resource configuration across development, staging, and production.
- Implemented **CI/CD pipelines** for automated build, test, and deployment, improving release frequency and reducing manual deployment errors.
- Led **integration testing** and debugging across services, partnering with QA to resolve defects before production releases.
- Collaborated with **operations**, integration, and business stakeholders to analyze requirements and deliver solutions aligned to company initiatives.
- Tuned application performance for **responsive web experiences**, identifying API and frontend bottlenecks that improved end-user page load times.
- Championed **Agile Scrum** practices through sprint planning, code reviews, and shared development standards across the engineering team.
- Supported production systems through release and **operational support**, triaging incidents and delivering fixes with documented root-cause analysis.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java** services and **web applications** in a regulated financial environment, supporting trade reporting and operational data modules.
- Participated across the full **software development lifecycle**, from requirements and design through coding, testing, release, and production support.
- Built REST APIs with the **Spring Framework**, integrating upstream market data feeds with downstream analytics and reporting platforms.
- Deployed and maintained application workloads on **AWS**, collaborating on environment configuration and cloud resource changes.
- Authored **integration tests** and unit tests to validate business logic and prevent regressions across quarterly release cycles.
- Delivered internal tooling with **Node.js** and **TypeScript**, automating batch workflows and reducing manual processing steps.
- Worked in **Agile Scrum** teams with QA and operations partners, delivering iterative enhancements on two-week sprint cadences.

- Debugged production incidents and implemented corrective changes that restored service availability with clear post-incident documentation.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **Node.js** backend services and **TypeScript** frontend features for a customer-facing web platform.
- Implemented **Angular** components and responsive UI patterns under senior engineer guidance, improving consistency across user flows.
- Wrote automated tests and supported **integration testing** to validate API contracts and end-to-end application behavior.
- Assisted with **CI/CD** pipeline maintenance by resolving build failures and expanding test coverage in pull requests.
- Participated in **Agile** sprint ceremonies, estimating work items and delivering scoped features within iteration deadlines.
- Debugged cross-stack application issues, documenting fixes and presenting learnings during team code reviews.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **web pages** and client-side features using HTML, CSS, and JavaScript for foundation outreach initiatives.
- Integrated third-party content APIs to deliver **responsive web application** experiences across desktop and mobile browsers.
- Performed **cross-browser testing** and validation to ensure consistent rendering and accessibility across devices.
- Collaborated with stakeholders to refine requirements and iterate on UI improvements within tight delivery timelines.
- Maintained existing site modules, resolving bugs and applying content updates to keep public-facing pages current.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, Angular, AngularJS, HTML5, CSS3, Responsive Web Design

Backend: Java, Spring Boot, Spring Framework, Node.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS, Terraform, CI/CD, Docker, Jenkins, GitHub Actions

Monitoring & Tools: Splunk, Datadog, Git, Maven, npm, Postman

Workflow & PM: Agile, Scrum, Jira, Confluence, Code Review, Integration Testing
